ALADDIN'S TRIUMPH

The Story of Aladdin and His Wonderful Lamp

THE original story of Aladdin and His Wonderful Lamp is one of the most fascinating ever written. Its very origin is wrapped in mystery. It is perhaps the oldest and best known of all ancient legends.

Aladdin was a tailor's son in ancient China. In spite of the evil intentions of a wicked magician, who kidnapped Aladdin, sending him into a deep cave to get a magic lamp and afterwards kill him, Aladdin, by accident, evaded the clutches of the bad man. When the boy returned home, he accidentally rubbed the lamp. A great Genii instantly appeared, and falling on his knees before Aladdin, demanded to know how he could serve his master. The boy thus discovered that the possessor of the lamp could rule the world, for nothing was impossible for the Genii to do.

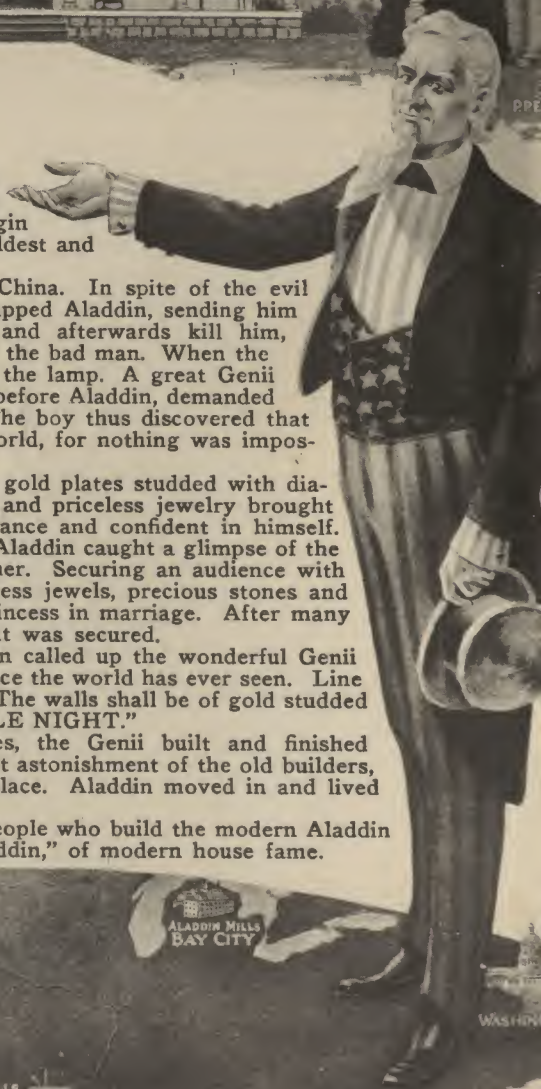

After ordering a rich repast, served on gold plates studded with diamonds, the boy requested beautiful clothes and priceless jewelry brought to him, until he was magnificent in appearance and confident in himself.

Passing the Emperor's Palace one day, Aladdin caught a glimpse of the princess and straightway fell in love with her. Securing an audience with the Emperor and lavishing him with priceless jewels, precious stones and other presents, he asked the hand of the princess in marriage. After many trials and difficulties, the Emperor's consent was secured.

To show his great appreciation, Aladdin called up the wonderful Genii and said: "Build me the most wonderful palace the world has ever seen. Line it with the finest rugs, tapestries and silks. The walls shall be of gold studded with jewels. **AND BUILD IT IN A SINGLE NIGHT.**"

Calling in all his wonderful resources, the Genii built and finished Aladdin's home in a single night, to the great astonishment of the old builders, who required years and years to build a palace. Aladdin moved in and lived happily ever after.

Which can be said of the present day people who build the modern Aladdin home. And thus originated the name "Aladdin," of modern house fame.

EVERYTHING FOR THE HOME

ALADDIN MERCHANDISE—SOLD BY THE GOLDEN RULE

Second Edition 1915 Merchandise Catalog—Copyrighted, 1915

WE have worked incessantly to bring this catalog to a point where it will answer every need in the outfitting of your home. Only goods of known and tested quality, goods we are proud to put the name "Aladdin" on, and goods you will be proud to make a part of your home, have been selected.

THE "ALADDIN" STANDARD OF QUALITY

The name of "Aladdin" has come to mean "High Standard of Quality" in every household that has come in contact with it. It carries confidence to the buyer. It means satisfaction with the goods. It makes real friends of customers.

The integrity of the "Aladdin" policy insures safety, economy and satisfaction; and promptness in meeting your demands.

Satisfaction or Your Money Back

You may choose with a feeling of assurance that you will be pleased when you open the package. Satisfaction or your money back is the basis of every transaction. If you can think of any stronger safeguard to you than this, we will be glad to adopt it.

It is you who makes our business possible and knowing this, we want to serve you in the best way and **please you in every way.**

Our services are not confined to selling you goods. This great organization is made up of many bright men and women, real human people, who like to help other people, to give them the benefit of their experience and knowledge along their chosen profession.

We have people trained in contracting, building, carpentering, masonry, plumbing, heating, electric lighting, painting, decorating, gardening, horticulture, and in fact, almost every activity entering into the building and maintenance of a home.

Of course we have skilled engineers, civil and mechanical; experts in finance, banking, freights and the usual experienced men covering every branch of manufacturing and merchandising.

And every one of these men are glad to answer questions on matters which they are qualified to decide.

Their advice is of the best kind because it is given without payment and without prejudice.

A Word Regarding "HOMECRAFT" and "Aladdin Homecraft" Products

The name stands for **arts and crafts in home decorations**, and unlike most trademarks, the name was not made to fit the furniture, but each piece of furniture is made to live up to the name of our high furniture ideals. These three facts stand out pre-eminent above all others.

No piece of furniture bearing this name is finished in imprint, that is, stenciled or printed to imitate Oak, Birds-eye Maple or Mahogany.

Nothing but Genuine Oak or Mahogany, as the case may be, is used in the exposed portions of "Homecraft" furniture.

No enlarged "wash" drawing pictures are used to make the furniture appear more massive than it really is. This is a very noteworthy fact, as nearly all furniture sold from catalogs today is shown in this way, while all "Homecraft" products are shown by pictures made from actual photographs of the merchandise.

Will you let us serve you?

NORTH AMERICAN CONSTRUCTION CO.

BAY CITY, MICH.

ALADDIN "HOMECRAFT" FIBRE FURNITURE

This furniture was designed to meet the demand for strong, sanitary and serviceable furniture for the Den, Living room, Summer Home, Hotel or Club House.

Widely known as **Bungalow Furniture**, and is unequalled for attractive designs, durability and wearing qualities. It is woven by hand into the dainty and comfort-insuring designs as shown. Is not affected by heat or moisture, and has a finish that will not scratch, splinter or show the effects of hard usage.

Proof of the strength of Fibre Furniture is found in the fact that the Interstate Commerce Commission recently made a ruling whereby the freight classification on fibre furniture is one-third less than on ordinary reed furniture. This is conclusive proof that it is stronger than any form of reed furniture.

The Finish. "Homecraft" Fibre Furniture is finished in a delicate green which will harmonize with any interior decoration. Also furnished in the popular fumed Oak or Baronial. State which you wish.

When ordering, specify whether Baronial, Green or natural Fibre. Baronial is the most popular finish, we therefore always furnish it unless otherwise ordered.

"HOMECRAFT" LIVING ROOM FURNITURE

JACOBEOAN PERIOD XVII CENTURY

AS REPRODUCED BY

The Aladdin "Homecraft" Designers, Bay City, Mich.

ON ACCOUNT OF the sturdy build and necessarily long life of Jacobean period furniture, there are probably more original pieces of this type of furniture in use to-day than of any other. Made of Oak, massive, sturdy, strong, and withal the graceful turned legs and well-balanced effect, together with the rich appearing cane panels, makes a wonderfully good type of furniture. Our designers have, in this set, preserved all of the good points of the old master.

THE TABLE as shown in the cut is 28 in. wide and 48 in. long with a full-width drawer. Has beautifully turned legs and a wide magazine or book shelf below. A more pleasing design could not be imagined, the whole effect being rich and well balanced. "The quality will be remembered long after the price is forgotten."

THE STRAIGHT CHAIR upholstered in genuine Spanish leather. Has a full-spring auto seat. 19 1/4 x 17 1/2 in. The back is 22 in. high with a cane panel 7 in. wide; legs are 2 in. square, arms 4 in. wide. A well proportioned and beautifully finished chair.

THE ROCKER like the straight chair is upholstered in genuine Spanish leather of the very best grade. Seat measurements are the same as with the straight chair. The rockers are well proportioned and the chair is swung in such a way as to give the most comfort.

THE SETTEE is 38 in. high, 42 in. long, upholstered in the very best grade of genuine Spanish leather. Has a full-spring auto seat. The back is 22 in. high, arms 4 in. wide, and the legs are 2 in. square. Two cane panels in the back.

THE WHOLE SUITE is a true copy of the best type of Jacobean furniture and must be seen to be appreciated. Furnished regularly in Fumed Oak finish. Samples of the leather used for upholstering will be furnished upon request. We will also be glad to offer suggestions as to wall decorations, etc., to give an artistic tone to your home. For suggestions, write to our Department of Service.

No. 4A-500—Table as shown, each.....\$16.75
No. 4A-501—Straight Chair as shown, each 7.75

"Homecraft" Living Room Furniture — Davenport

\$21.75 FOR THIS FULL SPRING SEAT AND BACK DAVENPORT WORTH \$35.00

A splendid example of the Tapestry upholstered furniture which is becoming very popular. This davenport is certainly deserving of a prominent place in the "Homecraft" line. Public opinion has gradually eliminated the purely ornamental furniture and now demands more simplicity and solid comfort. Compare this big, roomy, cushioned davenport with the old back-breaking styles so popular a few years ago, and you will appreciate more fully the results achieved by our expert designers. In establishing our furniture department, we have worked toward one simple purpose—to provide the fixtures not merely for a "house" but for a "home." There is a world of difference in the meaning of the two words, and you will find the same difference between our line and others.

This is one of our very best designs, and will be a credit to your home.

Height of back, 28 in.; width of seat, 48 in.; depth of seat, 23 in.

Upholstered in genuine imported tapestry.
Ask for samples of upholstering.

4A-440 DAVENPORT, EACH

\$21.75

MISSION DAVENPORT, UPHOLSTERED IN EITHER GENUINE OR IMITATION SPANISH LEATHER

Made of Quartered Oak throughout. Upholstered in either genuine or imitation Spanish leather. Ask for samples of upholstering. Always shipped in fumed Oak unless otherwise specified.

4A-442—Davenport, genuine Spanish

leather, each

\$27.75

4A-444—Davenport, imitation Spanish

leather, each

\$24.25

This big, roomy davenport with full length auto spring cushion, breathes beauty and comfort in every line. Its simplicity of design and massive appearance, make it worthy of a place in any home, and it will harmonize with practically any style of furniture. The Mission style, of which this davenport is a splendid example, originated in our own country during recent years. Its chief characteristics are straight lines and heavy, massive construction, and is a slightly more elaborate form of the furniture found in the old Missions of California and the Southwest. Oak is the prevailing wood used, as it is very adaptable to this style of construction and to the many finishes, so deservedly popular at the present time. In this davenport, our designers have carried out the true Mission spirit in every detail, and it offers a splendid value to the discriminating buyer.

Measurements—Length, 66 in.; depth, 23 in.

\$33.75 FOR THIS GENUINE JACOBAN STYLE DAVENPORT, IMPORTED TAPESTRY.

A "Homecraft" design of the "Jacobean" period. This style is a product of the seventeenth century, and to make furniture as solid and sturdy as possible seems to have been the aim of the original designers.

The adaption of these principles to modern ideas by our expert craftsmen has produced a style which possesses a strong individuality of its own.

In this davenport the combined spiral and square pedestal legs, slat and cane panel back give it an air of elegance and comfort seldom attained.

Made of solid quartered Oak throughout, with full spring seat, upholstered in genuine imported Tapestry. Can be furnished in Spanish leather if you prefer.

Measurements—Length, 60 inches.

Ask for Samples of Upholstering.

4A-446—Davenport, each

\$33.75

\$39.75 FOR THIS 66-INCH DAVENPORT, UPHOLSTERED IN GENUINE SPANISH LEATHER

Ask for Samples of Upholstering.

4A-448—Davenport, each

\$39.75

This is unquestionably one of the best davenports ever offered for the price. Didn't it appeal to you the moment you turned over this page? Just imagine how well it would look in your own home and picture in your mind the solid comfort it offers. It typifies the true Mission spirit, and is the result of an enormous amount of study and careful planning on the part of our most expert designers.

What gift more suitable than something for the home, and where can you find anything that would be more appreciated than this splendid "Homecraft" Davenport?

Made of solid Quartered Oak, with full length spring cushion and full padded sides and back. Upholstered in genuine Spanish leather. Always shipped fumed Oak finish, unless otherwise specified.

Measurements—Length, 66 inches.

"HOMECRAFT" LIVING ROOM FURNITURE LEADERS

SUITE
\$20.50

THIS ARTISTIC THREE-PIECE "HOMECRAFT" SUITE, ONLY \$20.50

This beautiful and artistic suite consists of one settee, one rocker and one straight chair built on plain lines, well finished and proportioned. If purchased in the regular way, would cost about \$33.00. While it is impossible to make cuts which will show any furniture as well as it looks in reality, we believe that our customers will readily see the saving which we offer in this set.

THE SETTEE has a seat 19x41 inches, full spring construction, upholstered in best grade imitation Spanish leather. The back has two cane filled panels. Is made of Oak throughout, finished Early English, Fumed or Golden Oak.

THE ROCKER has a seat 21x19 inches, full spring construction, upholstered in best grade of imitation

Spanish leather. The back has one wide cane filled panel. Made of Oak throughout and finished same as settee.

THE CHAIR is the same size, and built in exactly the same way as the rocker, the only difference being in its not having the rockers.

FINISH—Early English, Fumed or Golden Oak. Shipped set up from factory near Bay City. Shipping weight of set, 150 pounds.

4A-466—Upholstered in Moleskin, Each **\$7.10**

THIS TURKISH ROCKER **\$14.10**

This big, roomy, Base Rocker was certainly produced by a craftsman who understood the proper blending of beauty and comfort.

It appeals to the love of the beautiful which is part of every normal being, and it seems to extend an invitation to settle back into its padded depths and rest.

This chair would be a credit to any home in the land, and will make a perfect gift to wife, sister or mother. Height of back, 26 in.; width of seat, 22 in.; depth of seat, 21 in.

4A-467—Upholstered in Imitation leather, Black **\$14.10**

4A-468—Upholstered in Moleskin, Each **\$16.10**

GENUINE IMPORTED TAPESTRY

Another beautiful Rocker of slightly different design. The cut shows this Rocker upholstered in imported Tapestry, which is very popular at the present time. Can be furnished in Moleskin if you prefer.

This is another "Homecraft" piece of which we are justly proud, and you can undoubtedly find a place for it in your home.

It will harmonize perfectly with pieces of almost any finish and design. Height of back, 29 in.; width of seat, 22 in.; depth of seat, 21 in.

4A-469—Upholstered in Genuine Imported Tapestry, Each **\$15.00**

4A-469—Upholstered in Moleskin, Each **\$14.75**

TURKISH ROCKER **\$13.00**

A splendid "Homecraft" Base Rocker at about half what it would cost if purchased in the ordinary way.

No detail has been overlooked that would add to its serviceability or appearance, and it will add tone to any room in which it is placed. Height of back, 27 in.; width of seat, 21 in.; depth of seat, 18 in.

4A-471—Upholstered in Imitation leather, Black **\$13.00**

4A-470—Upholstered in Moleskin, Each **\$13.60**

"HOMECRAFT" LIVING ROOM FURNITURE—CHAIRS

ALADDIN "HOMECRAFT"

LIBRARY TABLES

\$12.50

FOR THIS MASSIVE LIBRARY TABLE QUARTER SAWED OAK OR BIRCH FINISHED MAHOGANY

The most popular type library table on the market. It will match nicely any style of furniture. The "Homecraft" designer's idea of a thoroughly good, as well as artistic library table. When comparing prices, do not fail to consider the weights. Our table being much heavier than those ordinarily sold at from \$16.00 to \$20.00. The finishes are Mahogany or Golden Oak, dull or polished finish, one wide drawer with heavy wood knobs. Top is 26x42 inches. Weight, 120 lbs. Shipped knocked-down, from factory in northern Indiana.

No. 4A-550—Library Table (State what finish). Each **\$12.50**
Mahogany or Golden Oak Finish.

"HOMECRAFT" LIBRARY TABLE

A truly "Homecraft" Library Table. The general appearance of this table could not be improved. It is the product of craftsmen, who, while working for artistic effects, never lost sight of the fact that a table of this kind must be strong. This table weighs 90 pounds, just 50 per cent more than the average table of similar size and style, and we can guarantee that it will give absolute satisfaction in every way. Top is 24x36 inches, has one large drawer fitted with wood knobs. Shipped knocked-down, from factory in northern Indiana.

No. 4A-552—Library Table (State what finish). Each **\$7.20**

MISSION DESIGN LIBRARY TABLE

Top is 26x42 inches. Fumed or Early English Finish.

The whole aim in bringing out our line of furniture is to make a line so attractive in design, quality and price that there can be no question as to its success. Our designers have worked out these pieces of furniture, then we have gone to factories, which we knew were best prepared to turn out that particular piece, and to do it according to our orders. In this we show one of the results. When ordering, state what finish you want. Shipped set up from factory in northern Indiana. Shipping weight, 150 pounds.

No. 4A-554—Library Table, each **\$13.20**

Our Greatest Value in Library Tables— Top 32" x 54" Made of Genuine Mahogany

A better proportioned or more attractively patterned table could not be bought, no matter what the price. This table is massive and very rich appearing, and will add tone to any room in which it is placed. A very few pieces of rich furniture such as this placed in a room, will give it a distinctive quality that could not be obtained with twice the number of pieces of inferior furniture.

This table is 30 inches high, 32 inches wide, 54 inches long, has one large drawer and is made of Solid Mahogany. Weight, 190 pounds.

No. 4A-556—Library Table, Mahogany only. Price..... **\$25.90**

"HOMECRAFT" BOOK CASES AND WRITING DESKS

"HOMECRAFT" BOOKCASE

\$17.00

A bookcase designed especially for the bungalow or small home. A beautiful example of the old Dutch Arts and Crafts furniture. Our "Homecraft" designers have selected this on account of the attractive design, sturdy appearance and the decorative value of a case of this kind. It gets away from the regular form of bookcases usually sold. It is 52 in. wide, and 14 in. deep and 46 in. high, finish, Fumed or Early English. Each door contains three glasses, one 8x17 in. and two 8x24 in. The shelves are adjustable. Shipping weight, 170 pounds.

No. 4A-590—Double Door Bookcase, **\$17.00**
52 in. wide. Each

No. 4A-591—Single Door Bookcase, 32 in. wide. \$11.00

"HOMECRAFT" BOOKCASE

\$25.75

Another type of Bungalow or Den Bookcase which we believe will prove very popular. This case is another very distinct type. This idea of every piece of furniture being distinctive has been carried out throughout our line. This case is made of solid oak in two sizes, one with three doors, as shown, and one with two doors. The three door case is 54 in. wide, 13 in. deep, finish, Fumed or Early English. Two door case is 36 in. wide, 13 in. deep. Each door has two glasses, 4x10 in., one glass, 5 1/2 x 10 in. and one glass, 14x38 in. The shelves are adjustable.

No. 4A-592—Three door bookcase, **\$25.75**
weight 240 lbs.
No. 4A-593—Two Door bookcase, wgt. 180 lbs. \$18.75

"HOMECRAFT" DINING ROOM FURNITURE—SUITES

SHERATON PERIOD LATE XVIII CENTURY
AS REPRODUCED BY

The Aladdin "Homecraft" Designers, Bay City, Mich.

THIS STYLE OF FURNITURE was conceived during the late eighteenth century by Thomas Sheraton, who was perhaps the last of the great English designers who have left their names as originators of types of furniture which have become permanent works of art.

Our "Homecraft" designers, in adopting this Sheraton style to modern-day requirements, have followed the great originator very closely. Have eliminated entirely the carved lines which have been used in types of furniture called Sheraton style. In fact, this Aladdin Sheraton dining room suite retains only the simple, artistic straight lines of the original Sheraton.

A simple design of this kind is just as much in style to-day as it was one hundred years ago, and in ten, twenty, or one hundred years from now it will be still as popular, and with ordinary care can be perfectly good.

The suite is complete, consisting of the buffet, china closet, table, serving table and chairs.

THE BUFFET is a most artistic and attractive conception. The main top is 22x54 in., the bevel French plate glass mirror, 10x46 in. It has eight legs tapering to the bottom, with spade feet, three large drawers (one lined for silver) through the center, and two roomy cupboards with slab doors, one at each end. The end panels are beautifully finished and the whole piece is a work of art.

The hardware is something different than usually found in medium-priced furniture. A rich, dull mahogany finish adds greatly to the appearance of this set.

THE CHINA CLOSET is an exact match—design, material, and finish—for the rest of this suite. The graceful but simple lines will appeal when you consider that one hundred years from now this set will be just as it is to-day. The main top is 17x39 in. The glass in doors is 14x42 in. and in the side 10x42 in. The cabinet is furnished with three adjustable shelves, and it is 64 in. high, furnished in dull mahogany.

THE CHAIRS are designed to conform with the balance of the dining room furniture. Finished in mahogany, equipped with a slip seat, which contains nine springs and are covered with genuine leather. "Homecraft" construction throughout.

THE EXTENSION TABLE is simple, yet very artistic. It has six legs as shown, the two center ones being connected. The table top extends very slightly over the apron thus adding to the attractiveness. The main top is 48 in. in diameter and extends to 6 ft. long. Furnished in dull mahogany.

THE SERVING TABLE. While serving tables are not so much in demand as are some other articles of furniture, yet there are many who wish an article of this kind; and, in fact, for a perfectly appointed dining room one is really necessary. This one has a main top 19x38 in., and is furnished with full length drawer, lower shelf, and low back as shown. Furnished in dull mahogany only.

The whole suite is well appointed, rich, simple, and tasty appearing, and will be a source of pleasure as long as used. Furnished in dull mahogany only, and shipped from factory in Wisconsin.

"HOMECRAFT" DINING ROOM FURNITURE

"JACOBEEAN" PERIOD XVII CENTURY,
AS PRODUCED BY
THE "HOMECRAFT" DESIGNERS,
BAY CITY, MICH.

PERIOD FURNITURE, when once it has gained enough prominence to be known as such, is always in good form. For instance, this, our "Jacobeean" Dining room suite is just as much in vogue today as it ever was and this will continue as long as furniture is used.

One thing which makes "Jacobeean" Period fur-

niture of special value is that it cannot be made common by cheap imitation, as the work is such as to make it impossible to cheapen the product.

The spiral twisted legs, the cane filled panels, the raised panels of quarter sawed oak are all things which cannot be imitated.

THE BUFFET is 23 inches deep, 66 inches wide, has two oblong and one curved top cane panels in the back and two cane faced glass doors. Also one shelf below the main cabinet as shown, which has two cane filled panels.

THE CHINA CLOSET is 14 in. deep, 44 in. wide and 65 in. high. Has two 16x44

We can furnish Buffet with Mirror Back like this illustration for \$5.00 above price quoted on Buffet No. 4A-820.

in. glass in the doors and two 8x44 in. glass in the sides. This also has cane filled shelf below the main cabinet.

THE EXTENSION TABLE has a top 54 in. in diameter and extends to 8 ft. long. Made throughout of quarter sawed oak, with a 10 in. square pillar and four spiral turned legs, as shown.

THE SERVING TABLE is 19 in. deep and 40 in. wide, has a cane filled shelf below the main cabinet. One large full width drawer and spiral turned legs, as shown.

THE CHAIRS are of a pattern which conform with the balance of the set. Have full spring auto slip seats covered with genuine leather.

Arm chairs of the same style can be furnished at \$3.00 extra.

THE FINISH, genuine gas fumed "Jacobeean" finish only is applied to this suite, thus carrying out the true "Jacobeean" type.

THE HARDWARE is as shown, genuine copper wrought into a design as shown which conforms with the general appearance of the set.

"HOMECRAFT" DINING ROOM FURNITURE MISSION

MISSION PERIOD LATE XIX AND XX CENTURY AS REPRODUCED BY

The "Aladdin Homecraft" Designers, Bay City, Mich.

The origin of Mission Furniture was in the old Spanish Missions in Arizona, New Mexico and California. On account of a limited number and variety of tools, this furniture was of necessity, plain in design and by the same token was sturdy and strong in appearance. There is no question but what Mission Period furniture will always be popular, as it is strong, attractive, and lends itself to nearly any surrounding.

Our "Homecraft" designers have marked out a true copy of original Mission furniture in this dining room suite.

THE BUFFET has a main top 22x48 inches, stands 54 inches high over all and has a French Bevel plate mirror, 10x40 inches. Has one full width linen drawer, two small drawers, one of which is for silver and has two cupboard compartments with paneled doors.

THE CHINA CABINET has a main top 15x33 inches, and stands 57 inches high over all. Has a full width plate glass mirror back of the top shelf. The glass in the ends is 8x38 inches on each side and in the doors, 14x40 inches in each. The door knobs or pulls are square and made of Oak.

THE DINING TABLE has a main top 42 inches in diameter, opened to 6 feet and has an 8 inch pedestal. Has solid feet two inches thick. This table is beautifully finished and of true Mission type and one of which any purchaser will be sure to feel proud.

THE SERVING TABLE has a main top 18x34 inches and stands 35 inches high. Has one full width drawer equipped with two square wood knobs. A beautiful piece of furniture for any dining room.

THE CHAIRS. Six Mission type chairs with solid oak saddle seat are furnished with this suite. The chairs conform in every detail to the balance of the furniture in this suite.

THE SUITE as a whole is strong, sturdy and pleasing to the eye, and we believe will be a source of pleasure to any purchaser. We quote the different pieces separately, as we will sell as few or as many pieces as you wish.

FINISH. Each piece in this group furnished in Golden Oak, Fumed or Early English.

"HOMECRAFT" DINING ROOM FURNITURE

MISSION PERIOD
LATE XIX AND XXTH CENTURY,
AS REPRODUCED BY
THE "HOMECRAFT" DESIGNERS,
BAY CITY, MICH.

MISSION STYLE FURNITURE will, no doubt, always be popular in the country. The origin of Mission furniture was in the old Missions of Arizona, New Mexico and California. One of the strongest arguments for Mission furniture is its adaptability to nearly any style of decoration. Its strength is another strong point in its favor. Our Mission furniture is made throughout of Oak, and the designs and workmanship are of the very best. The characters are always straight lines. Heavy and massive construction. In this suite we offer an extremely attractive design of dining room furniture. Every detail has been worked out and the finished product will please the most fastidious.

THE BUFFET has a top, 22x48 in. The French plate glass mirror is 10x40. Has two small top drawers, one lined for silver and one large linen drawer at the bottom. The two cupboards are large and roomy, and are fitted with art paneled doors. The hardware used is as shown, of the inverted keystone type and conforms with the Mission style. This, as well as all the pieces in this set, are finished Fumed Oak.

THE CHINA CLOSET is plain Mission type, the style which in China Cabinets gives more available space, for holding and displaying china and cut glass, than

any other style. The cabinet is 39 in. wide, 14 in. deep, 59 in. high. The glass in the ends are 8x40 in. each. Glass in the doors, 14x40 in. each. The hardware matches that used on balance of the furniture. Weight, 145 lbs.

THE TABLE, like the balance of the pieces in this suite, is Mission pattern. This is one of our most popular designs in dining room tables. The top is 42 in. in diameter. Has heavy 4-ply feet, 3 1/4 in. wide. Extends 6 ft. with solid pedestal. Described elsewhere as our No. 4A-202. Weight, 165 lbs.

THE SERVING TABLE. This piece, being somewhat of a novelty, is not included in the suite, as priced below, but can be furnished in the set when so desired by our customers. It is 38 in. wide and 19 in. deep. Has one full length drawer with hardware to match balance of set. Weight, 85 lbs.

THE CHAIRS are made to conform with the balance of the outfit, designed to stand the wear and tear of every day use. Made of quarter-sawed Oak, finished Fumed. Have genuine leather slip seats. The very best Mission chair on the market. Weight, per set of six chairs, 180 lbs.

No. 4A-810—Buffet, as described, each	\$19.75
No. 4A-811—China Closet, as described	15.75
No. 4A-812—Table, as described	14.30
No. 4A-813—Set of 6 chairs, as described	18.50
No. 4A-814—Complete set, including Buffet, China Closet, Table and six chairs.	
Shipping weight, 670 lbs.	\$64.00
No. 4A-815—Serving Table, not included in set	\$6.50

"HOMECRAFT" DINING ROOM FURNITURE

"HOMECRAFT" DINING ROOM FURNITURE

COLONIAL BUFFET

A popular "Colonial" design, all quartered oak buffet, has the true "Craftsman" lines and is just as well made and from as good stock as is our higher priced buffet.

The main top is 22x45 in. The posts are 2 1/4 in. wide. Heavy Plank Top, French Bevel Plate Mirror, 10x32 in. Two top drawers, one lined for silver. Two large slab door cupboard and one large linen drawer.

Always finished in Golden Oak, rubbed and polished unless otherwise specified.

No. 4A-860—22x45 in. buffet, as described, each **\$18.75**
 No. 4A-862—Same as above, but 22x48 in. top **\$21.75**

Another attractive true "Colonial" design buffet, perfect in design, material and workmanship. Every line in this beautiful buffet is graceful, the heavy plank top, wide slab doors, heavy legs, etc.

The main top is 22x54 in. The Posts are 3 in. wide. Heavy plank top, French bevel plate mirror, 10x44 in. Two top drawers, one lined for silver.

Always furnished Golden Oak, rubbed and polished unless otherwise specified.

No. 4A-864—22x54 in. Buffet, as described, each **\$29.35**
 No. 4A-866—22x60 in. Buffet, otherwise as described **\$33.45**

This "Homecraft" Buffet is one of our most popular designs. It is just what the name indicates, a piece of "Homecraft" furniture. And a decided departure from the ordinary buffets.

The main top is 24x54 inches. Posts are 3 in. wide. Has a heavy plank top, French bevel plate mirror, 10x44 in. Furnished in Golden Oak, rubbed and polished. Three top drawers, one fancy front, lined for silver, two swing and one drop cupboard doors, and one large linen drawer, all with large wood knobs and locks and keys.

No. 4A-868—22x54 in. Buffet, as described **\$32.50**

A massive appearing "Homecraft" Colonial Buffet. This very buffet is being sold in a great many retail stores at \$65.00, and is fully worth the money.

The main top is 24x60 in. Posts are 3 1/2 in. wide. Heavy plank top. French bevel plate mirrors, 10x48 in. Three large drawers in top, one lined for silver. Two large cupboards with slab doors divided by a 7 in. scroll. One large linen drawer. All combined in an artistic front. Furnished Golden Oak, rubbed and polished unless otherwise specified.

No. 4A-870—24-60 in. Buffet, as described **\$36.75**

"Homecraft"

Dining Tables

"DESIGNS OF DISTINCTION IN DINING ROOM FURNITURE"

SIMPLICITY OF CONSTRUCTION

That "Homecraft" tables are built for hard service, will be readily understood when the tables are examined. All tables which extend 6 feet are built with an undivided pedestal. All 8 and 10 foot tables with a divided pedestal. The slides are made of clear rock maple, and not only do they slide, but they slide smoothly.

STRENGTH OF CONSTRUCTION

The cap which attaches the pedestal to the table is $1\frac{1}{4}$ inch thick. The slides are at least 4 inches longer than those commonly put into dining tables. They are 3 in. thick. The top lock, which lock divides pedestal tables, works with one motion only, and is absolutely certain. Simplicity, strength and quality is the key note in our table factory.

\$8.45

This is one of our most popular designs in Dining room tables. The top is 42 inches in diameter. Has heavy 4-ply feet, $3\frac{1}{4}$ inches wide. Extends 6 feet with solid pedestal, with the 8 and 10 ft. extension top, the pillar divides. Finished in Fumed Oak unless otherwise ordered. Can be finished Golden Oak or Early English. Shipped from factory near Bay City. Shipping weight, 165 lbs. Catalog No. 4A-202

Price	Price	Price
6 ft.	8 ft.	10 ft.
\$11.30	\$18.60	\$19.95

A Solid Oak "Homecraft" table at an exceptionally low price. The pillar is 7 inches in diameter, the table 42 inches in diameter, extends to 6, 8 or 10 feet, has our "Homecraft" Guaranteed Construction. Shipped direct from factory near Bay City. Finished Golden Oak, Fumed Oak or Early English. Shipping weight, 135 pounds.

Catalog No.	Price 6 ft.	Price 8 ft.	Price 10 ft.
4A-200	\$8.45	\$9.90	\$11.35

A beautifully finished "Homecraft" Extension table. It would be impossible to build a better table than this. The pillar is 8 inches in diameter, non-dividing for the 6 ft. extension, dividing for 8 and 10 ft. extension. The top is polished quarter-sawn oak. Balance plain solid oak. Top is 45 in. in diameter. Shipped from factory near Bay City. Wt., 150 lbs. Finished Golden or Fumed Oak.

Homecraft DINING ROOM CHAIRS

COLONIAL PERIOD

In this pure Colonial diner our Homecraft designers have produced a Masterpiece. It is certainly a beauty in every line and sells for less than is usually asked for a much inferior article. Has genuine leather slip seat. Furnished in Mahogany or Oak. Shipped from factory near Bay City or eastern factory.

4A-1534—Chair, \$3.95
Each
Per set of 6 chairs..\$22.00

Colonial type arm chair to match diner No. 4A-1534. This chair is very attractive in appearance and is well built. The arms giving a tone of luxury and ease to the suite. The price is so little over that of the straight chair that one can hardly afford to leave one of these out of the set.

4A-1536—Arm chair as shown, \$7.25
Each

JACOBEOAN PERIOD

A splendid example of Jacobean Period furniture is offered in this diner. Strong, sturdy and extremely well proportioned. Made of Quartered Oak throughout, finished Fumed, Spanish or Black genuine leather used in upholstery. Equipped with a slip seat.

4A-1538—Chair, \$4.00
Each
Set of 6 chairs..\$23.25

Jacobean Period arm chair to match diner No. 4A-1538. Particular attention is called to the well balanced appearance the arms give this chair. The spiral twisted arm supports and spiral twisted legs, turned feet and flat paneled back all being features found in true Jacobean Period chairs.

4A-1540—Arm chair, Each... \$7.50

MISSION DINERS

Truly Mission in every line, this type of furniture was originated in our own country, having been used in old Spanish Missions in Southern California and New Mexico. The strong, substantial appearance and necessarily the long life of this type of furniture all add to the popularity of same. Slip Seat, Black or Spanish leather.

4A-1542—Chair, \$2.95
Each
Per set of 6 chairs..\$17.50

A dining room is never so cozy and attractive as when one or more Arm chairs help to make up the finishing. Of Mission type furniture, this is especially so. In this Arm chair we offer a big chair for a small price. Finished Fumed or Early English, Black or Spanish Leather.

4A-1544—Arm Chair, Each \$5.95

SHERATON PERIOD

This picture cannot show the graceful lines and beautiful finish of our Sheraton dining chair, the tapering legs, broad panel in back, curved corners and beautiful finish, all add to the attractive appearance. We do not claim the lowest priced line of dining chairs, but we know that better dining chairs were never made. Slip Seat, Black or Spanish Leather.

4A-1546—Chair \$3.45
each.....
Set of 6 chairs....\$19.90

An arm chair to match our Sheraton diner described under No. 4A-1546, with all of the graceful lines and attractive appearance of the regular Sheraton diner, and while an arm chair is not so truly a part of a Sheraton period dining room suite, as in some other styles, still they are used by many and in this we offer a low priced high quality diner with arms.

OUR "LIBBY" SUITE

A VERY ATTRACTIVE WHITE ENAMEL BEDROOM SUITE. Not period furniture, but merely old fashioned, home-like and very attractive furniture. More pleasing effects may often be obtained in room arrangement with old style furniture of this type than with more expensive suites. We believe our "Homecraft" designers have accomplished something in bringing out this suite.

THE BED is 48 in. high, 54 in. wide, and has continuous posts at both head and foot.

THE DRESSER has a top, 19x40 inches. Has a large bevel French plate mirror supported by pillars, turned to match the bed.

THE CHIFFONIER has a main top, 18x30 in., a bevel plate mirror, 16x20 in.

THE DRESSING TABLE has a top, 18x30 in., and an oval bevel plate mirror, 16x26 inches.

"HOMECRAFT" BEDROOM FURNITURE—BRASS BEDS

ALL BRASS FOUR POST BED

The most attractive brass bungalow bed ever offered. The finish on all our brass beds is beautiful. The bright effect is made permanent by the coat of Olasto, which after being applied, is baked on. In this process, it undergoes a chemical change, is fused into the fibre of the brass, thereby becoming a part of the brass so that it resists the action of chemicals such as ammonia and alcohol.

The posts of this bed are 2 in. in diameter, top rail is 1 1/4 in., fillers 1 in. Height of head is 52 in.; height of foot, 40 in. Furnished in 3, 3 1/2, 4 and 4 1/2 ft. widths. Shipping weight, 140 lbs.

No. 4A-640—Brass Bed, as described **\$16.95**

ALL BRASS 2-INCH CONTINUOUS PILLAR BED

This type of full brass bed has, no doubt, been the most popular one ever offered. Our design is not a substitute, but a true example of the type. The continuous 2 in. pillar for both head and foot makes a sturdy, rich appearing bed. The full length 5/8 in. fillers crowned on each end by brass ferrules, add greatly to the appearance. In all the bed is an exceptional value. Nine filler rods at each end. Made 3, 3 1/2, 4 and 4 1/2 ft. wide. The 4 1/2 ft. width is always sent unless otherwise specified. Shipping weight, 140 lbs.

Head, 62 in. high; foot, 40 in. high.

No. 4A-642—Brass bed, as described **\$17.35**

2-INCH PILLAR AND RAIL BRASS BED

Another very attractive brass bed. A sturdy built, massive appearing, well constructed bed and one which we believe will prove to our customers that we can actually save 33 1-3 per cent on this line of material. The usual retail price of this bed would be \$25.00. The pillars and top rail are 2 in. in diameter, bottom rail and fillers are 1 in. in diameter. Large ball corners, about 3 in. in diameter; height of head is 59 in.; height of foot, 37 in. Made in 3, 3 1/2, 4 and 4 1/2 ft. widths. Four and a half foot width always sent unless otherwise ordered. Shipping weight, 145 lbs.

No. 4A-644—Brass Bed, as described, each **\$15.35**

ALL SQUARE TUBING BRASS BED

A full brass bed made of all square brass tubing. The finish on all brass beds looks right when new, but the test of time alone will prove the real merit of a brass bed. We know that the finish on our brass beds will outwear that on the ordinary bed, ten years at least. The pillars of this bed are 1 1/2 in. square; top rail, 1 1/4 in.; bottom rail, 3/4 in.; filler, 1 1/4 in. by 5/8 in.; height of head, 59 in.; foot, 37 in. Made in widths 3, 3 1/2, 4 and 4 1/2 ft. Four and a half foot always sent unless otherwise specified. Shipping weight, 135 lbs.

No. 4A-646—Square tubing Brass Bed **\$26.45**

— HOME-CRAFT DINING ROOM FURNITURE —

JACOBEOAN PERIOD XVIII CENTURY

As Reproduced By

Aladdin "Homecraft" Designers, Bay City, Mich.

The massive appearance coupled with the ornamentally turned legs and carved feet of Jacobean Period furniture lend a charm which is truly artistic. Added to this is the true worth, strength, comfort and, naturally, long life of this type of furniture which in all makes a combination worthy of your notice. The Aladdin designers have reproduced a true Jacobean Period Suite in this, at a wonderfully low price.

The Buffet has a main top 24 inches wide and 48 inches long. A Bevel French Plate Glass Mirror, 8x40 inches, and stands 57 inches high is equipped with four (4) drawers and two cupboards. The cupboards have ornamental paneled doors. The Hardware used is especially made for Jacobean Period furniture and is an exact reproduction of Hardware used during that period.

The China Cabinet has a main top 18x42 inches and stands 62 inches high. Has a full glass front and two glass ends as shown, and has a French plate glass mirror above the top shelf.

The Dining Table has a 52 inch top. Opens to 8 feet long. The pedestal is 12 inches square

with ornamental panel sides. The platform is 30 inches square. The four spiral twisted legs with turned feet makes an exceptionally rich looking table.

The Serving Table has a top 20x31 inches, is 43 inches high and has one full width drawer, with two shelves below. The Hardware is the same as furnished with the balance of the suite.

The Chairs are made to match the suite. The same ornamental panel being used in the back and the same spiral twisted legs are used. The full set of Chairs consist—one arm chair and six regular diners, all slip seats, and upholstered with genuine leather.

Finish. The Suite is finished in Jacobean Period Fumed and shipped from factory in Indiana.

"HOMECRAFT" BED ROOM FURNITURE

POST COLONIAL PERIOD XVIII CENTURY

As Reproduced by

The Aladdin "Homecraft" Designers, Bay City, Mich.

FROM LATE IN THE SEVENTEENTH CENTURY— Post Colonial furniture was very popular. The low post bed being a very handsome and deservedly popular piece of furniture. In many cases the posts were surmounted by a pineapple carved into the post. This bed then passed through a period of violent contrasts and settled to the turned posts, a good example of which has been worked out by our designers. It is interesting to know that during the late seventeenth century the bed was the household's most cherished possession. It is a matter of record that in the year 1640 one William Southmead, of Massachusetts, valued his house at ninety dollars, while his post colonial bed and feather bed for same was valued at the same amount.

Our homecraft designers have followed very closely the old masters in designing and creating this set, and we know that it would be impossible for you to get an equal value anywhere in the country.

THE BED—It is beautifully designed and is built of select grain woods and finished in such a way as to make it a truly wonderful bargain. It is 56 in. high and furnished regularly 4 ft. 6 in. wide, but can be furnished in 3 ft. 6 in. wide, if so desired. The weight is 125 pounds.

THE DRESSER is 42 in. wide and 20 in. deep with a heavy French bevel plate mirror, 24 x 30 in. The drawer pulls are large wood knobs. The drawer arrangement is, two large linen drawers below and two small drawers at the top. The weight is 165 pounds.

THE CHIFFONIER is 32 in. wide, 20 in. deep, and is furnished with a French bevel plate glass mirror, 18 x 20 in. Has four large linen drawers and two smaller drawers, all pulls being large wood knobs. The turned posts which support the mirrors are made to match the posts of the bed. Weight is 160 pounds.

THE DRESSING TABLE is 32 in. wide and 20 in. deep. Has a French bevel plate mirror, 18 x 20 in., and one full-width drawer with wood knob drawer pulls and turned post mirror supports. Weight 95 pounds.

THE CHAIR is a low-backed saddle seat bed room chair, which will add just the proper tone to the room.

All pieces furnished in Mahogany finish and guaranteed to give satisfaction or money will be refunded.

"HOMECRAFT" BEDROOM FURNITURE—METAL BEDS

No. 4A-620

In the finishing of our beds no expense is spared, and we claim a very superior finish over the ordinary metal beds. The best enamel to be obtained is used. Three coats are applied by skilled workmen, and a day given for each coat to dry to insure their being perfectly dry.

In this bed we show a very attractive medium priced bed. The pillars are 1 1-16 seamless tubing. The fillers 5-16 in. They have a 4 in. brass spindle in head and foot. The top rails are 3/8 in.; height of head, 53 in.; foot, 41 in. Furnished in 3 1/2, 4 and 4 1/2 ft. widths. Four and a half foot always furnished unless otherwise ordered. Weight, 86 lbs.

No. 4A-622—Metal Bed, as described..... **\$4.95**

No. 4A-624

This massive appearing well proportioned bed, like all of our metal beds, is finished in the very best manner known, and at the prices quoted, will show a saving of at least 35 per cent., and a very important feature is, that they are well packed. There is no economy in buying a cheap bed if they are poorly packed. We guarantee safe delivery.

This massive bed has pillars 2 in. in diameter, all fillers are 5-16 in. The head is 55 1/2 in. high; the foot 36 1/2 in. high. Furnished in 3, 3 1/2, 4 and 4 1/2 ft. widths. Four and a half foot always sent unless otherwise specified. Weight, 115 lbs.

No. 4A-626—Bed, as described, **\$6.50**
each

In our line of metal beds, while we do not claim to have original designs, we do claim to have the very best beds to be obtained. They are made throughout of heavy steel seamless tubing that will not open at the joints and break the enamel. Heavy steel angles are used at the head and foot ends, making them solid and substantial. Full weight side rails which will not sag are used, and all measurements given are guaranteed to be exact.

This bed has one inch corner posts, 3/8 inch cross rods and 1/4 inch filler rods. All posts are surmounted with brass bases and caps. Head is 55 in. high. Made in 3, 3 1/2, 4 and 4 1/2 ft. widths. Four and a half foot widths always sent unless otherwise ordered.

No. 4A-620—Iron brass trimmed bed. **\$3.15**
Weight, 80 lbs. Each.....

No. 4A-622

All our metal beds are made in the same thorough manner as described above. They can be furnished in all standard colors, but we always send white unless otherwise specified. The standard colors are white, pink, blue and pea green. The finish, as stated above, is the very best.

This bed is a very attractive and substantial pattern. The pillars are 1 1-16 in. in diameter. The fillers 5-16 in. The brass rod which ornaments the top of foot and head piece is one inch in diameter. The head is 60 in. high; foot, 41 in. high. Made in 4 1/2 ft. width only. Weight, 103 lbs.

No. 4A-624—Bed, as described..... **\$6.95**

No. 4A-626

ALL IRON BEDS ARE ENAMELED WHITE UNLESS OTHERWISE ORDERED

North American Construction Company, Bay City, Michigan.

"HOMECRAFT" BEDROOM FURNITURE—METAL BEDS

No. 4A-600

This type of metal bed has become more popular of late years, and on account of the odd shape of steel used in it, has been made up in cheap, flimsy construction more than any other type. We claim for this that no better square post bed has ever been built. The posts are 2 in. square. Cross rods, 1½ in. square. Fillers, 1¼ in. square. The head is 58 in. high; foot, 41½ in. high. Made in 3, 3½, 4 and 4½ ft. widths. Four and a half foot width will always be sent unless otherwise specified. Shipping weight, 130 lbs.

No. 4A-602—Bed, as described, each **\$13.50**

The price of an article does not always determine the value. Quality must also be considered. In our line of metal beds we claim both lowest prices and highest qualities. This bed, if bought in the regular way would be a bargain at \$12.00. Note the dimensions. One piece post and top rail (both head and foot), 2 in. in diameter, all cross rods and fillers, one inch in diameter. Head is 58 in. high; foot, 36 in. high. Made in 3, 3½, 4 and 4½ ft. widths. Four and a half foot widths always sent unless otherwise specified. Shipping weight, 110 pounds.

No. 4A-600—Bed, as described, each **\$8.15**

No. 4A-602

The most attractive metal bed ever offered. The design, if worked out in wood, could not be improved upon. But when you consider that this is made of seamless cold rolled steel, it is a wonder. All of the good points of a metal bed with all of the attractive features of a wood bed. The pillars are 2 in. square. Brass rods (head and foot), 1¼ in. in diameter. All fillers ¾ in. square. The head is 60 in. high; foot, 46 in. high. Made in 4½ ft. widths only. Shipping weight, 127 lbs.

No. 4A-604—Bed, as described, each **\$16.50**

No. 4A-604

Our line of all brass beds are made in the same sturdy, substantial manner as our iron beds. Designed along plain, rich appearing lines. There is no attempt at being freakish in our line. All of the tubing is solid brass with a heavy steel lining. This bed has corner posts 2 in. in diameter. Top rails are 1 in. in diameter, cross rods and fillers, ¾ in. in diameter. Height of head, 53 in.; height of foot, 35 in. Made in 3, 3½, 4 and 4½ ft. widths. We always send the 4½ ft. width unless otherwise specified. Shipping weight, 126 lbs.

No. 4A-606—Brass Bed, as described, each **\$9.25**

No. 4A-606

4A-1059—Price, size 3 ft.....**\$2.10**

Often time this cot is ordered in 3 ft. 6 inches and 4 ft. widths and the price is.....**\$2.75**

ALADDIN SEWING MACHINES

ALADDIN "QUEEN" SEWING MACHINE

GUARANTEED FOR 10 YEARS

Without question this is one of the best low priced machines ever offered. It is strictly dependable, and within its limitations, will perform absolutely perfect work and give excellent service for a great number of years.

SEWING HEAD: The sewing head has an unusually high arm for a machine of this type. There are many important features embodied in this machine some of which are as follows:

Positive Double Width Four Motion Steel Forged Feed, Improved Stitch Regulator on face of arm, Tension Release, Automatic Bobbin Winder, Perfected Takeup, Self-Threading Shuttle, Self-Setting Needle and Nicked Removable Steel Face Plate. The working parts are made of the best quality steel and the machine with proper care, will last a lifetime.

THE CASE: Is in the form of a five drawer semi-drop cabinet which is plain but substantially built of Oak throughout, and is given a high varnish finish. There are four extra long and roomy side drawers with oxidized pulls and handy center draw and an 18 inch inlaid tape measure on front of table. Sewing head is raised to position with one movement of the arm and is locked in place with a simple yet effective device provided for that purpose.

THE STAND: While lighter than the stand on our higher priced machines, is nevertheless strong and well braced. All bearing points are hung on hardened steel cones which are provided with means for adjustment in case the same should be necessary after many years of use.

THE ATTACHMENTS: A full set of steel attachments are furnished. They are packed in a pasteboard box and consist of the following:

Ruffler, Tucker, Binder, Braider, Four Assorted Hemmers, Feller, Quilter, Cloth Guide, Twelve Needles, Five Bobbins, Two Screw Drivers, Filled Oil Can and Illustrated Book of Directions. Needles may be purchased from us or from Standard Dealers.

No. 4A-1610 Aladdin "Queen" Sewing Machine.....

\$14.60

\$14.60

ALADDIN "PRINCESS" SEWING MACHINE

This machine presents the most unusual and desirable combination of quality, high efficiency and low price. It is a high grade machine in every respect and will more than hold its own with the agency machines selling at double this cost. You cannot buy as good a machine for the money elsewhere.

\$16.75

THE SEWING HEAD: Has more improved conveniences and time and labor saving devices than any other sewing machine of like grade in this country. Makes a double lock stitch, a stitch that is always smooth, even and perfect. It runs easily and quietly. A few of the special features are: Spring Tension with convenient release, Improved Takeup, Double Width Steel Forged Four Motion Feed, Automatic Bobbin Winder, Self-Threading Shuttle, Self-Threading Needle, Gear Releasing Device, Improved Stitch Regulator on face of arm, and nicked steel removable face plate. Working parts made of hardened tool steel. With proper care, will last a lifetime.

THE CASE: Attractive in appearance, substantial in construction, four deeply embossed side drawers and a center drawer with turned fancy solid brass handles, are extra large and solid, and an 18 inch transfer tape measure on the table for the convenience of the operator. Furnished either with hand lift or automatic raising head as priced below.

THE STAND: Is Ball Bearing, these bearings operating in hardened steel cones. The machine runs much smoother and easier than those where the balls travel on the rough surface of the castings themselves. Special pattern wheel guard holds the belt on the wheel at all times.

THE ATTACHMENTS: Of the foot pattern are packed in a velvet lined box. The full set consists of: Ruffler, Tucker, Under Braider, Foot Binder, Feller, Four Assorted Hemmers, Cloth Guide, Twelve Needles, Six Bobbins, Filled Oil Can, Two Screw Drivers and Book of Directions.

No. 4A-1613 Princess Sewing Machine, Automatic Lift Head

\$17.60

ALADDIN SEWING MACHINES

THE ALADDIN "GRAND" SEWING MACHINE

We take special pride in this, our Aladdin Grand sewing machine. This model we honestly believe to be the most fully equipped and best sewing machine on the market for anywhere near the same price. No feature has been overlooked which would add to the perfect working of this machine.

\$18.75

THE SEWING HEAD: Has an extremely high arm and in every respect it is modern and well equipped with labor-saving devices as the following list will show: Improved Disc Tension, with Automatic release, Steel Forged Double Width Positive Four Motion Feed, Automatic Stitch Regulator on face of arm, Automatic Bobbin Winder, Positive Cam Driven Takeup, Gear releasing Device, Self-threading Shuttle, and oil hardened Steel Working Cones.

THE CASE: Is of the Colonial design, is well and solidly constructed of the finest mirror finish. Quarter Sawed Oak. Has four extra large, well built side drawers, with unique metal pulls, convenient center drawer; 18 in. tape measure inlaid in the table, and a patented easily operated and quiet running steel chain and lever automatic lifting device.

THE STAND: Ball bearings for two sets of accurately ground steel balls operating in steel cones, runs easily and quietly. Is equipped with a device which prevents the machine from becoming unbelted. The pitman which is made of steel and is unbreakable, has non-binding adjustable connections at either end.

THE ATTACHMENTS: Are very complete as the following indicates: Tucker, Ruffler, Braider, Binder, Four Hemmers of different widths, Shirring Slide, Feller, Quilter, Cloth Guide, Six Bobbins, Twelve Needles, Two Screw Drivers, Filled Oil Can and Illustrated Book of Directions.

No. 4A-1614 Aladdin "Grand" Sewing Machine..... **\$18.75**

THE ALADDIN "SOVEREIGN" SEWING MACHINE

The good points of this machine are not confined to mere appearance, as it is the easiest running and most perfect stitching sewing machine of this type on the market.

THE SEWING HEAD: Is well finished in Black Enamel with the finest imported decalcomania decorations of many colors and has an extra high arm. Has Self-adjusting Tension with Automatic Release, no other machine has this. Automatic Stitch Regulator, Automatic Gear Releasing Device, Two Spool Pins, Steel Capped Needle Bar, Positive Cam Driven Takeup, Easily Threaded Bobbin Case which can be removed from above.

THE CASE: Is a new Pattern Colonial Design. The drawers, four in number with very attractive embossed pulls, are Crescent shape to conform to the contour of the table. Nothing but the finest selected hand rubbed quarter sawed Oak is used in its construction. The tested flexible steel cable automatic lifting device raises the sewing head into position and at the same time elevates the ornamental center panel. There is an 18 inch tape measure inlaid in the front of the table.

THE STAND: Is the improved ribbon type of ball bearing stand, strong in construction, easy and quiet in operation. The balls are encased in patented steel retainers where they revolve independently of each other. The pitman has ball and socket non-binding bearings, also equipped with an automatic belt replacer.

THE ATTACHMENTS: Are packed in a substantial, velvet lined Japanned metal box with clips for holding each separate attachment. The set consists of the following:

One Ruffler, One Tucker, One Binder, One Braider, One under Braiding slide, Four Hemmers of different widths, Shirring Slide, Feller, Quilter, Two Screw Drivers and Thread Cutter. The following accessories are also supplied with each machine: Twelve Assorted Needles, Six Bobbins, Cloth Guide, Filled Oil Can, and Easily Understood, well Illustrated Books of Instruction covering the use and care of the machine and attachments.

ALADDIN "QUAKER LACE" CURTAINS

**RICHEST
OF
LACE**

**RAREST
IN
DESIGN**

This is a very handsome curtain. The border is a rich lacy insertion and edge of "Point-Venice," elaborated at the corner. Mounted on very fine quality Filet net. Plain center.

No. 5A-1012—Length, 2½ yds., Ivory and Egyptian. Per pair **\$4.25**

A magnificent "Princess" lace curtain. The design features a medallion motif and fine Princess lace and is supported by dainty needlepoint embroidery. Plain center of the finest cable net made.

No. 5A-1014—Length, 2½ yds., Ivory and Egyptian. Per pair..... **\$4.98**

A beautiful decorative curtain. The design is Egyptian and shows the symbolized winged sun supported by the conventional bud and flower forms of the lotus plant. Made on very fine filet net.

No. 5A-1011—Length, 2½ yds., Ivory and Egyptian. Per pair **\$3.35**

"ALADDIN" QUAKER LACE CURTAINS

A classical design of the Empire period. The border features the characteristic wealth and shell motifs in the French Brussels treatment which brings the pattern out sharp on the fine Brussels net.
No. 5A-1010—Length, 2½ yds., **\$3.18**
Ivory and Egyptian. Per pair

The applique figure of grape leaves and fruit over an insert of Guipure lace makes this a most effective curtain. It is especially suitable for a dining room.
No. 5A-1008—Length, 2½ yds., **\$2.65**
Ivory and Egyptian. Per pair

This is a very dainty floral design, the border of leaves and graceful harebells being close to the pin-stripe edge leaves a broad center of very fine Swiss net. "Suitable for milady's bedroom."
No. 5A-1006—Length, 2½ yds., **\$2.20**
Ivory and Egyptian. Per pair

A very striking design, the Poinsettia motif and supporting filigree ornamentation make a very artistic and pleasing effect. Made on a firm quality of Brussels net. "Sure to please."
No. 5A-1004—Length, 2½ yds., **\$1.75**
Ivory and Egyptian. Per pair

A simple and effective curtain. The border has an applique of flowers and leaves worked on a foundation of shadow lace. Plain center. "Very popular."
No. 5A-1002—Length, 2½ yds., **\$1.25**
Ivory and Egyptian. Per pair

A broad insertion of Cluny lace mounted on a good quality net, plain center. "A very attractive curtain."
No. 5A-1000—Length, 2½ yds., **85c**
White and Beige. Per pair

Aladdin "Quaker Craft" Lace for Window Draperies

THE MOST
POPULAR
DESIGNS
AND THE
BEST
MATERIALS

THE NAME
"QUAKER"
IS IN ITSELF
A GUARANTEE
OF QUALITY

Above we show an ordinary window artistically draped with Aladdin "Quaker Craft" lace with a narrow lace edging. While artistic results may be obtained with plain hemmed edge, we believe that more satisfactory results are obtained by using the lace edging shown on the next page.

No. 5A-1710—"Quaker Craft" lace, per yard..... 52c

An extremely popular design in the better Craft lace. In making Quaker laces, every process is guarded to insure uniform design and a perfect finished product. Designers from the lace centers of the Old World working side by side with American artists, inspiring them with the traditions of their ancient craft. No. 5A-1712—"Quaker Craft" lace, per yard..... 66c

Another design which can be cut to fit any size or style of window without interfering with the design. In no other way can so many artistic effects be produced at so little expense as in Craft lace. It may be shirred on rods or fitted flat to the glass, as seems most suitable to the room. No. 5A-1714—"Quaker Craft" lace, per yard..... 63c

"Aladdin" Quaker Craft Lace for Window Draperies

An extremely neat and attractive design which can be used in any room in the house with artistic results. Dainty Curtains can be secured at a very low cost by using our Aladdin "Quaker Craft" lace. If in doubt as to the correct pattern or design to be used, allow us to advise you.

No. 5A-1730—"Quaker Craft" lace, 49c
per yard

Another striking pattern in Craft lace. No more attractive window draper could be secured than this for bed room, living room or dining room. We will gladly send you samples of any of this material upon request from you. The designs which we show are all of the very latest.

No. 5A-1732—"Quaker Craft" lace, 46c
per yard

A strictly "Colonial" design. Can be used with very satisfactory results on "French" or "Casement" windows. The design being such that you may cut it either way without cutting into the pattern.

No. 5A-1734—"Quaker Craft" lace, 39c
per yard

In the less expensive Craft laces, this design will prove very attractive with plain hemmed edge or with a lace edging, very attractive results can be obtained. Samples will be sent upon request.

No. 5A-1736—"Quaker Craft" lace, 30c
per yard

Another inexpensive and very attractive design in Craft lace. This has undoubtedly been one of the most widely used designs ever offered. A rich artistic effect may be obtained at the lowest possible cost.

No. 5A-1738—"Quaker Craft" lace, 22c
per yard

An inexpensive design in Craft lace which can be used to advantage in bath rooms, chambers, etc. If you are in doubt as to which pattern you wish, ask us for samples from which to make your choice.

No. 5A-1739—"Quaker Craft" lace, 17c
per yard

"ALADDIN" LACE EDGING FOR WINDOW DRAPERIES

Lace edging to be used in connection with our Aladdin "Quaker Craft" lace in making curtains and draperies. The use of this material adds greatly to the effects obtained.

No. 5A-1740—Quaker lace edging, 5c
per yard

Another design of edging which will undoubtedly be very popular. Samples of either of these edgings will be sent to you upon request.

No. 5A-1742—Quaker lace edging, 6c
per yard

Homecraft Collapsible Go-Carts and Baby Carriages

EASILY FOLDED: "Aladdin" Go-Carts when not in use can be folded into a compact package with practically no effort whatever. All that is necessary is to raise a small brace on either side of the cart. When this is done, the cart folds down into a very compact form, the wheels folding down against the bottom of the cart. To open, simply take hold of the handle and give the cart a slight jerk, then push the side braces into position.

FINISH: The frame and woodwork of these carts are enameled in different colors as described below. This enamel is thoroughly baked, and each cart when sent out by us is finished as well as it would be possible to fin-

ish an article of this kind. Tastefully striped, giving them a stylish appearance.

HOOD: Is well made, with three, four, five or six bows, as illustrated below. Covered with an extra grade of leatherette. We believe that we offer a larger variety of up-to-date shapes in Go-Cart hoods than have ever been offered before.

WHEELS: Particular attention is called to the strong construction of the wheels on "Aladdin" Go-Carts, also to the hanging of these wheels, in such a manner as to insure the cart running straight without continually gniding it.

four-bow hood; leatherette upholstery in black or brown. Price..... **\$6.05**

5A-313 —

Has re-enforced flat steel frame with round, solid steel pushers and fancy wood cross handle; 10 in. wheels with $\frac{5}{8}$ in. rubber tires; padded seat and back; back adjustable to sleeping position;

back; back upholstered to three positions; leatherette upholstery in black, brown, green or gray. Price..... **\$8.75**

5A-314 —

Has re-enforced flat steel frame with $\frac{5}{8}$ in. tubing pushers and fancy wood cross handle; large automobile hood; 12 in. wheels with $\frac{5}{8}$ in. rubber tires; nickel plated wheel fenders; padded seat and

covered in black or brown with wide channel bending. Price..... **\$10.15**

5A-320 —Has

$\frac{5}{8}$ in. tubing pushers with fancy wood cross handle; 12 in. by $\frac{5}{8}$ in. rubber-tired wheels; automobile hood; nickel plated wheel fenders; padded seat and back; back adjustable to three positions; three-ply wood veneer sides;

runabout hood; nickel plated wheel fenders; leatherette upholstery in black, green, brown or gray. Price..... **\$9.95**

5A-316 —

Has $\frac{5}{8}$ in. tubing frame and pushers with fancy wood cross handle; padded seat and back; back adjustable to three positions; 12 in. wheels with $\frac{5}{8}$ in. rubber tires; large

corners; leatherette automobile hood in black, green, brown or gray. Gray and brown carts have gears to match. Price..... **\$11.75**

5A-321 —Has

$\frac{3}{4}$ in. tubing frame and pushers with fancy wood cross handle; three-ply wood veneer sides; hand polished piano finish in colors to match hood; 12 in. by $\frac{5}{8}$ in. rubber-tired star wheels; padded seat and back; back adjustable to three positions; nickel plated wheel fenders and

rubber-tired wheels; tongue adjustable to three positions; enameled fenders; back adjustable to sleeping position. Price..... **\$3.65**

5A-325 —Has

cold-rolled steel frame, light, strong and durable; rear guide wheels; three-ply wood veneer seat and back covered with black or brown leatherette; 10 in. by $\frac{3}{4}$ in.

"HOMECRAFT" REFRIGERATOR

REMOVABLE ICE CHAMBER

WITH GALVANIZED OR
WHITE ENAMEL
LINING

THE OUTERCASE of this refrigerator is made of solid ash, finished in Golden Oak. The panels are raised. The case is well made. All corners being rounded and all joints well made. In fact, it is a high grade refrigerator in every sense of the word.

BEST KNOWN METHOD OF INSULATING. Insulated with mineral wool, non-conducting sheathing and a double dead air space. The mineral wool is held in place by the sheathing and straw board in such a manner that it cannot settle down to the bottom of the box and leave the ice compartment unprotected.

THE HARDWARE. The trimmings are all solid bronze, heavily nickel plated and highly polished. Made after our own design. The latest improved pattern of refrigerator hardware.

THE PROVISION CHAMBER is lined with heavy galvanized iron, furnished plain or white enameled as per price quoted below. The provision chambers are all large and well proportioned. Shelves are all adjustable or removable, thus this chamber is easily cleaned.

THE ICE COMPARTMENT is fitted with an inner lining which can be removed for the purpose of cleaning. An all metal cushion ice chamber support insures a long life. The lid is supplied with a patent lid support and fitted with patent waste trap or syphon. Ice racks are galvanized steel bars riveted together.

THE SHELVES. The refrigerators are supplied with patented woven wire shelves. These being made of heavy steel wire, electrically welded at the intersections and heavily tinned. They are adjustable.

CONSTRUCTION. All "Homecraft" refrigerators are constructed with an inside case of odorless and tasteless lumber, matched and clamped together, well nailed and glued, and fastened to hardwood cleats, making a thoroughly air-tight strong cabinet in itself, and making it one of the strongest and most durable refrigerators ever built.

FINISH. They are finished in three coats of the best quality of filler and water-proof varnish, giving them a gloss finish that looks well and

one that will wear. The inside construction is neat and sanitary, containing many features covered by patents. These add much to the convenience of the user.

THE PROVISION CHAMBER is made of Galvanized Iron, furnished plain, white enameled, and the large size in white porcelain enamel.

THE SHELVES are woven wire with a heavy steel frame. They are heavily tinned and make a strong, sanitary shelf.

REAR ICING ARRANGEMENT FOR REFRIGERATORS

Any refrigerator priced on this page can be equipped with a rear icing arrangement at a small additional cost. This arrangement consists of a door in the rear of the refrigerator in addition to the one in the front. A hole is made in an outside wall directly behind the refrigerator, and large enough to allow the rear refrigerator door to swing freely. This arrangement does away with the necessity of the ice being carried through the house, as the ice man fills the refrigerator from the outside.

"HOMECRAFT" REFRIGERATOR

THE CASE is made of solid oak, inside case of odorless and tasteless lumber, matched and clamped together, well nailed and glued, and fastened to oak cleat. The outside case, made of oak, is nailed and glued to the cleats which bind the inner case.

THE ICE CHAMBER is lined with heavy galvanized iron and is equipped with a cushion frame, thus insuring a long life.

THE PROVISION CHAMBERS are down one side and below the ice chamber. They are large and roomy, and we believe our porcelain enamel lined refrigerators are the best ever offered regardless of price.

THE FINISH is obtained by applying a coating of liquid wood filler. This in turn is finished with three coats of water proof varnish. The inside finish is neat and sanitary, containing many features covered by patent.

THE SHELVES are made of heavy woven wire with a strong steel frame, all heavily coated with tin, thus making a strong, odorless, non-corrosive shelf.

THE HARDWARE is of the latest and most approved type, easily operated with one hand, and a positive gravity catch. Made of solid bronze heavily nickel plated.

The rear icing arrangement which is explained in detail on the preceding page, can also be furnished with any refrigerator shown on this page. This is absolutely the nicest way of handling the refrigerator, as you entirely eliminate the necessity of the ice man tracking dirt and water through the kitchen. The cost is very nominal. Any refrigerator shown with rear icing doors, for, **\$3.50** additional to the quoted price.....

"ALADDIN"

Stoves & Ranges

The "Aladdin" Pointer Range

THIS 8-18
CAST RANGE
\$28.85
WITH
RESERVOIR

GUARANTEE

We guarantee all "Aladdin" stoves and ranges to be free from imperfection of material and workmanship, and to be exactly as described by us, or money refunded. Shipped direct from factory in Indiana.

THIS "POINTER" CAST IRON RANGE is our leader, and we believe the greatest range bargain ever offered. It is up-to-date in every respect. Every detail has been covered in a way that leaves no chance for improvement. This "Range" overcomes the great objection found in many ranges, in that it has no hearth and, therefore, occupies much less space than the ordinary range of the same oven and cooking top capacity. It stands on a sanitary base, thus allowing easy access underneath the stove for sweeping and scrubbing.

THE FIRE BOX is very large and is fitted with heavy hot blast, ventilated linings. The grates are of the duplex type, and burn coal, coke and wood equally well. They can be easily cleaned and removed when necessary.

THE OVEN is large and well proportioned being 18x18x12½ inches, fitted with a drop door, with always cool handle and a safety hinge. The oven will accommodate four 9-inch baking pans. We guarantee it to bake and cook to perfection.

THE RESERVOIR is large, having a capacity of about seven gallons, and can be furnished in either "Wildier" Metal or Copper, Tinned on the inside.

THE WARMING CLOSET is roomy and is trimmed with Nickel plated corners and binding, as shown in the cut.

THE NICKEL PLATED TRIMMINGS. This "Range" is mounted and trimmed with heavy nickel trimmings as shown. The Towel Bar on the front of the stove is large and useful as well as ornamental. The oven Thermometer is also a feature worthy of note. The cooking top is 26 inches deep and 42 inches long, and fitted with six 8-inch covers.

4A-1100—"Aladdin" Pointer Range, with "Wildier" Reservoir. Weight, 475 pounds. Price..... **\$28.85**

King of Steel Ranges

A BETTER RANGE could not be made, no matter what the price. You can judge from the weight that what we say is true; 625 lbs. of the highest grade of material put into a range by workmen who have orders to build the best possible stove, regardless of cost; and the Craftsman who produced this masterpiece proved that the confidence reposed in him was not misplaced. Every line of the stove is artistic, every part perfect, highly nickel plated mountings. In fact, everything to make an artistic and attractive ornament, as well as the best cooker and baker ever offered.

THE BODY is made of 14 gauge Boiler Plate Steel, blued and polished, and thoroughly protected on the inside by heavy cast iron plates, that are bolted, riveted, and electrically welded in such a manner that buckling is impossible. Think of a range made of steel plates 1/4-inch thick reinforced by cast iron plates on the inner side.

THE FIREBOX is extra large, and is fitted with special interchangeable, guaranteed hot blast sectional linings and with duplex grates for burning wood, coal or coke.

THE MAIN TOP has six eight inch cooking holes, and is fitted with a large pouch feed door.

THE RESERVOIR is twice as large as that used on ordinary stoves, having a capacity of 15 gallons. The reservoir tank is made of extra heavy sheet copper, tinned on the inside. The reservoir lids are made of pure aluminum, and we guarantee that any water heated in this reservoir will always be clean and free from rust.

THE OVEN is 18 inches wide, 18 inches deep and 12 1/2 inches high, and is fitted with a glass front set in a full nickel plated frame. The oven is fitted with a thermometer, which enables you to maintain an even heat.

NICKEL PLATED TRIMMINGS. This range is fully mounted with nickel plated trimmings, as shown, and is one of the best appearing ranges ever offered.

WEIGHT with reservoir as shown, 625 pounds, without reservoir, 560 pounds. Shipped from factory in Indiana.

4A-1104—Range, as described **\$49.20**
If without reservoir deduct \$7.50 from price.

"ALADDIN"

Stoves & Ranges

THIS STEEL RANGE was brought out to meet the demand for a low priced, serviceable range. We guarantee this range to cook and bake as well as ranges selling for twice as much as we ask for this one, and while in most cases we do not strive to meet the low priced competition, we can with full confidence offer this range, and know that it will justify our claims. It has no nickel plated parts.

THE TOP is large, having six, eight inch lids, the castings are smooth and not excessively large.

THE FIRE BOX is large and is fitted with interchangeable hot blast linings, and duplex grate for burning coal, coke or wood.

THE OVEN is 18 inches wide, 18 inches deep, and 12½ inches high, and will accommodate four 9 inch baking pans.

THE ASH PIT is large and easy of access and is fitted with a polished door.

THE RESERVOIR is large, having a capacity of seven gallons, can be furnished either in Wilder Metal or Copper, tinned lining. Shipping weight, 265 pounds.

\$19.95 FOR THIS RANGE WITH RESERVOIR

OUR ALADDIN "RECORD" STEEL RANGE, made to meet the demand for a good, serviceable, fine looking range, at a low price. We guarantee it to cook and bake as well as the most expensive range on the market. It has numerous exclusive features, found only on high priced ranges. This range always gives satisfaction and influences other sales. The cast iron parts are all smooth and heavy, all joints are perfectly fitted. The steel body and high closet are made of selected, polished, blue steel.

THE FIRE BOX is large, and is equipped with interchangeable hot blast linings, and duplex grates, easy to clean and remove, burns coal, coke and wood.

THE MAIN TOP is large and is equipped with six 8-inch cooking holes.

THE RESERVOIR has a capacity of seven gallons, and can be furnished either with Wilder Metal or Copper tank.

THE OVEN is large, being 18 inches wide, 18 inches deep, and 12½ inches high.

NICKELED PARTS. This range is fitted with nickel plated trimmings as shown. Shipped direct from factory in Indiana. Shipping weight, 290 pounds.

Stoves & Ranges

\$26.65 **“ALADDIN” COIN**
SANITARY STEEL RANGE

Our Aladdin “Coin” steel range, while not by any means a high priced range is still thoroughly good and serviceable, built on sanitary and scientific principles, worthy of a place in any home.

The Body is made of extra heavy blued steel, reinforced on the oven top and right end of flues, by heavy cast iron plates.

The Fire Box is of ample capacity, and is fitted with heavy interchangeable hot blast, ventilated cast iron linings, the grates are of the duplex pattern, (the best known kind of stove grate), will burn coal, coke or wood.

The Oven is large, being 18 inches wide, 18 inches deep, and 12½ inches high, and is fitted with a drop door, trimmed with smooth nickel plated trimmings, as shown.

The Main Top is large, well constructed, fitted with six eight inch cooking holes.

The Reservoir is made of sheet copper, and has a capacity of seven gallons. Nickel plated trimmings are furnished, as shown in the cut, and are smooth and easy to keep clean.

This is without a doubt, the best steel range ever offered, when the price is considered. Weight with reservoir, 375 pounds. Shipped from factory in Indiana.

4A-1180—Range, as described **\$26.65**
 If without reservoir, deduct \$3.50

When comparing the price on this range do not fail to consider the weight. This range weighs 500 lbs., and the construction throughout embraces all of the modern improvements.

The Colonial design is a feature used in many of the high priced ranges of today, and the Sanitary Base is another feature which is justly popular. Plain, highly polished removable nicked trimmings are another modern improvement; in fact, every feature of this range is a talking point, and while we do not claim it to be as attractive in appearance as our “King,” we do claim that this range will last as long and will give as much perfect satisfaction as any stove ever made.

The outside damper rod operated in front of the range is another feature which is attracting much attention.

The Fire Pot and Grate arrangement is the same as in our “Coin” listed above, as is also the Oven and Main Top. The Reservoir is made of Sheet Copper, and has a capacity of 5 gallons.

The Oven Door swings in place of dropping down as on our other designs.

The “Southern” weighs 500 lbs., when crated ready for shipment. Shipped from factory in Indiana.

4A-1132—Range, as described **\$38.00**

STOVE**

\$19.60

WITH RESERVOIR

In our "Modern" cast cook stove we show a design that is the acme of perfection in every detail. These stoves have passed the experimental stage and have built up an enviable record of satisfactory service.

Their success is due largely to the scientific construction of the fire-box, oven and flues, and their perfect proportions which have resulted in a fuel saving of at least 50 per cent besides enabling you to do better baking and cooking in less time than ever before.

This stove has smooth, highly polished nickel plated trimmings, as shown. Full size oven, 18x19x11 inches; large sectional top with four 8-inch cooking holes; duplex sectional grates for burning wood, coal or coke. Seven gallon reservoir made of sheet copper, tinned on inside. Shipping weight, with reservoir, 300 lbs. Shipped direct from factory in Indiana.

ALADDIN "CHARM" COOK STOVE

This stove embodies all the desirable features of our "Modern," except that it has no nicked oven or fire door plates or oven shelf.

The principles of construction are exactly the same, and owing to the special method of bolting and cementing bottom and back oven plate, these stoves have the only dust and ash proof oven on the market. Main top has four eight inch cooking holes; pipe collar 7 inches; oven, 18x19x11 inches. Shipping weight with reservoir, 295 lbs. Shipped from factory in Indiana.

4A-1146—"Charm" Cook
Stove

\$18.25

ALADDIN "PLAIN" COOK STOVE

The "Plain Pointer" was designed to meet the demand for a first class stove without any unnecessary features adding to its cost. In this model we have left off the base skirting and have produced a plain but dignified stove without sacrificing a single desirable feature. The construction and principles of operation are exactly the same as in the other two models shown on this page. Main top has four 8-inch cooking holes; pipe collar 7 inches; oven, 18x19x11 inches. Shipping weight with reservoir, 285 lbs. Shipped direct from factory in Indiana.

4A-1148—"Plain Pointer" Cook
Stove

"ALADDIN"

FOREST HEATER

Made of Polished Blued steel, lined with a corrugated sheet; steel used is two gauges heavier than ordinarily used in this type of stove; has cast iron dampers in pipe collar. For burning wood or coals; has an extra large fire door.

No. 4A-1151

Lgth.	Wgt.	Size.	Price
in.	in.	Feed Door	
22	40	9 1/4 x 11 1/4	\$2.75
24	43	9 1/4 x 11 1/4	2.95
26	46	9 1/4 x 11 1/4	3.15

Nickel plated foot-rails, 75 cents extra.

This most attractive heater has been a winner wherever it has been placed for sale. The graceful proportions and attractive lines cannot help but please. We feel that in this, we offer more real value for the price, than would be possible to secure elsewhere. This stove is all cast iron except the drum which is made of heavy polished Blued steel.

The Fire Pot is full sized, thick and heavy, and ribbed on the outside, thus insuring a long life; grates are heavy draw center type, for burning soft coal or coke. Not practical as a wood burner.

Ash pit and fire doors are fitted with heavy nickel plated gravity handles, ash door swings on drilled hinges, separate from base, and held rigidly to base by two bolts.

All joints are tongued and grooved and packed in iron, cement making them thoroughly air tight. The drafts are all air tight and of the screw type, positive in action and easily adjusted. Parts to replace broken ones can be furnished by us at any time.

GUARANTEE—We guarantee every "Aladdin" stove or range to be exactly as described by us in every way in regard to weight, measure and workmanship. If you should find otherwise, we will gladly refund full purchase price, together with all freight charges which you have paid.

ALADDIN MERCHANDISE

Sold by the Golden Rule

\$4.50

for This
\$12.00
Vacuum
Sweeper

GUARANTEE

The "Aladdin" vacuum sweeper, like all "Aladdin" products is offered under our binding and unconditional guarantee of satisfaction assured or money returned.

Aladdin Vacuum Sweeper \$4.50

A Vacuum Sweeper and Carpet Cleaner Combined

Brooms, carpet sweepers and vacuum cleaners have all had their day and served their purpose, and now the combined vacuum cleaner and carpet sweeper has come to stay. The first vacuum sweeper was brought out about three years ago and has met with universal success. A carpet-sweeper alone, such as is used in the "Aladdin," would sell for \$3.00, a vacuum cleaner which would do the same amount of work, would sell for at least \$12.00, and the combined results of the two would be about the same as the work of the "Aladdin," and the labor necessitated to operate the "Aladdin" is no more than operating a carpet sweeper.

The "Aladdin" is equipped with an oblong dust bag, the contents of which after using two minutes will prove to you that your home was seldom absolutely clean, unless you have used a vacuum cleaner.

The "Aladdin" is equipped with three bellows which create a continuous vacuum and remove all dirt and dust from the rugs or carpets. The sweeper picks up threads and larger particles which the vacuum cannot.

Thousands of these machines have been sold at \$12.00 each

Thousands of these machines have been sold at \$12.00 each. Notice, we do not say thousands of similar machines, but thousands of this very machine. We are able to offer this machine at the unheard of price of \$4.50, only because of the quantity which we buy, and our being able to pay

Spot Cash with every order.

2C-989—"Aladdin" Vacuum Sweeper. Weight, 10 pounds.

Price, **\$4.50**

OUR "ALADDIN" VACUUM CLEANER

OPERATED BY HAND, this small machine has withstood tests which some of the large power machines could not overcome. Dirt and dust taken from the dust bag, laid on a bare floor, covered with a closely woven rug, was drawn through the rug and back into the dust bag with a very few operations of the handle.

THE WONDERFUL SAVING IN LABOR and the usefulness of one of these machines can only be understood when once placed in your home and put into actual operation. They are durable, simple and easily operated, so easily operated that any person, even a child, can operate them. They clean carpets, rugs and furniture quickly and easily, and make them look like new.

THE DUST BAG OR SEPARATOR can be removed from the machine, cleaned and replaced in five seconds. The machine is equipped with an observation glass in the top, so that you can see the dirt and dust entering and collecting in the dust bag, and to fully convince yourself just what one of these machines will do, sweep a room as clean as you can possibly do it with a broom, or with a carpet sweeper, then start one of these machines in operation, and it will certainly surprise you the amount of dirt and dust which you will collect.

EACH MACHINE IS EQUIPPED with 8 ft. of special wire woven vacuum hose, one long carpet nozzle, and one short upholstery nozzle. The tank is 9 1/4 in. in diameter, finished with green and gold enamel, with nickel plated trimmings, attached to a base of hard wood and occupies a floor space of about 12x16 in.

OUR GUARANTEE—We guarantee our Vacuum Cleaner to be perfect in material, construction and workmanship. That the principle is absolutely correct. The machine will give absolute satisfaction, and if found otherwise, you may return it and we will refund full purchase price. Weight, 20 pounds.

No. 2B-985—"Aladdin" Vacuum Cleaner, each **\$11.75**

REGARDING QUALITY—Every piece of dinner ware sent out by us is the very best American semi-porcelain ware. The shapes are the latest, plain, dignified, rich appearing. The decorations are not gaudy and loud, but delicate and add to the rich appearance of a dining room.

WE GUARANTEE all our dinnerware to be free from imperfections. To be exactly as described by us in every way. To be made by American labor in an American factory. To be decorated by the most skilled labor obtainable and to reach you in perfect condition. To refund your money if this guarantee is not complied with in every way. All dinner ware shipped from the factory, East Liverpool, Ohio.

ROSE SPRAY DINNER SET \$5.60

A delicate rose spray with pink and white roses and rose buds, fine green leaves and stem and a gold band around the outer edge of all pieces form the decoration of this extremely popular set. The shape is semi-ornamental, that is, the pieces have scalloped edges and slightly ornamental handles. These handles being gold traced. A cut of a plate from this set is shown in natural colors on page 111.

PINK AND GREEN SCROLL

\$7.75

A beautiful decoration with more color than in any of our other decorations. The pink flowers and buds, with the green leaves which are alternated, make a symmetrical design, and the gold bands which are traced inside and outside, lend a rich appearance. The shape is plain and rich appearing. The scrolled edge to the flat dishes is very popular at this time. All handles traced in gold. A colored cut showing one of the plates from this set in its natural color is shown on page 111.

No. 4A-680—56 Piece Dinner Set. Weight, 50 pounds **\$7.75**

OLD ENGLISH BLUE WILLOW WARE

\$6.50

There is no doubt that without exception, more ware with this decoration has been sold than of any other one design. The quaint shapes are very attractive. The story told in the decoration is interesting. This being of a young Chinese girl whose father insisted that she must marry an old man, but she eloped with her young lover on the day that was intended for her wedding to the man of her father's choice. The home, the bridge and the boat in which the lovers eloped are all shown. The father, trying to catch the couple, is also shown. Plate in natural color on page 111.

ALADDIN

\$3.98 FOR THIS \$10.00 MANTEL.

OUR "CLINTON" MANTEL

An inexpensive mantel for use where the comfort or practical side of the question is of more consequence than the artistic. We offer this mantel to meet the demands. While inexpensive, this mantel has all of the essential features of our high-priced mantels. The frame is made in solid oak, finished in light or golden oak.

It is 4 ft. high and the width is 4 ft. 6 in. The tile opening is 36 inches. The projection is 4 inches or it can be furnished in the flat. The tile which we furnish is all perfect in every way, no seconds or factory culls. We furnish sufficient tile for the hearth and facing.

While we know that in this mantel we offer more than it would be possible for you to get elsewhere at the same price, our advice would be, buy a better mantel, as the cost of installing would be the same and for each additional dollar spent in fixtures of this kind, you add fully five dollars in value to your home. Prices either with or without fixtures.

3A-900—Mantel with wood work only	\$3.98
3A-902—Mantel with best quality tile for hearth and facing and outfit No. 1, as shown on page 67.....	\$15.50
3A-904—Mantel with best quality tile for hearth and facing and outfit No. 2, as shown on page 67.....	\$23.00

OUR "COLONIAL" MANTEL

This most attractive White Mantel is offered by us at a remarkably low price, and we do not hesitate to say that anyone purchasing this outfit will get more than their money's worth.

The finish is pure white. We cover it thoroughly with 3 coats of white lead and pure linseed oil. The reason we do not give it the finish coat of white enamel before sending it out from the factory, is that enamel being so hard and brittle would be very liable to get damaged in shipment.

The height is 4 ft. 4 in. Width 5 ft. The tile opening is 42 inches wide and 42 inches high. Tile projection, 4 inches.

As furnished by us these mantels are ready to install. No special chimney or flue is needed. In fact, if furnished with Outfit No. 2 any person with ordinary intelligence can place it: no special tools, skill or extra material being required.

This grate will burn any kind of fuel, hard or soft coal, coke or wood, and is absolutely clean. Requires the removal of ashes but once daily.

3A-906—Mantel with woodwork only	\$14.00
3A-908—Mantel with tile for hearth and facing and outfit No. 1, as shown on page 67.....	\$32.50
3A-910—Mantel with tile for hearth and facing and outfit No. 2, as shown on page 67	\$41.00

OUR "MAYFAIR" MANTEL

Is especially brought out for the benefit of those who wish to use it in a room where furnishings are mission, as it is always sent in Weathered Oak finish unless otherwise ordered. It can, however, be furnished in Golden Oak with extra gloss finish if desired.

The complete height is 6 ft. 7 in. Width, 4 ft. 7 in., with wall plate to 5 ft. Bevel French Plate Glass Mirror is 12 inches by 30 inches. Clear glass in the doors. Opening for tile is 42 inches wide by 30 inches high. The tile projection is 4 inches.

When buying a mantel it is always well to remember it is for a life time and a few dollars extra is sure to be a constant source of pleasure.

We are not offering a high-priced mantel, but are offering as good as money can buy, and in the grates, while our prices are higher than some, we know that they will give perfect satisfaction under any and all conditions, no matter how trying. We have therefore selected the best, regardless of cost. The principal design and workmanship is perfect. The finish is of the best. The price is lowest when quality is considered. Shipping weight, 240 lbs.

GRATES AND ANDIRONS MODERN ARTISTIC MASSIVE

OUR GRATE OUTFIT NO. 1

Interior View No. 1

as shown in the cut, consists of frame, basket, ash screen and summer front. The summer front is made of heavy sheet steel, stamped in artistic designs, as shown on the preceding pages. In the complete mantel outfits, the frame, basket and ash screen are made of heavy cast iron. The frame and summer front have a double Electro plated finish, and are furnished in either Oxidized Copper or Oxidized Brass finish. The basket grate is 20 in. wide. The outside dimensions of the grate frame are $24\frac{1}{2}$ in. wide by $30\frac{1}{4}$ in. high. No fire brick or back tile is included with this outfit, but simply the frame, summer front, basket and ash screen. In the cut on the right hand side of page, we show the method of laying brick and tile for this outfit. All necessary equipments aside from these are furnished by us.

Sectional View No. 1

ABOVE IS THE OUTFIT REFERRED TO ON THE PRECEDING PAGE AS OUTFIT NO. 1

GRATE OUTFIT NO. 2

Interior View No. 2

THE GRATE OUTFIT SHOWN HERE is a practical outfit for any one to buy, and we consider it the best grate on the market today. More for your money than you could possibly get elsewhere. While the price seems slightly more than that of our outfit No. 1, it is practically nothing more when you consider the price of the fire brick which are never quoted with an unmounted grate. This outfit No. 2, being built all in one piece, sets in the fire place just like a stove and requires no fire brick.

YOU SAVE THE LABOR OF LINING THE FIRE PLACE with brick; simply make the opening to fit this grate, and when it is in place, you will have no trouble in building the throat of the chimney to throw the heat into the room. The throat in this is set at exactly the right angle, and if your chimney has proper draft, it will never smoke.

Side View No. 2

THE EQUIPMENT IS FRAME MOUNTED, as shown, basket, summer front and ash screen, and upper and lower dampers with which your fire can always be regulated. The basket has dumping bottom; size of the grate is 20 in. Outside dimensions of frame are $24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high. Summer front furnished is of either of the designs as shown on the preceding page, furnished in Oxidized Copper or Oxidized Brass.

ABOVE IS THE OUTFIT REFERRED TO ON THE PRECEDING PAGE AS OUTFIT NO. 2

A FEW OF OUR PATTERNS OF ANDIRONS

No. 3A-925 — These Andirons are 13 in. high, with open back and full ball ornament. Made in cast iron with wrought iron finish, for use in open brick or stone mantels.

Price, Per Pair **\$3.90**

No. 3A-927 — This very attractive design Andiron, 18 in. high, made of cast iron, finished in black. A perfect imitation of hand hammered iron. Open back and hammered ring ornaments.

Price, Per Pair **\$6.80**

No. 3A-929—Heavy square Andirons, 14 in. high, made on strictly Colonial lines, of cast iron, with wrought iron finish. Massive in appearance, and of a very rich design.

Price Per pair **\$6.50**

ALADDIN WATER SYSTEM WORKS

Complete Outfit, Includes Tank,
Pump and all Fittings to con-
nect as shown, Price

\$37.00

THIS OUTFIT will furnish a supply of fresh aerated water for any residence from a well, cistern, spring or other source where the water level does not exceed 25 vertical feet below the base of the pump. This form of water storage, aside from the fact that it is the most convenient is the most sanitary as any stored water should be subjected to some form of aeration. The most simple method of aeration is represented in these systems as the process is being carried on continuously. The air connection from the pump enters the tank in our pump and the water is thoroughly purified by the air bubbling through it to the top of the tank.

TANK—The Tanks are double riveted throughout, every rivet calked before the tanks are tested. And out of the hundreds of these outfits which we have sold under a binding guarantee of "satisfaction or

money refunded" we have never had one complaint.

PUMP—The pump furnished with our outfits is a double pneumatic pump with a brass-lined cylinder and automatic air supply device—the most satisfactory air pump furnished with an outfit of this kind.

ACCESSORIES—With each outfit we furnish a pressure gauge, an air gauge, a gate valve, a check valve, stop and waste cock, a hose faucet and the necessary pipe and pipe fittings to connect the system as shown in the above illustration. Each outfit priced herewith contains tank, pump and accessories as described above.

ALADDIN WATER SYSTEM WORKS

\$37.⁰⁰

COMPLETE

**TANK SETS
HORIZONTALLY**

THIS OUTFIT consists of an automatic water pump and tank and accessories identical in design and purpose with those shown on the preceding page. In most cases these outfits are used where the basement is not deep and where it is more convenient to have the tank lying horizontally than standing vertically. In making a selection of water supply system it is always wise to purchase one of ample capacity, as they require much less attention and a more uniform pressure can be had. A conservative estimate is that you should figure 30 gallons per day to each person in the family for domestic requirements.

The accessories furnished are exactly the same as those described on the preceding page. The tanks are tested, and we know they are absolutely air tight before they leave the factory. To give an idea of how really good our "Aladdin" Water Works Systems are, we call your attention to the fact that these tanks are tested to an air pressure of 200 pounds before leaving the factory, and the average city water pressure of the cities of New York, Chicago and St. Louis is 25 lbs. Therefore, without effort you can have stronger water pressure than that of the above cities.

145-GALLON OUTFIT.

ALADDIN WATER SYSTEM WORKS

\$52.50 FOR THIS **COMPLETE DEEP WELL OUTFIT**

PUMP, TANK AND FITTINGS AS SHOWN

THIS DEEP WELL OUTFIT is assembled to supply the demand for an air pressure outfit which can be used in connection with deep wells. It consists of tank, pump and accessories as shown in this cut.

The Tank is double riveted throughout, and it is always tapped for laying horizontal unless otherwise specified. Many of these tanks are installed by burying the tank, allowing the head which contains the water gauge tapping to project into the basement or into the well pit, kept below the frost line. This prevents freezing and insures water of an even temperature the year round, also saves room.

water or may be shut off when sufficient air is in the tank. On the other hand, the water may be shut off and air only pumped into the tank. The pump is for use with a wind mill or a pump jack.

ACCESSORIES. Pressure gauge, water gauge, gate valve, check valve, stop and waste cock, hose faucet, brass lined water cylinder, hydro pneumatic air cylinder, automatic wind mill regulator, together with pipe and fittings to connect up the outfit as shown in the cut.

"ALADDIN" GASOLINE ENGINE

For the convenience of our customers who wish a pumping engine which, while not the cheapest engine on the market, nor a high priced engine, is one that we can absolutely guarantee to give perfect satisfaction under the most trying circumstances. We offer our "Aladdin" pumping engine with the full confidence that it will fulfill our guarantee in every way.

The "Aladdin" is a four cycle, water cooled, jump spark engine with a cast iron hopper for holding the water, as shown in the cut. The boring is $3\frac{1}{2}$ in.; stroke, 5 in.; fly wheel $12\frac{1}{2}$ in. in diameter and weighs 42 pounds. Specifications for this engine are as follows: Horse power, $1\frac{1}{4}$; speed, 475 revolutions per minute; over all length, 42 in.; over all width, 24 in.; over all height, 20 in.; weight, complete, 260 pounds; pulley, 6 in. in diameter, 4 in face. Shipped direct from factory in central Wisconsin.

GUARANTEE—We guarantee our "Aladdin" pump engine to be exactly as described by us, perfect in every way and to represent more for the money than it would be possible to get elsewhere, and if found otherwise, may be returned, and we will refund full purchase price.

No. 5A-100— $1\frac{1}{4}$ Horse Power "Alad-**\$33.00**
din" pumping engine, price.....

Same engine equipped with a gear driven direct connected pump jack, price.....**\$43.00**

For those who require a larger engine for farm or heavy duty use, we have made arrangements with the factory who makes this pumping engine to furnish an engine of the same quality throughout, but of heavier horse power. We will confine ourselves, however, strictly to the four principal sizes, that is, $1\frac{1}{4}$, $2\frac{1}{2}$, 5 and 8 Horse Power.

\$33.00

These engines as sent out by us are all of the horizontal four cycle water cooled type. All these engines are covered by the same guarantee as is our "Aladdin" pumping engine, and are shipped from the factory direct to our customers. Prices are as follows:

No. 5A-102— $2\frac{1}{2}$ Horse Power "Alad-**\$59.50**
din" farm engine

No. 5A-104—5 Horse Power "Aladdin"
heavy duty engine**\$102.00**

No. 5A-106—8 Horse Power "Aladdin"
heavy duty engine **170.00**

"ALADDIN" WATER WORKS SYSTEM

"ALADDIN" PUMP JACKS

Vertical Pump Jack. This vertical pump jack may be used on any ordinary hand or wind mill force pump. Back geared, four to one with an adjustable stroke, 5, $7\frac{1}{2}$ or 10 in. Should run about 160 revolutions per minute. Shipped direct from the factory in Wisconsin.

No. 3B-490—"Aladdin" pump jack.
Weight, 78 pounds. **\$3.75**
Price

"ALADDIN" POWER PUMP

Above we show a cut of a double acting power pump, furnished with "Aladdin" water works systems shown on this page. The detailed specifications are as follows:

Detailed Specifications—Geared 6 to 1; Gears $1\frac{1}{2}$ inch face; Brass Lined Cylinder; Brass Valve Seats; $\frac{3}{4}$ inch Brass Piston Rod; Steel Piston Guides; Tight and Loose Pulleys, size 3 in. by 12 in.

Horse Power Required—Gasoline Engine—40 lbs. pressure or less, 1 H. P.; 60 lbs. pressure or less, $1\frac{1}{2}$ H. P.; 100 lbs. pressure or less, 2 H. P.

\$92.00

To furnish a combined hand and power operated water works system for country clubs, summer hotels, amusement parks, hunting lodges, etc., we have designed this combination outfit. The tank is the same as furnished with all our "Aladdin" water works systems.

THE DOUBLE ACTION PUMP is designed to pump from a well, cistern, spring or other source where the vertical suction is not more than 25 ft. away. May be drawn along horizontally, however, for any reasonable distance. The pump is fitted with an automatic air intake valve which supplies abundant air with the water. The pump may be used with a gasoline engine or other power or by hand if desired.

ACCESSORIES furnished are the same as with any of our water supply systems.

No. 3B-480—Tank, 36 in. in diameter by 10 ft. long; total capacity, 525 gallons. Weight, 1275 lbs. **\$92.00**

ALADDIN

Complete Plumbing Outfit \$132.⁰⁰

This Outfit is Complete for
an Ordinary Home

Consisting of our Crystal bathroom outfit, one No. 3A-37 Sink with all trimmings, as shown, one thirty gallon range boiler, one No. 3A-450 a i r pressure system and all pipe fittings as shown.

THE BATHROOM OUTFIT which we furnish is our Crystal described on page 77 of our catalog, and is complete with all nickel plated trimmings as shown, threaded for iron pipe connections. This is a high grade outfit and one which we feel sure will give absolute satisfaction in every case, as it has proven to be the most popular outfit which we have offered.

THE SINK furnished is our No. 3A-374 roll rim white enamel sink; length over all, 44 inches; size of sink, 20x26 in. The same being furnished with all nickel plated trimmings as shown, to the wall or to the floor. In ordering, kindly specify whether right hand or left hand drain board is required. Cut shows right hand drain board.

THE AIR PRESSURE SYSTEM furnished is our No. 3A-450, as described on page 84 of this catalog and consists of a tank 24 inches in diameter, by 6 ft. with a capacity of 145 gallons, with a pump suitable for pumping water from wells 20 to 25 ft. deep, and with all other fittings as shown. Should you have a deeper well, from which it will be necessary for you to take this water, it will be necessary for us to furnish a deep well outfit which will necessarily add to the price of this outfit.

THE RANGE BOILER is our number 3A-1122, thirty gallon standard range boiler, tested to a 200 pound pressure, and guaranteed to stand 85 pounds working pressure, complete with stand and couplings as shown.

Pipe Fittings.

In addition to the above, we furnish all roughing in material as shown. This includes soil pipe and soil pipe fittings, iron pipe for hot and cold water supply. In fact everything required to install this entire plumbing system with water works system in a building from ground line to the roof.

Blue Prints.

An extremely simple set of blue prints is furnished with each outfit with the aid of which any ordinary mechanic can install one of our plumbing outfits.

All fixtures are furnished threaded for iron pipe

to the wall. However, connections to the floor can be furnished at the same price. Every fitting is guaranteed to be exactly as described in the catalog. Soil pipe furnished is standard weight and the outfit is guaranteed to be absolutely sanitary in every way.

The kitchen range and water front are not furnished with this outfit at the prices quoted.

Order by catalog number and send a sketch of your home, giving full dimensions with your order, to enable us to draw a set of blue prints to meet your particular requirements.

3A-19—Complete outfit as described.....

\$132.00

MODERN PLUMBING at MODERATE PRICES

We show on the following pages a complete line of the most popular sanitary plumbing material, for houses and bungalows. We show and quote all of these fixtures complete with nickel plated supply pipes, fittings, etc. That is all trimmings to the floor, but we do not show the pipes and fittings either for water or waste pipes. We can, however, furnish all pipe and pipe fittings for water supply, as well as brass goods of all kinds and soil pipe, both standard and extra heavy. In addition to this, we send blue prints showing you exactly where each piece of pipe and each fitting is to go. With the aid of this, any man with ordinary mechanical ability can install his own plumbing system. All of our bath room fittings can be furnished with supply and waste pipes threaded for iron pipe, but if you expect to have a plumber install the system for you, we furnish them with connections for lead pipe.

REGARDING QUALITIES. All plumbing material shown in our catalog is "A" grade in every respect and guaranteed to be such. We give you the privilege of returning any item not

exactly as described by us, and will promptly refund full purchase price, together with any freight you may have paid, upon receipt of a Bill of Lading showing that you have returned such articles.

REGARDING FREIGHT CHARGES. Upon request, we will gladly name freight prepaid prices on any items which you may need. Although you actually save nothing in this way, it may be some satisfaction to you to know just what any article will cost laid down at your station.

If you desire plumbing material for any of our house designs, we will gladly name you a price on roughing in material to do the job, and we will send you suggestions for the placing of different fixtures to the best advantage. If you wish the fixtures for a house other than is shown by us, kindly send us a diagram of the home showing all openings and give measurements and we will be glad to quote you delivered price on enough material for roughing in your bath room fixtures.

ENAMELED STEEL BATH TUB

REGULAR
PRICE

\$10.00

OUR PRICE

\$5.90

We invite your special attention to our Enameled Steel Bath Tub, and the many distinctive features in which we claim its superiority. The shell is made of 24-gauge galvanized open hearth steel enameled by a process which is particularly our own.

The rims are three inches wide and made of full 1½-inch Superior Oak lumber, thoroughly seasoned and kiln dried. The joints being fitted together with Spiral Grooved Hickory dowels. Therefore no unsightly glued joints, and we absolutely guarantee our rims against springing apart.

The overflow is constructed entirely of brass and resembles the overflow usually found on heavy, cast iron, porcelain lined tubs, in that it has a slip joint nut for attaching the waste to the overflow. Thus doing away with a soldered joint. All parts are heavily nicked and highly polished.

Finished in White Enamel on the inside. Nicely painted in sky blue on the outside, and the raised ornaments in the castings are tinted with bronze. This is a very desirable tub for summer cottages or a small home. The tubs are fitted for No. 4½ Fuller bath cock, but these are not furnished at the prices quoted below. Fitted for iron pipe connections.

3A-100—4 ft. 6 in. long; weight, 88 pounds.	Each	\$5.25
3A-102—5 ft. 0 in. long; weight, 90 pounds.	Each	5.90
3A-104—5 ft. 6 in. long; weight, 92 pounds.	Each	6.20
3A-106—6 ft. 0 in. long; weight, 93 pounds.	Each	6.98

We will furnish a No. 4½ Fuller Bath Cock for above tub for \$1.90 extra.

MODERN BATHROOM FIXTURES OUR "GENIE" GROUP \$35.⁷⁵

Showing a Bathroom Arranged With One of Our Three-Piece Genie Outfits

For those who wish an outfit with a smaller tub and a less expensive lavatory, than is shown in our Crystal Outfit, we offer this, our "Genie" group. The component parts are the best that can be purchased. The porcelain enameled tub and lavatory being of what is known as "Five year Guarantee" ware, and the closet of the best vitreous china with an oak tank. We do not furnish the towel bar, sponge cup, medicine chest or other accessories with this outfit, but do furnish all faucets, supply pipes, etc., as shown. The outfit is shipped direct from the factory near Chicago. All pieces are well crated and guaranteed to reach our customers in perfect condition.

THE TUB is 4½ feet long with a 3-in. roll rim, is made of the best grade of cast iron and is lined with genuine white porcelain enamel. It is equipped with a 4½ Fuller bath cock, a nickel plated connected waste and overflow and two nickel plated supply pipes. The tub is guaranteed to be "A" grade and perfect in every way. Complete with all fittings to the floor.

THE LAVATORY is 21 in. wide, 18 in. from front to back, has a back 8 in. high and a roll rim. Is made of the very best cast iron, coated with pure White Porcelain Enamel. The trimmings are two low down lavatory faucets, two nickel plated supply pipes and one nickel plated

trap. These supply pipes and trap are all furnished to the wall or to the floor. Guaranteed for five years.

THE CLOSET is of the Syphon wash down type. Equipped with a highly polished tank, finished in Oak or Mahogany and lined with copper, with a push lever flush valve, and has a rubber ball valve. The bowl is of vitreous porcelain ware. The closet is complete with nickel plated supply pipe and a nickel plated elbow. In fact, all fittings to the floor.

In order that you may have a better description of this outfit, we call your attention to the fact that the outfit consists of Tub No. 3A-160, Lavatory No. 3A-265 and Closet No. 3A-200, all of these being described on the following pages of our catalog.

OUR GUARANTEE. This outfit is guaranteed to be exactly as described above, and to reach you in a perfect condition, and if otherwise, we will, upon receipt of expense bill, showing that it was damaged when it reached you, ship other pieces to replace or refund full purchase price.

No. 3A-301—

Our "Genie" Bathroom Outfit, as described, weight 450 pounds **\$35.⁷⁵**

MODERN BATHROOM OUTFITS OUR "CRYSTAL" OUTFIT for \$37.50

This Shows a Bathroom Arranged With One of Our Three-Piece Crystal Bathroom Outfits

THE OUTFIT. A five-foot porcelain lined cast iron bath tub, porcelain lined lavatory with five-inch apron and a Syphon wash down closet combination, constitutes this outfit. Each piece being fitted with nickel plated trimmings to the floor, and every article is guaranteed to be "A" Grade and perfect in every respect.

THE TUB is 5 ft. cast iron, made on roomy, graceful lines with a 3-in. roll rim. It is white porcelain enamel lined. Is fitted with a nickel plated connected waste and overflow. No. 4½ Fuller Bath Cocks for hot and cold water and a pair of nickel plated supply pipes. In fact, all fittings to the floor. The tub is guaranteed to be "A" Grade, and all fittings are heavily nickel plated and highly polished.

THE LAVATORY is 18x21 in., cast iron, white porcelain enamel lined. Has an 8-in. back with double-wave top and a 5-in. apron. The bowl proper is "D" pattern, 10x14 in. The fittings are all heavily nickel plated and are the very best obtainable. They consist of two brass nickel plated compression basin cocks, with china tops, one marked "hot" and the other marked "cold," one nickel plated trap with waste to the wall and two brass nickel plated supply pipes to the wall, a very attractive appearing lavatory.

THE CLOSET has a highly polished oak tank and seat, tank being fitted with push lever flush valve and has a rubber ball valve. The bowl is vitreous porcelain ware of the Syphon action wash down style. All trimmings, including nickel plated supply pipes and nickel plated elbow and

screws, are furnished. The outfit, in all, is one which would sell regularly at about \$65. We furnish **everything complete to the floor** as described. If you wish pipe, fittings, etc., with which to install this, send us a diagram of your house, giving all measurements, and we will be pleased to quote you.

It would be impossible for us to get a photograph of a bath room in which the arrangement would be just right to show each fixture in this outfit in such a way as to convey to you how really good an outfit we are offering.

For your information, we call your attention to the fact that this outfit consists of our **Tub No. 3A-162**, with fittings as described on the following pages. **Closet No. 3A-200** finished in either Golden Oak or Mahogany. Golden Oak is always sent, unless otherwise specified. **Lavatory No. 3A-262.**

You will find all of this material described on the following pages of this catalog, and with this information at hand, you will readily understand how really good an outfit we are offering at this low price.

We consider that in this outfit, which is true "Aladdin" Quality, that we are offering you more for your money than it would be possible for you to get elsewhere.

Above outfit with all connections threaded for iron pipe, \$1.00 additional.

MODERN BATHROOM FIXTURES OUR "HOMECRAFT" GROUP \$46.50

Showing a Bathroom Arranged with Our "Homecraft" Bathroom Outfit

For many reasons this is the most desirable outfit that we show. It is not expensive when compared with ordinary prices. It is not too massive for a small bathroom and is amply large enough for any large bath room. We furnish with the outfit the tub, with all trimmings to the floor, the lavatory with all trimmings to the floor or to the wall, and the closet with all trimmings to the floor.

The other trimmings, as shown, are not furnished with the outfit, but are photographed in the cut to show a good bath room arrangement. The enameled ware (Tub and Lavatory), furnished in this outfit, are "Five year guaranteed" sanitary ware. The closet is the best of its type that can be purchased.

THE TUB is 5 ft. long with a 3 in. roll rim, coated on the inside and over the rim with pure white porcelain enamel. The trimmings consist of a 4½ Fuller bath cock for hot and cold water, a nickel plated connected waste and overflow and two nickel plated supply pipes. The tub is guaranteed to be strictly "A" grade material throughout, and is guaranteed to reach you in perfect condition.

THE LAVATORY is 24 in. wide and 18 in. deep with a double wave front and top. Has a 4 inch apron and a "D" shaped bowl, 11x15 inches. The back is 10 in. high, made of the

best cast iron, coated with pure white porcelain enamel. The trimmings consist of two low down china indexed lavatory faucets, one marked "Hot," and the other marked "Cold." Two nickel plated supply pipes to the wall or to the floor and nickel plated trap to the wall or to the floor. All bright parts heavily nickeled and highly polished.

THE CLOSET is a vitreous china combination, the tank being solid vitreous china with a double wave front and china push lever. The bowl is of the Syphon wash down type. The seat and cover being finished in either Golden Oak or Mahogany, as desired by our customers. Each outfit furnished with nickel plated elbow. Safe arrival guaranteed.

THE OUTFIT is more clearly described on other pages. Each individual piece being described under the following numbers. Tub No. 3A-162, Lavatory No. 3A-256, and Closet No. 3A-204.

OUR GUARANTEE. This outfit is guaranteed to be exactly as described above, and to reach you in a perfect condition, and if otherwise, we will, upon receipt of expense bill, showing that it was damaged when it reached you, ship other pieces to replace or refund full purchase price.

No. 3A-303—"Homecraft" Bath Room Outfit as described **\$46.50**

MODERN BATHROOM OUTFITS OUR "SOVEREIGN" GROUP \$77.00

Showing A Bathroom Equipped with One of Our Sovereign Bathroom Outfits

Each Article In This Outfit Is Guaranteed to Be of
Especially High Quality

THE OUTFIT. This outfit consists of a cast iron bath tub on a base, a pedestal lavatory and a Syphon Jet closet combination, all selected with greatest care and furnished complete with all fittings, and an outfit worthy of a place in the very best of homes.

THE TUB is five feet long, cast iron, white porcelain, enamel lined, standing on a solid cast iron base fastened to the floor, instead of legs, thus preventing dust and dirt collecting under the tub. The trimmings are all furnished and consist of a china indexed standing waste and overflow. Combination bath cocks and two nickel plated supply pipes all heavily nickeled and highly polished.

THE LAVATORY is white, a porcelain enamel pedestal lavatory, as shown on page 51, complete with all fittings as described. Waste and supply pipes to the wall or to the floor, a massive white enamel lavatory, worthy of a place in any home, no matter how large or beautiful.

THE CLOSET is equipped with a vitreous earthenware tank, which cannot leak or become separated, as there are no joints in it. The bowl is Syphon Jet action with a wooden seat, and cover finished in mahogany or oak. Equipped with all fittings. Brass nickel plated supply

pipes and elbows. The combination is in all, a massive appearing, beautifully designed outfit, guaranteed to give perfect satisfaction to any one who may purchase it. The prices quoted are for the outfit as described, complete with all nickel plated faucets, traps and supply pipes either to the wall or to the floor.

This outfit has been very popular and will continue to be so, as great care is taken to have every piece perfect in every detail. We can furnish "roughing in" material such as soil and supply pipe and fittings for our bath room outfits, and if you will send us a diagram of your house we will gladly quote you a price on material necessary to install a bath room outfit.

OUR GUARANTEE. We guarantee each piece of this outfit to be exactly as described by us in every way, and if found otherwise you may return to us and we will refund full purchase price, together with any freight which you may have paid.

Above Outfit with All Connections Threaded for Iron Pipe, \$1.00 Additional.

ALADDIN

PORCELAIN ENAMELED BATH TUBS

3 INCH ROLL RIM CAST IRON

In our Porcelain enameled Cast Iron bath tubs, we have carried out our principle of highest quality and best values. We offer here a 3 inch roll rim tub, which is worth fully twice what we ask for it, and would cost practically that if purchased in the regular way.

Each tub before enameling is inspected for flaws in the castings. Then after each coat of enamel, each tub is inspected again and we absolutely guarantee that every tub is strictly "A" grade and is free from flaws or chips in the enamel. This tub is nicely painted on the outside.

The dimensions of the tub are as follows: Height over all (on legs) 23 inches. Depth inside 17 inches. Width over all 30 inches. Crated in a substantial manner which eliminates danger of breaking in transit.

Price for tub only without fittings:

WITH STANDING WASTE AND OVERFLOW

3 INCH ROLL RIM CAST IRON, FITTINGS AS SHOWN

The standing waste fittings as shown here do away entirely with the old rubber plug. The waste being controlled at the top of this standing fixture. The tub is heavy Cast Iron White Porcelain Enameled, and is equal to any tub you can buy no matter what the price.

The fixtures are of a massive design, giving the tub a rich appearance. We cannot praise this tub too highly as we know that any person buying one will be satisfied in every way. The tub is "A" grade, strictly guaranteed in every way. The enamel is pure white without a Chip or Craze of any kind. The fixtures are of a heavy design, Nickel plated on copper. In all, it is a perfect tub and one of which any-one might be justly proud.

CAST IRON PAINTED AND ENAMELED KITCHEN SINKS

FLAT RIM WHITE ENAMELED SINKS.—We do not claim to have the cheapest white enameled sink in the country, but we do claim that we carry as good a sink as can be bought, no matter what the price. The sink being of cast iron, will never wear out. They are thoroughly inspected before being painted, thus a flaw in the casting would be readily discovered. Then they are given several coats of pure white, and then coated on inside and over the rim with pure white porcelain enamel, thoroughly baked on, giving the finished product a beautiful glazed surface.

Every sink is fitted with a nickel plated strainer and iron sink collar and sink bolts. Collar can also be fitted for $1\frac{1}{4}$ or $1\frac{1}{2}$ inch iron pipe at an additional cost of 25 cents. Faucets and traps not included.

LAUNDRY TUBS AND COMBINATIONS

Our laundry tubs are made of a combination of crushed granite and Portland cement, mixed in such proportions as to make them smooth and at the same time absolutely proof against wear. They are bound with zinc around the outer edges and are furnished complete with legs and we can furnish traps and faucets for them at prices as quoted at the bottom of this page.

The tubs have rounded corners, therefore easy to keep clean and being moulded in one piece, are much stronger than tubs made of stone. As noted below, we can furnish these made either with or without high backs.

ONE COMPARTMENT LAUNDRY TUBS

Without high back.

—PLATE GLASS MIRROR DOORS—

YOU CAN MAKE A MIRROR DOOR OUT OF ANY DOOR IN YOUR HOME

A MIRROR DOOR for any home can be made at a very nominal expense with this outfit. If you own your own home, you should have at least one mirror door. If you rent a home, you can have a mirror door and take it with you when you move. Removing the mirror from the door leaves no trace aside from the screw holes.

THE OUTFIT which we furnish enables you to take any ordinary door which you have in your home and make a beautiful mirror door, and consists of a fine French plate glass mirror moulding strip and round head brass screws for attaching same to door.

INSTRUCTIONS. First take the door off the hinges and lay it flat on the floor or on horses, take thin strips and place evenly on the door and lay the mirror on top, then place the moulding around the edge and screw it down firmly. Anyone can, with the mirror and fittings which we furnish, make a mirror door from any door in the house in 25 minutes.

“ALADDIN” BATHROOM MIRROR

A LUXURY FOR ANY HOME

A REAL LUXURY AT A REALLY LOW PRICE

QUALITY OF GLASS. The glass for this mirror is the very best quality French plate, the same grade that is used for our mirror doors, the same glass being used in the most elegantly appointed hotels and private residences. It is notable for being thick, strong, and for its transparency.

POLISHED AND BEVELED. The whole surface of this glass is given an extra grinding and polishing, to insure a perfectly level surface, so necessary for the best mirror effects. The result is that perfect reflection, which is the delightful quality of high grade mirrors.

The beveling is done in such a manner as to heighten the appearance, is an inch in width, and the edge of the glass is also ground and polished.

The mirror is attached to the wall with round head nickel plated screws, holes being drilled in the glass for this purpose.

The mirror is triple coated with silvering, making an extra thick, strong, wear-resisting reflecting surface.

It is sanitary, as it has no frame to collect and hold dirt and moisture, it can always be kept thoroughly clean. Every part of its surface can be reached and washed.

SHELF AND BRACKET. We supply with each mirror, a glass shelf and nickel plated brackets for supporting same. The shelf is 5 inches wide and 26 inches long; the mirror, 22 inches wide and 28 inches long. Thus you will note, that the shelf extends two inches each way beyond the mirror.

Furnished complete with nickel plated brackets and all screws, ready to put up.

3A-990—Sanitary Mirror, 22x28 in. complete with glass shelf and brackets **\$8.40**

"HOMECRAFT" BASKET GRATES

A large number of builders prefer to build a plain stone or brick fireplace, and for those we show herewith a line of basket grates, for burning hard or soft coal, coke or wood. When building a fireplace of this kind, we caution you to get a mason who is thoroughly familiar with this class of work and thereby avoid the inconvenience of an improperly constructed flue, this trouble being the most common and practically the only source of trouble in open fireplaces.

This grate is 24 inches wide and 6 inches deep at the lowest point, made of heavy cast iron, fully mounted as shown. It has a dump grate bottom and is large enough for any ordinary room. This grate when ready for shipment will weigh about 40 lbs.
NO. 3A-1129—24 in. \$4.25
 Grate, as described..

This is a strictly Colonial pattern basket grate. It is 28 in. wide and 6 in. deep, is made of solid cast iron, and is fully mounted as shown in the cut. Has a dump grate bottom, thus easily cleaned. This grate is large enough for the largest rooms, used largely for burning wood; coal and coke can also be used as fuel. Weight, 58 lbs.
NO. 3A-1130—28 in. \$5.50
 Grate, as described..

This grate is used largely in smaller rooms, but is plenty large enough for any ordinary sized room. It is 20 in. long and 6 in. deep. When sent out, is set up as shown in the cut. Made of solid cast iron, painted black. Has a dump grate bottom, thus easy to clean. Burns coal, coke or wood. Weight, 40 pounds.
NO. 3A-1131—20 in. \$3.50
 Grate, as described..

RANGE BOILERS AND HEATERS

NICKEL PLATED, GASOLINE HEATERS

Made of heavy galvanized iron with outside jacket of white metal heavily nickel plated. 28 inches high, 12 1/2 inches in diameter and holds about 12 gallons of water. Has a copper coil in the bottom with which the flame comes in direct contact, and through this coil all water must pass before leaving faucet. Small quantities of water heated in 3 minutes; enough water for a bath in 20 minutes.

No. 3A-1120 — Gasoline Water Heater, shipping weight, \$7.70
 40 pounds

STANDARD AND EXTRA HEAVY RANGE BOILERS

Are tested to 200 pounds pressure, and guaranteed to stand 85 pounds pressure. Range boilers can only be used in homes where there is a constant water pressure, and, therefore, must be used in connection with city water works system or air pressure water system. Extra heavy range boilers tested to 250 pounds pressure, and guaranteed to stand a working pressure of 150 pounds. All range boilers quoted complete with stand inside tube and brass coupling.

"SOVEREIGN" SANITARY

LAVATORY

FOR FARM AND SUMMER HOMES

OUR "SOVEREIGN" SANITARY LAVATORY can be installed by anyone. No plumber or mechanic of any kind is needed. The tools necessary are a screw driver and a pair of hands. The material needed is 8 screws which are furnished by us.

MIRROR AND WATER TANK. The cabinet is made of solid Oak, and is equipped with a rust-proof lining. It holds about nine basins full of water. The mirror in front of this cabinet is the best French plate, 12x16 inches. This cabinet has all the appearances of a medicine cabinet which is ordinarily hung in the bathroom over the lavatory and adds greatly to the appearance.

THE PEDESTAL. Made of Apollo galvanized iron with a coat of white zinc inside and two coats of white zinc and three coats of special white enamel outside. The pedestal holds the waste water and is removed for emptying.

THE BOWL is white vitreous porcelain, 17 inches in diameter and is securely suspended by patent metal supports of great tensile strength. The bowl retains its position safely when the pedestal is removed.

FIXTURES. Consists of nickel-plated supply pipes, nickel-plated faucets, nickel-plated soap cup and tumbler holder, and a nickel-plated towel rack or bar. All these are heavily nickel-plated and highly polished, giving the outfit a rich appearance.

This lavatory is guaranteed to be perfect in material, design and workmanship, and if found otherwise than described by us, you may return it and we will refund full purchase price.

Weight, 85 pounds.

"HOMECRAFT" PORTABLE ELECTRIC LAMPS

"THE LAMPS OF DISTINCTION"

These "Richest of Portable Lamps" are offered by us with the full assurance that none better or more attractive can be found, made of solid Mahogany, combined with rarest of silks or Richest of Glass or finest of cretonne.

The Art Styles shown here are designed on classic lines, carved from solid Mahogany (with one exception) making pieces that have true value and merit far beyond the usual cast and plated brass.

The shades have ribs of wood, enabling us to furnish any style of curved domes possible in metal. The openings between the ribs are filled with cretonne or richly colored Art Glass.

3A-3100—Mahogany, 6 feet high; shade, 24 inches in diameter; has three pull sockets, with Art Glass in panels. Each \$28.75

3A-3101—Same as above, with Silk or Cretonne panels \$30.50

3A-3103—Mahogany and Oak, 6 feet high; shades, 24 inches in diameter; has three pull sockets, with Art Glass in panels. Each \$23.75

3A-3104—Same as above with silk or Cretonne in panels. Each \$25.95

3A-3106—Mahogany stand 22 inches high. Shade, 14 inches in diameter; has one pull socket, with Art Glass in panels. Each \$8.60

3A-3107—Same as above, but with Silk or Cretonne panels. Each \$9.75

3A-3109—Mahogany Boudoir Lamp, 18 inches high; shade, 7 inches in diameter with silk shade, as shown. Each \$5.25

3A-3111—Mahogany stand 24 inches high; shade, 14 inches in diameter, one pull socket, with Art Glass in panels. Each \$8.85

3A-3112—Same as above, but with Silk or Cretonne in panels. Each \$10.40

Piano Lamps

"The charm of music is made far more soothing under the influence of proper light, the soft glow wholly in harmony with all that is rare emanates from these lamps."

Portable Lamps

"Wherever there is a library table there also should be one of our portable lamps."

"These are the logical library and parlor lamps."

3A-3106

3A-3109

3A-3111

Art Furniture Novelties

"Just as much as culture will do for a man, that much these Art Novelties will do to give tone and finish to a home."

Any lamp shown on this page furnished with silk shade, 15 inches in diameter. Same shape as furnished on lamp No. 3A-3109 at no extra charge. These silk shades can be furnished in the following colors: Old Rose, Pink, Old Gold, Tan, Green or Red.

It's merely combining the rarest of fabrics or richest of glass with the rarest of woods, light and workmanship—a combination not even rivaled by the "Alhambra."

ALADDIN

"ALADDIN" PIPELESS FURNACE

A COMPLETE HEATING PLANT FOR THE PRICE OF A STOVE

Showing the "Aladdin" installed in our house, the "Portland."

COSTS LESS THAN A BASE BURNER

In our "Aladdin" pipeless furnace, we are offering the very latest departure in warm air heating. **The principle is positive.** Cold air is taken through three 8x10 inch registers, placed in the base of the jacket which goes around the furnace proper. **The heat is forced upward** through a large 14x20 inch register placed directly over the furnace. Through this register, the hot air passes with great force to the ceiling and circulates from there to all rooms of which doors have been left open to be heated. The warm air will be so evenly distributed that you will find a variation of less than three degrees between the room where the register is placed and the room farthest away from same, providing of course, that doors connecting these rooms are left open to give a free circulation.

SIMPLE AND EASY TO INSTALL

To give an idea of how simple an operation it is to install one of the "Aladdins," we show a cross section view of our house, "The Portland," with the furnace installed. We call your attention to the fact that there are no large warm air pipes to destroy the usefulness of the basement, no wall pipes or fittings to be installed. In fact, any man who is so inclined, can install this furnace, do all of the work himself, and the whole operation should not take more than four or five hours. The register must be placed directly over the furnace, and the furnace should be placed, as nearly as possible in the center of the basement. You take no chance when you order an "Aladdin." We guarantee it for 365 days, one full year.

TESTIMONIAL.

North American Construction Co., Bay City, Mich.

Gentlemen—Furnace received, and is entirely satisfactory. It took me 25 minutes to set up the furnace, and four hours to lay the brick and place register. You may refer any prospective customer to me.

Yours very truly,

C. E. POOLE,
Bay City, Mich.

TESTIMONIAL

Bay City, Mich., Dec. 8, 1913.
North American Construction Co.,
Bay City, Michigan.

Gentlemen—One year ago I purchased one of your "Aladdin" Pipeless Furnaces. Have found that it will heat my ten-room house to my entire satisfaction. My house is heated more evenly than when I used a steam system, and I burn less than half the fuel. To say that I am enthusiastic over my "Aladdin" furnace would be putting it mildly. Yours very truly,

B. BEHMLANDER,
203 N. Linn St., Bay City, Mich.

TESTIMONIAL.

Ohio, April 4, 1914.
North American Construction Co., Bay City, Mich.

Gentlemen—I duly received the "Aladdin" pipeless furnace, and have placed it, and did the brick work myself, and I am of the opinion that it will do the work perfectly.

Yours truly,
C. L. WELCH.

“ALADDIN” PIPELESS FURNACE \$47.50

SO SIMPLE THAT ANY MAN CAN INSTALL IT

Furnished for Brick Set or with Galvanized Jacket

In the large cut at the top of the page we show the furnace with a brick jacket. We furnish the furnace complete with all registers, and one extra length of 7-inch pipe, with check damper and galvanized iron register box, furnace chain and wall plate, and in fact everything necessary for installing the furnace with the exception of the brick and mortar. For setting the furnace, you will require about 350 common brick, one sack of cement and a bushel of sand.

FURNISHED WITH GALVANIZED JACKET. We recommend the furnace with a galvanized jacket for use as a portable furnace, that is, in rented homes or for temporary use in any home or store building. The price is somewhat higher, but as you will note, the price at which we sell this furnace is no more than a good heating stove would cost, and with the use of a furnace, you gain the space ordinarily taken up by a stove, and at the same time, have the heat in such a way as to be entirely utilized and easily controlled. This furnace will use but very little, if any more fuel, than an ordinary heating stove, and the prices which we quote are for the furnace complete. No extra pipe, registers or additional material required with the exception of the brick and cement which must be purchased for the brick set furnace.

OUR GUARANTEE.

We guarantee our “Aladdin” Pipeless Furnace without restriction, to heat any house containing 15,000 cubic feet or less of air space, to an Average Temperature of 70 Degrees Fahrenheit, in the coldest weather, providing connecting doors are left open to give free circulation.

The Fire pot is 20 inches in diameter and the walls are practically one inch thick, making this section only weigh 120 lbs.

The Grates are of the draw center shaker type, easily taken care of, and of a pattern which will save fuel. The furnace was originally intended for burning soft coal or coke, but many of our customers are burning hard coal only, and others are burning nothing but wood, in every case the results seem to be satisfactory.

The Radiator is so made that it can be opened and allow a direct draft or closed to take advantage of all of the heat generated by the furnace.

We furthermore guarantee that there will be a variation of less than three degrees between the room where the register is placed and the room farthest from it. If the furnace is found otherwise than described, you may return it, and we will refund full purchase price.

No. 3B-525—“Aladdin” Pipeless Furnace for brick set, complete (less galvanized jacket.) Shipping weight, 800 pounds. (For homes containing 15,000 cubic feet or less air space.) **\$47.50**

No. 3B-527—“Aladdin” Pipeless Furnace, as described above, but with galvanized jacket. Weight, 925 pounds. Price..... **\$55.00**

No. 3B-529—“Aladdin” Pipeless Furnace for brick set, complete (less galvanized jacket.) Weight, 1,470 pounds. For store buildings or churches containing 30,000 cubic feet or less air space. Price.... **\$73.15**

No. 3B-531—“Aladdin” Pipeless Furnace, same as above, but with galvanized jacket. Price..... **\$79.75**

Water Coil. A water coil can be furnished for this furnace for \$1.00

The Doors are amply large for all ordinary purposes. Feed doors being 11x11 inches and the ash pit door 10x16 inches. Each section of the furnace is fitted with a grooved top into which the section above fits in such a manner as to make the furnace dust proof.

In addition to this, we will allow you the privilege of returning the furnace at any time during the first year after purchase, if found otherwise than as described by us, and should you return the furnace, we will refund full purchase price, together with freight charge which you have paid.

"SOVEREIGN" CAST RADIATOR WARM AIR FURNACE

BURNS ANY KIND OF FUEL

TOO MUCH IMPORTANCE cannot be attached to the heating problem by the home owner. The long life of a heating apparatus and its yearly consumption of fuel, makes the original cost a minor detail.

In this, our "Sovereign" Cast Radiator Warm Air Furnace, we offer our highest grade furnace, of what is known as a pipe furnace. It burns either hard or soft coal with equally good results. In it we combine a long lived and a fuel saving heater. It is built on scientific lines.

IN CONNECTION WITH THE LIFE OF THE FURNACE, we might say that buying a cheap furnace for temporary use may be good policy, but if you wish to buy a heating apparatus which will last you a life time and give absolute satisfaction at all times, we say by all means buy a furnace with a cast iron radiator. As the original cost of a furnace when compared with the cost of fuel, which must be bought every year, is so very small that you can well afford to pay more for the furnace in the beginning than depend upon making a portion of the saving on fuel consumed each year.

THE RADIATOR is made of heavy cast iron, which, when once heated, will retain the heat for a long time after the fire has burned low. The joints in this radiator are dust and gas tight and the arrangement of the flues in the radiator being such that all gases must pass entirely around the radiator before going out through the chimney.

THE CASING is made of 26 gauge Galvanized Iron with an inner lining of bright tin. Between these is a heavy sheet of asbestos paper, also a deep air space as shown in cut. This casing absolutely prevents waste of warm air, as it is as near a non-conductor of heat and cold as can be made.

These casings are made large and roomy, thus allowing for ample air space and assuring a good flow of pure warm air. Not a limited supply of overheated air. Each furnace is equipped with a cast water pan to moisten the air. We send tee and check draft, also chain and other fixtures with every furnace.

FIRE POT. We wish also to call your attention to our sectional cast fire pot. This construction has been found to be a great advantage in preventing the cracking of the fire pot, due to unequal heating. Each fire pot is cast in two sections. Its great weight and thickness, together with the fact that it is corrugated, insures a fire pot that will not warp or burn out. In fact, it should last a life time.

THE ASH PIT. We show in the small cut the actual arrangement of the grates, ash pit, etc. You will note that the grates are triangular and revolve. They are made with three sides, all exactly alike and thus only one-third of your grate is in service at any one time. With ordinary precaution regarding clinkers, these grates will last for many years. However, should they burn out, each bar can be removed independent of all others. The operation is so simple that a novice could do it. New bars can be substituted for old without disturbing the fire.

DOORS to the fire box, as well as the ash pit are large, thus insuring easy access to the furnace, and a great convenience when feeding or cleaning it.

FITTED WITH HOT WATER COIL, \$1.00 EXTRA

SEND US A DIAGRAM OF YOUR HOME AND ALLOW US TO QUOTE YOU DELIVERED PRICE ON A FURNACE TO HEAT IT TO YOUR ENTIRE SATISFACTION.

"SOVEREIGN" STEEL RADIATOR WARM AIR FURNACE

OUR LOWEST PRICED AND MOST POPULAR FURNACE

\$30.25

**FOR THIS
FURNACE**

**COMPLETE
WITH CASING**

We offer herewith our lowest priced and likewise most popular warm air furnace, of the type known as the pipe furnace. This is not a cheap furnace as far as quality and workmanship are concerned, but is a strictly high grade guaranteed air furnace, which will burn any kind of fuel. The prices quoted on the furnace include Galvanized Iron casing, Tee, Check, draft, chains and water pan. **In fact, everything complete, excepting pipe and registers.**

Send us a sketch of your home, showing location of chimney in basement and showing all window and door openings, giving size of each opening, and we will quote you a net delivered price on the furnace, together with all necessary pipe, registers, fittings, etc. We will in addition to this (if an order is received from you), send you a blue print, giving detailed information as to how the plant is to be put in and will also guarantee, that if the plant is put in according to our instructions, that it will heat your home to a temperature of 70 degrees in the coldest weather. We do not claim, however, that this furnace will last as long as our Cast Radiator Furnace, as it will not. Though it will last for a great many years and give excellent satisfaction. **If you wish to burn wood in the furnace, the price is \$2.00 extra.**

GRATES as shown in the cut on the preceding page, are of the triangular bar grate type, which, in revolving, accomplished by turning the handle, effectively clears the fire and grinds up any clinkers. Each bar having three sides, one of which only is exposed to the fire at any one time and insures a long lived grate bar.

THE ASH PIT is deep and roomy, giving a large air space under the grate which promotes and is essential to a long lifted grate, as nothing is so deteriorating to grate bars as having the ashes banked up underneath them. This is an important point and should not be overlooked by anyone owning or operating a hot air furnace.

THE FIRE POT is deep and extra heavy. Is a corrugated pot which insures an air space around the fire. Likewise a saving in fuel and greatly lengthens the life of the fire pot. Being extra heavy, it also helps in equalizing the heat.

THE BASE PLATE is one piece of heavy cast iron upon which the furnace rests. Forming at the same time the bottom of the ash pit. This is cast in one piece with the outer ring. Being connected with extra heavy cast iron bars or spokes.

THE RADIATOR is provided with a diving flue as shown in the large cut, which draws all heat to top of dome. Also all of the smoke must strike the dome of the radiator before passing into the chimney. This insures a very small percentage of waste heat. The whole radiator is made of 1/2 inch cold rolled steel.

CASING is made of best 26 gauge Galvanized Iron. Galvanized both inside and out. The casing prevents loss of heat. Is equipped with water pan, cold air duct, one length of smoke pipe with check draft.

DOORS. Both feed door and ash pit door are extra large. Both being equipped with dampers. These large doors make it easy to feed the furnace, also easy to remove the ashes.

FURNACE PIPE AND FITTINGS

OUR COMPLETE LINE OF PIPE, FITTINGS AND REGISTERS embraces many patented improvements in the highest grade of material manufactured. We are in a position to furnish pipe and fittings suitable for making practically any kind of connection used in heating an ordinary building. If you are in doubt as to how you are going to supply heat to a certain room or number of rooms, send us a diagram of the floor plans of your building and let us figure it out for you.

DOUBLE WALL PIPE AND FITTINGS

Our Double Wall Pipe is positively the most efficient type of pipe for conveying warm air to rooms above the first floor of a building. Its structural superiority makes it stronger than other types, affords an opportunity for perfectly tight joints between sections of pipe and insures a minimum amount of heat loss in the walls. Double pipe is endorsed by all insurance underwriters and is recommended by them in preference to single wall pipe. Each section of pipe is equipped with patented slip joints so that a slight push will lock the sections together permanently, thus doing away with the use of solder and thus effecting a

saving in the cost of installation. By the use of this pipe, any length of wall stack, even to the hundredth part of an inch, may be obtained without cutting. This is accomplished by means of the adjustable joint and various lengths in which the pipe is furnished as specified below. One of these adjustable joints should be used on each wall stack so as to obtain any desired length of stack. All our fittings for wall pipe such as boots, stack heads, tees, elbows, etc., as shown below, are also of double construction. This double constructed material is regularly furnished throughout on all our complete warm air heating plants.

DOUBLE CONSTRUCTION SAFETY WALL PIPE

No. 3B-637.

Size Stack	2 in.	4 in.	6 in.	9 in.	12 in.	18 in.	24 in.
4x11	16c	18c	23c	27c	30c	41c	54c
4x13	20c	22c	26c	32c	35c	48c	65c

LENGTH OF PIECE

The air spacing between the inner and outer walls of the pipe serves jointly as a fire protection and heat saver and conforms with insurance laws. The two sizes commonly used are: 4x11 and 4x13. The actual dimensions of these sizes are 3 5/8 x 10 5/8, and 3 5/8 x 12 5/8, respectively on the outside. It is necessary that they be of this width in order to conform with the standard 4 inch studding used in partitions. Four inch studding, when dressed on four sides, is just 3 3/4 inches. Wall stacks may be quickly assembled in any lengths by the use of the various lengths of pipe and adjustable joints.

FIRST FLOOR SINGLE STACK HEAD

For one base-board register on first floor. Of double construction with air spacing between inner and outer walls.

No. 3B-639.

For 8x10 Register.....	\$0.82
For 9x12 Register.....	.92
For 10x12 Register.....	.92
For 10x14 Register.....	1.08
For 12x15 Register.....	1.19

FIRST FLOOR DOUBLE STACK HEAD

For two base-board registers on first floor. This stack head has large warm air capacity so that two registers, one on each side of

partition may be supplied from it.

No. 3B-640.

For 8x10 Register.....	\$0.95
For 9x12 Register.....	1.06
For 10x12 Register.....	1.06
For 10x14 Register.....	1.21
For 12x15 Register.....	1.32

SECOND FLOOR SINGLE STACK HEAD

For one base-board register on second floor. When ordering, be sure to give size of stack. Best stack head for the purpose on the market.

No. 3B-641.

Reg. Size	Stack Size	Price
8x10	4x11	82c
9x12	4x13	92c

SECOND FLOOR DOUBLE STACK HEAD

For two base-board registers on second floor.

No. 3B-642.

Size Reg.	Size Stack	Price
8x10	4x11	\$0.95
9x12	4x13	1.06

SECOND FLOOR REGISTER BOX

For use where floor register is desired on second floor. Connection is made to stack with a stack elbow.

No. 3B-643.

Size Reg.	Size Stack	Price
8x10	4x11	78c
9x12	4x13	82c

SECOND FLOOR REGISTER BOX

For Floor Register. Used where partition on first floor is not located under second floor partition. In this case the register box may be placed directly over wall stack.

No. 3B-643.

Size Reg.	Size Stack	Price
8x10	4x11	67c
9x12	4x13	67c

BOOT FOR WALL STACK

For connecting round warm air pipe in basement to wall stacks leading to second floor. Furnished to fit our regular sizes of wall pipe. For 4x11 stack, use 8 inch collar; for 4x13 stack either 9 inch or 10 inch collar may be used. Collar on boot should be same size as adjustable elbow which connects basement pipe with boot.

No. 3B-644.

For 4x11 Stack.....	65c
For 4x13 Stack.....	68c

BOOT FOR FIRST FLOOR STACK HEADS

No. 3B-645 boot should be used in connection with first floor single stack head, and No. 3B-646 boot should be used with first floor double stack head. No.

3B-646 has larger air capacity so as to accommodate stack head for two registers.

Size Reg. in Stack	Each 3B-645	Size Reg. in Stack	Each 3B-646
Head 8x10	\$0.82	Head 8x10	\$0.95

For 4x13 Stack.....	68c

STACK TEES

Used principally in branching off from vertical stack to two register boxes on second floor.

No. 3B-651.

For 4x11 Stack.....	49c
For 4x13 Stack.....	54c

ALADDIN

REGISTERS AND COLD AIR FACES

Our line of floor registers, wall registers and cold air faces is made up of only the latest improved patterns, finished in either Black Japan or Oxidized Copper. The Black Japanned registers have a smooth black luster finish throughout, baked on, and will last for a great many years. Many, however, prefer the Oxidized Copper finish to match other hardware trimmings.

We can furnish larger or special sizes not listed and will be glad to quote prices on request.

**WOODEN COLD AIR
FACES**

The use of wooden cold air faces is a modern idea and is becoming very popular where the return system is used on heating plants. Made of oak strips $\frac{3}{8}$ of an inch thick by $1\frac{1}{4}$ inches in width, into which cross strips $\frac{3}{8}$ of an inch square are glued in grooves made to receive them. Can be installed so as to be flush

with floor and will match flooring.

FOR THIS SOVEREIGN BOILER

\$29⁹⁵

An Ideal Boiler for Heating a Home of Any Description.
BURNS ANY KIND OF FUEL.

THE BEST HEATING PLANT TO BUY. In considering the best method of heating a home, so many things can be said in favor of steam, hot water or warm air, that it is almost impossible to say which is the best.

A great deal depends on the character of the building, climatic conditions and the uses to which it is put. We have endeavored to make our line so complete that we can satisfy anyone, no matter what system they prefer. We know that each heating plant which we show is as good as can be bought for the purpose for which it is intended. It is not our intention to tell you what heating plant you should use, but we will name you a price on any kind of a heating plant complete ready-cut to install and will guarantee the plant to heat your home to your entire satisfaction.

BURNS ANY KIND OF FUEL. Our "Sovereign" will burn either hard coal, soft coal, coke or wood and give entire satisfaction with any of these. We know that it is the most satisfactory soft coal burner ever put on the market. The reason for this is the large combustion space over the fire, for the mixing of gases, thus insuring a free burning, economical boiler. The fire pot is entirely surrounded by water, thus utilizing all radiating surface.

THE RATINGS. In figuring the radiation to be carried by a boiler, we merely figure the direct radiators, while all the piping mains, risers, flow and return pipes, should be figured as so much radiation, as each one of these have radiating surface. To eliminate, therefore, the trouble of figuring all of this radiation from the pipe, we figure merely the direct radiation, that is the number of square feet in the radiation, and add to these figures from 25 to 50 per cent for the pipe radiation. When asking for an estimate on radiation, always state what kind of fuel you will use, and if you wish rooms heated to more than 70 degrees.

OUR GUARANTEE. Our boilers are guaranteed to give absolute satisfaction when estimated according to figures given above and if installed from an estimate made by us, we guarantee that the plant will maintain an average temperature of 70 degrees Fahrenheit, in the coldest and most severe weather. We also guarantee the boilers to be perfect in material and workmanship and should any castings be found defective, or the boiler otherwise than described by us, you may return it and we will refund full purchase price.

CAST IRON BOILERS FOR HEATING. For home heating, a cast iron boiler is far superior to the steel boiler. While steel boilers are absolutely necessary for high pressure duty, that is in power plants, it does not necessarily follow that they would be best for home heating, where pressure does not exceed five pounds.

We send a blue print showing where the boiler is to be set, where each radiator is to set, where each and every piece of pipe is to go. We show it to the very smallest detail and we know that any man, no matter how limited his knowledge of heating plants may be, cannot possibly say that he does not understand how it is done. And to all of this, we guarantee that the plant, as sent out by us, will heat your home to your entire satisfaction, will be easily installed and perfect in material and workmanship.

DESIGNED ESPECIALLY

FOR HOME HEATING

\$29⁹⁵

Showing Hot Water Heater

LET US MAKE AN ESTIMATE
ON A HEATING PLANT
FOR YOUR HOME

STEAM BOILERS. Our steam boilers as shown and described by us on the preceding page, are the best, **most practical** boilers that we know of, and when we offer them to you, we do so with the full confidence that they will maintain the high standard of quality which we have always maintained in our "Aladdin" Readi-cut Houses.

Steam boilers are furnished complete with all trimmings as shown on the preceding page, and the prices as quoted, include all of these trimmings. We wish to impress upon your mind that these boilers, as well as every other item shown in this catalog, are covered by our binding guarantee and you need feel no hesitancy whatever in ordering any item shown, as we are ready at all times to refund money or replace defective or unsatisfactory items.

HOT WATER BOILERS. The hot water boilers, as shown and described on this page, are made in the same way and are very similar in every respect to the steam boilers shown on the previous page. The process under which these boilers work is absolute, **material and workmanship perfect**, and if figured correctly, one of the boilers will heat any home and do so **economically** and to your entire satisfaction. The hot water boilers are sold without trimmings, as shown on this page. All that is necessary, however, to complete the boiler is a water gauge and the hot water thermometer.

THE STEAM DOME is an important factor in the efficiency of a steam boiler. You can readily understand how important it is to have a dome of ample height to store a sufficient amount of dry steam above the water line, and to supply its rating as called for in the detail given below. This is not only a theory, but an absolute fact, that in order to obtain and maintain an even steam pressure, it is necessary to have a steam dome of ample size to regulate the steam pressure.

the height of your ceilings and mark each room as to what it is, living room, dining room or bed room. We will figure just how much radiation you need, how large a boiler you need, and we will give you a net delivered price on a complete plant with all pipes readi-cut to install.

Bear in mind that we are not offering you sufficient material to put in your own plant, but sell you the material readi-cut and guaranteed to install the furnace to your entire satisfaction.

THE GRATES AND ASH PIT. The ash pit is extra deep and fitted with an anti-clinker triangular grate as per the illustration; these grates being so made as to allow any one grate bar to be removed through the ash pit door without interfering in the least with the other grate bars. This arrangement has been found very convenient in case of grate bars burning out in extremely cold weather. This will not occur with this boiler, only in case of extreme carelessness in allowing clinkers to accumulate in the ash pit or ashes to bank up under the grates.

FIRE POT is so constructed as to give the very best results with the smallest amount of fuel.

TO THE OWNERS OF "ALADDIN" HOMES: We have designed and cut your home in every detail, know that we are in better position to furnish a heating plant which will heat that home to your entire satisfaction, than some one who knows nothing of the detail. Don't fail to get our figures before buying a heating plant.

STEAM AND HOT WATER HEATING (Continued)

ASBESTOS AIR CELL PIPE COVERING

Asbestos air cell pipe covering is used very largely for steam or hot water heating plants. It is an ideal insulator, is 1-in. thick, built up of layers of asbestos paper with small air cells between. The accompanying cut shows very plainly the appearance of a

sectional view of this covering. The pipe covering is light, weighing much less, and at the same time being much more efficient than ordinary moulded covering. It is also very much stronger and more durable and easier to handle than the moulded covering. Comes in sections 3 ft. long.

No. 3A-825

Pipe Size, in. 1/4 3/4 1 1 1/4 1 1/2 2 2 1/2 3 3 1/2 4

WOOL FELT PIPE COVERING

This covering is designed especially and used largely for hot water heating plants. The covering is made of soft corrugated wool felt with inner lining of two layers of asbestos felt and covered with strong canvas.

The construction is such that the moisture from a hot water plant does not affect it as to life or efficiency in any way. We always advise the use of it in connection with hot water pipes. We quote this in sizes up to four inches, but can furnish it in any size up to 8 in. Prices on the larger sizes will be quoted on application.

ASBESTOS CEMENT

Asbestos cement is dry and put up in bags. Is used largely for covering boilers, heating plants, or any other surface, to prevent loss of heat. It is composed of asbestos fibre

and other ingredients, which when mixed with water, makes a regular cement plaster. Will increase the efficiency of the boiler from 20 to 50%. Comes in one hundred pound bags.

No. 2A-829—100 lb. bag. \$1.35

ALADDIN

"ALADDIN" RED CEDAR CHESTS CONTINUED

"SEAL" CEDAR CHEST

\$8.90

Our "Seal" chest is made of $\frac{3}{4}$ in. pure Tennessee red cedar, and is made in two sizes, the smaller being 40 in. long, 18 in. wide and 17 $\frac{1}{2}$ in. deep. The larger one being 45 in. long, 21 in. wide and 21 in. high. Each chest is sent out readi-cut to set up with all trimmings as shown.

The trimmings consist of all genuine copper corners, etc., as shown, with large headed "Colonial" nails for attaching them. Hinges, lid stays, brass lock, all nails

and screws, casters and sufficient filler and varnish for finishing two coats. By comparing our prices, you will readily understand how great a saving you can make by buying an "Aladdin" Readi-cut red cedar chest.

No. 2A-1410—Seal Readi-cut red cedar chest, 40 in. long, 18 in. wide, 17 $\frac{1}{2}$ in. high..... **\$8.90**

No. 2A-1411—Seal Readi-cut red cedar chest, 45 in. long, 21 in. wide, 21 in. high..... **\$12.50**

Our "Martin" readi-cut cedar chest should be seen to be appreciated. Is made as all Aladdin red cedar chests, of $\frac{3}{4}$ in. pure Tennessee red cedar. These chests are moth, mice and dust proof and will last a lifetime. Strict attention has been given to making the proportions such as to utilize all space to the best advantage.

The "Martin" is 38 in. long, 18 $\frac{1}{2}$ in. wide and 16 in. high. Each chest furnished complete with all trimmings as shown in this cut solid copper trimmings, casters, locks, wood filler and varnish. All chests guaranteed to be satisfactory.

No. 2A-1412—Martin readi-cut red cedar chest, 38x18 $\frac{1}{2}$ x16 inches..... **\$9.90**

"MARTIN" CEDAR CHEST

\$9.90

"LYNX" CEDAR CHEST

\$15.35

Our "Lynx" Red Cedar Chest is a massive appearing chest and one of which anyone could be justly proud. The chest is made of $\frac{3}{4}$ in. pure Tennessee red cedar mounted on sanitary feet. Fitted with solid copper trimmings as illustrated and all other hardware needed in the construction, such as lock, casters, lid stays, hinges, and wood filler and varnish for finishing. Has moth proof lid construction. The copper bands are wide and are intended to be studded as shown in the cut, with large headed copper nails, which we furnish.

No. 2A-1413—Lynx readi-cut red cedar chest with all trimmings, as described..... **\$15.35**

No. 2A-1414—Lynx readi-cut red cedar chest without copper trimmings..... **\$12.80**

We will set up, finish and varnish any chest shown in this catalog, for **\$3.50 extra.**

READI-CUT RED CEDAR CHESTS

We read of cedar and its many uses as far back as there is any trace of civilization. The old Egyptian idols were made of cedar. The timbers in King Solomon's temple were cedar of Lebanon. In ancient times, cedar was used as a preservative for valuable parchments; the ancients believed that cedar would make such papers last forever. Chests and strong boxes were lined with it for preserving valuables. In our own country, in the early days, long before cold storage for furs was known, Cedar chests were used

for storing furs. In the Colonial days, every woman had a cedar chest in which to keep her furs, and expensive gowns.

The chest which we offer you, will, if properly put together, last a life time, and preserve its natural color and odor. Aside from their value as a clothes chest, they make a beautiful article of furniture as a window seat for living or bed room. Nothing can surpass a Red Cedar Chest.

Only **\$9.75**

For Our
"BUFFALO"
\$20.00 CHEST

Every part cut
to fit. All parts
Furnished by us.

This Chest is made of pure Red Cedar. Every part cut to length, with exposed ends sanded and finished. The projecting top and bottom are rounded on the edges. Ornamental legs as shown are planed, sanded and glued up, ready to attach with screws which we furnish. With this chest we also send a chest lock with key, a set of roller bearing casters, the ornamental brass straps with nails, to be used in attaching same, also the screws and nails for construction as well as steel corner braces to be used inside the chest as a reinforcement. We also furnish one pint of liquid wood filler and one pint of luster varnish for finishing the chest. Any man who can use a screw driver can set up and finish one of these chests as sent by us, and there is always more or less pleasure in making something of this kind for a friend. The original cost is much less than that of a chest when set up, and this, together with the saving in freight, will make you a big saving by buying a Readi-Cut Red Cedar chest.

No. 2A-975—Readi-Cut Cedar Chest—42 in. long, 20 in. wide, 17 in. high. Each..... **\$9.75**

\$9.25

FOR OUR
"BEAVER"
Red Cedar Chest
AN IDEAL GIFT
for Mother, Wife
or Daughter.

Readi-Cut Red Cedar Chest. This is a very neat pattern Red Cedar Chest, trimmed with copper as shown in the cut. This Red Cedar is moth proof, mouse proof and dust proof, and makes an ideal place for storing furs and woolen clothing, blankets, underwear, hats and plumes, in fact, anything that you value. These chests will retain their natural odor and natural color a life time, and as there is no deterioration, it is hard to tell how long a Red Cedar Chest will last. We furnish the chest complete with all trimmings. All exposed edges are sanded, the legs are glued up, and in addition to this, we furnish a set of roller bearing casters, a chest lock and key, together with the liquid wood filler and varnish for giving the chest a piano finish. Any man can derive a great deal of pleasure by building a Red Cedar chest for wife, sister or mother. The prices which we quote are for the chest complete as described above, Readi-Cut in such a way that any man can put it together. The knock-down feature saving considerable in original cost as well as freight.

Homecraft WALL PAPERS

SAMPLE SHADE BOOK FREE

We show on this page, pictures reproduced in natural colors of three wall papers which are priced and described in our wall paper catalog which we have just received from the printers. In this book we show some carefully selected patterns which are not merely a wall covering but are works of art in home decorations. The prices are very low and the quality of the very best.

Our endeavor has been to select only such patterns as we would like to see in Aladdin homes and we have succeeded to the extent that any paper which we show in our catalog, we would be proud to see in an Aladdin house.

The highest compliment that we can pay to our wall paper and the best recommend that we can give it is to say that any paper shown is good enough for the room for which it is intended in any Aladdin home.

ALADDIN SEMI-SLATE SHINGLES \$4.75 PER SQUARE

SHOWING THE "GEORGIA" ROOFED WITH GREEN SEMI-SLATE SHINGLES
GUARANTEED FOR 15 YEARS

Owing to the ever increasing price of wood shingles and the demand for a fire resisting roofing material, we have found it necessary to add a roofing which we could absolutely guarantee as to wearing and fire resisting qualities. We offer here our "Aladdin" Semi-slate shingles, which when applied have none of the undesirable features of prepared roofing, but have all appearances of a slate or tile roof. There never was a more beautiful or better appearing roofing offered than our "Aladdin" Semi-slate shingles.

The base of this roofing is heavy three-ply long fibre wool felt, thoroughly saturated with Pure Trinidad Asphalt. The surface is natural colored crushed rock worked into the roofing under pressure so thoroughly that in reality it becomes a part of the body of the roof and will never wash off.

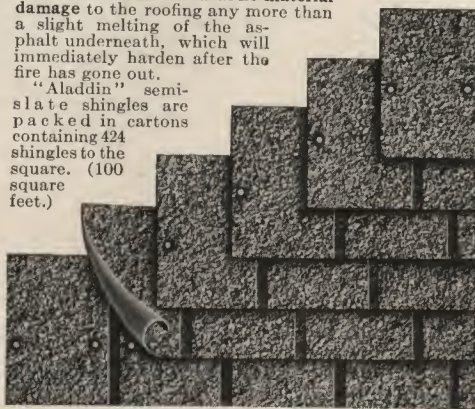

COLORING: We use absolutely no artificial coloring in the rock, but both the colors are natural and therefore will not fade when put on a roof and exposed to the weather. In fact there is more or less dirt and dust in this rock when applied to the roof and when this is washed off the color will be brighter, if anything, than when shingles are applied.

Each shingle is $8 \times 12\frac{3}{4}$ inches. They are applied as follows: For the first course across the roof use $\frac{1}{2}$ of the shingle. For the second use $\frac{3}{4}$ of the shingle and above that use the full shingles. As they are laid 4 inches to the weather, you will readily see that there are three thicknesses of these shingles on every point on your roof. When laid, the roof is approximately $\frac{1}{2}$ inch thick, three coats of long fibre felt, Pure Trinidad Asphalt and slate. A roof which will last as long as the foundation upon which it is applied and a roof that will resist fire, water, acids and alkali. It will not warp, crack or scale

off. When once applied your roofing troubles are over for all time.

As to the fire resisting qualities, upon request we will send you a sample. Take a large live coal from your stove. Lay it on the slate surface of the roofing and let it stand. You will find that the fire will burn out with no material damage to the roofing any more than a slight melting of the asphalt underneath, which will immediately harden after the fire has gone out.

"Aladdin" semi-slate shingles are packed in cartons containing 424 shingles to the square. (100 square feet.)

ALADDIN JUNIOR **\$158** SEMI-SLATE ROOFING PER SQUARE

ALADDIN JUNIOR SEMI-SLATE ROOFING

GUARANTEED FOR 10 YEARS

The best low priced roofing ever offered. In appearance it is very similar to our Semi-Slate roofing described under No. 2A-300.

The body of the roofing is extra heavy long fibre wool felt.

This is saturated with pure asphalt, then covered on the weather side with chipped slate or granite in natural colors. This finely chipped material is firmly imbedded in the heavy coating under tremendous pressure. It is actually rolled in until it becomes a part of the roofing material. The slate and granite being natural colored, guarantees the roofing against losing its color.

SOLD BY THE GOLDEN RULE

We know that in "Aladdin" Junior we offer a better roofing than has ever been sold at a like price before, and back up this claim with a ten year guarantee.

Colors are Red or Green.

State which color you wish. Ask for samples.

CHEAPER THAN SHINGLES—WEARS LIKE TILE—A SAFEGUARD AGAINST FIRE—GUARANTEED FOR 15 YEARS.

There are so many truly commendable things which we could say about our "Aladdin" Semi-Slate Roofing, that it's hard to say them in the amount of space which we have for this roofing. The fundamental principles of all prepared roofing is the quality and weight of the felt used in the construction. Added to this is the quality and texture of the Asphalt used to saturate and preserve this. Then comes the matter of a proper surfacing to assist the combination in withstanding the weather. A great many roofings are sold, which in certain localities and under certain climatic conditions, are perfect. The same roofing used in other localities and under different climatic conditions, will not give satisfaction. Therefore, in making our roofing contract, we looked for and found the manufacturer who was doing a nation wide business, one whom we knew could give us a roofing, guaranteed for use in any climate and under all conditions. We now offer you what we know to be the best Semi-Slate Asphalt Roofing on the market.

The base of the roofing is long fibre wool felt saturated with Pure Trinidad Asphalt and surfaced with a bright colored Crushed Slate, which is firmly embedded into the surface by a patent process. This slate is of a natural color, either red or green and will not fade, but the colors will brighten with age. This roofing needs no painting. When you have it laid, you have a roof which we guarantee to last 15 years, and know that if laid according to our instructions, will last for twice that length of time.

It adds to the beauty of any structure. We wish to impress upon your mind the fact that this is not an article which is cheap in any sense, but a first class heavy weight, clean roofing and one of which we are justly proud.

INSTRUCTIONS. In preparing your roof for this roofing, whether a new or old roof, sweep the roof perfectly clean. Then go over it thoroughly with a hammer. Be sure that no nail heads project, as anything of that kind materially affects the life of the roofing. Lay the first course across the roof as you would a course of shingles. Then cement along the upper edge, using the cement which we furnish (first having nailed the roofing down). Then lay another course, and so on.

OUR GUARANTEE. We guarantee "Aladdin" Semi-Slate Roofing, for 15 years. This guarantee is without restriction, if put on according to our instructions. If you should purchase this roofing, and it should fail to give satisfaction, advise us, giving particulars, and we will forward new roofing without cost to you. Each square contains 108 square feet, packed complete with nails and cement.

2A-300—Semi-Slate Roofing. Dark Red	2A-302—Semi-Slate Roofing. Dark Green
Color. Weight, per sq.,	Color. Weight, per sq.,
70 lbs.; per sq. \$2.25	70 lbs.; per sq. \$2.25

"ALADDIN" RUBBER SURFACED ROOFING

The base of this Rubber Surfaced Roofing is the same as our Semi-Slate Roofing; that is, we use the same long fibre wool felt and the same pure Trinidad Asphalt. With this, however, we have a smooth, rubber surface, which has been so popular for more than a generation. We can heartily recommend this roofing to anyone wishing a first-class, rubber surfaced roofing, and while we cannot claim that it makes an imposing appearing roof as the Semi-Slate, we can say that this roofing is equal in appearance and wearing quality to any rubber surfaced roofing on the market, no matter what the price. That is a broad statement and one which should convince you that the roofing is worthy of your notice. We make this roofing in three different weights. The one-ply, which weighs 35 lbs. to the square, the two-ply, which weighs 45 lbs. to the square, and three-ply, which weighs 55 lbs. to the square.

The same precautions for laying which apply to our Semi-Slate Roofing, also apply to this.

GUARANTEE: Our "Aladdin" Rubber Surfaced Roofing is guaranteed as follows: One-ply for 5 years; two-ply for 10 years; three-ply for 15 years. Put up in rolls containing 108 square feet. Ask for net delivered price.

2A-306—One-ply Rubber-surfaced Roofing,	95c

weight per square 55 lbs. Per square..	

"ALADDIN" MINERAL SURFACED ROOFING

In this, our Mineral Surfaced Roofing, we offer one which is similar in every respect to the "Aladdin" Semi-Slate roofing that is, the body is long fibre wool felt, thoroughly saturated with pure Trinidad asphalt, a combination which in itself will guarantee to the mind of the average man that the roofing is all that we claim for it. The surface has a fine mineral coating which is firmly embedded into the body of the roofing under pressure, and will always remain the same. The roofing is as good as can be made for the money and we feel certain that, should you decide to purchase it, you will be completely satisfied.

We do not offer this in mill ends or short lengths, but in one-piece roll as a first-class roofing and one which will give satisfaction. We back up this argument with a binding guarantee which will convince you that the roofing is all that we claim for it. We guarantee the one-ply for five years, the two-ply for 10 years, and the three-ply for 15 years, and when we make this guarantee we know that the

roofing, if applied according to our instructions, will last a great many years longer. Put up in rolls containing 108 square feet.

PER
SQUARE

"Aladdin" METAL SHINGLES

In our "Aladdin" Metal Shingle we offer an absolute fire proof Metal roof, in such a form as to make it desirable for use on any building no matter how beautiful or expensive. We claim for this all of the long life features of Corrugated Galvanized Roofing, with the added feature of being in such a shape as to make it a desirable roof for a residence or public building of any kind. You will note from the cut that this roof is pressed to give it the appearance of a tile roof. The joints are lock seamed and when fitted together are absolutely water tight.

When the shingles are applied, they may be painted to any desired color, preferably bright green or red and when a roof is applied and finished in this way it would take an expert to tell it from a tile roof. It has all of the long life and beautiful appearance of a tile roof with the additional feature that the weight is such that it does not necessitate the use of extra heavy rafters and roof boards.

\$3.70 PER
SQUARE

We feel certain that if there was a roof of this material in your neighborhood that you could see, you would not hesitate in buying our "Aladdin" Metal Shingles.

We furnish this roofing in painted and galvanized, pressed into shape shown in cut and painted with one coat of red. An additional coat of paint will be required after the shingles are applied. With the galvanized Shingles, we recommend that they be applied and left exposed to the weather for about ten days before being painted, as in this way you will get better results and find that it is easier to apply the paint and make it stay.

"Aladdin" Metal Shingles are fireproof, weather proof, lightning proof and materially to the beauty of your home and are very little more expensive than ordinary wood shingles. They are shipped direct from factory in Central Ohio. Weight 100 lbs. to square.

METAL ROOFING AND SIDING

THE STRONGEST AND MOST SERVICEABLE ROOF COVERING

For economy and durability, there is nothing to compare with metal as a roof covering, siding or ceiling material. There are a great many features of metal covering which prove its superiority over other forms of roofing. Chief among these are its wearing qualities, economy in laying, economy in price and its fire and lightning proof qualities.

WEARING QUALITIES. Metal roof covering has been in use for over a century, and during that time has proved definitely that it will wear longer than any form of roofing. Nearly all large factories are roofed with metal.

ECONOMY IN LAYING. It does not require an experienced man, as any ordinary mechanic can lay from 10 to 14 squares in a day. No tools are required excepting a hammer.

ECONOMY IN PRICE. A metal roof can be laid with less roof boards than any other roof, and the original cost is less than good shingles and but slightly more than prepared roofing, which will not last half as long.

FIRE AND LIGHTNING PROOF. Many fires originate each year from shingled roofs. A building covered with a metal roof has never been known to have been damaged by lightning.

\$2.05 PER SQUARE CORRUGATED ROOFING

Corrugated roofing is absolutely the strongest and most serviceable form of metal roofing to buy, as every corrugation serves to strengthen the sheet and air space thus formed underneath the roof when laid, serves to lengthen the life of the roof. We furnish the corrugated roofing in two kinds. The painted which is plain sheets with two coats of red roof paint, and the galvanized or **Rust Proof.** We always recommend the use of Galvanized Roofing where a permanent roofing is required, as properly laid, it will last for 50 years; these figures being based on 28 Gauge roofing and not the light weight roofing sold so generally of late years.

We furnish either of these forms of roofing with $1\frac{1}{4}$ inch or $2\frac{1}{2}$ inch corrugations as per prices quoted below.

All prices quoted are per square of 100 Square feet, furnished in lengths of 5-6-7-8-9-10 and 12 ft.

ORNAMENTAL METAL CEILINGS

USUAL PRICE \$6.00 Per Square

OUR PRICE \$3.75 Per Square

Ceiling Design 7640

ORNAMENTAL METAL CEILING has become very popular during the past few years for many reasons. They are easy to apply, will last a life time, are fire and dust proof, do away with the expense of repair and eliminate the danger of falling plaster. A metal ceiling is easily applied and does not require the services of an experienced mechanic.

For the design shown above and similar designs, it is necessary to use furring strips. Furring strips are nailed directly to the ceiling joists, leveled up, that is, wedged out where necessary to make it perfectly level, and as each sheet of our metal ceiling has a beaded edge, it is impossible for any one to go wrong, in applying it.

We Show here only one design, but upon request, will send large cuts of many other designs from which to make your choice. If you will send us a diagram of the rooms on which you wish to use this ceiling, and

give us exact dimensions, showing all off-sets, we will quote you delivered prices on sufficient material to cover the room. We give the prices below on ornamental metal ceiling for the different sized rooms. You will note that the price on the ceiling decreases for the larger rooms.

These prices do not include furring strips. These should be $\frac{3}{4}$ by $1\frac{1}{4}$ inches. These may be purchased at your local lumber yard or we will furnish them at an additional cost of 60 cents per one hundred feet. It requires about one hundred feet of furring for each square of ceiling.

No. 2A-450—For a room 10x16 ft.	
Net Price	\$7.60
No. 2A-452—For a room 14x20 ft.	
Net Price	\$12.10
No. 2A-454—For a room 18x40 ft.	
Net Price	\$28.10

\$2.40 Per Square Ornamental Metal Ceiling

Ceiling Design 2252

A CONTINUOUS PATTERN Ornamental Ceiling which has all the features of our high-priced ceiling with the added advantage of being much lower in price. With this ceiling it is not necessary to use furring strips as it may be applied directly onto the joists or put on over an old plaster ceiling. It is however, preferable to use furring strips with any metal ceiling.

This pattern is also used extensively as a side wall. We can furnish a wainscoting and chair rail to go with these, thus giving a perfect siding. The sheets are 24 inches wide and 96 inches long, have a beaded joint and make a very neat appearance when applied. It is painted with one coat of gray. All that is needed is a finish coat of any desired color, this to be put on after the ceiling is applied.

The prices quoted are per 100 square feet and do not include furring strips, nails or border strips. In sending orders for this design, it is not necessary to send sketch, merely give size of the room or number of squares required.

No. 2A-456—Ceiling Design, No. 2252,

per square \$2.40

4c Per Foot BORDER STRIPS

Border No. 2280

These Border Strips may be used with Ceiling Design No. 2252 but it is not essential, although it helps to give a finished appearance to the room by breaking the joint between the ceiling and side walls. It is of the Egg and Dart design and makes a very neat appearance. It extends $3\frac{1}{2}$ inches on to the ceiling and 4 inches down on the side walls. Furnished in any desired quantity.

No. 2A-458—Border No. 2280

"ALADDIN" PLASTER BOARD

\$1.80 PER SQUARE

NOT A SUBSTITUTE FOR PLASTER BUT AN IMPROVED PRACTICAL FORM IN WHICH TO USE PLASTER.

We do not claim that our "Aladdin" plaster board is a substitute for plaster. We claim much more, however. We claim that it is a practical, improved form in which to use plaster. The construction is as shown in the cut at the lower left hand corner; that is four layers of heavy felt paper and three layers of hard white plaster. We claim for this construction many advantages over old time-honored plaster. It is as near fire proof as plaster can be made. It is sound proof and is 30 per cent warmer than ordinary plaster. Can be put on in any kind of weather and the big feature is the economy in applying.

FIRE PROOF.—By actual test "Aladdin" plaster board has withstood 1700 degrees of heat, applied to the center of a sheet of the board. The peculiar construction, that is the pressure under which the board is placed in the making, drives the plaster into the fiber of the paper, thus making it a part of the plaster and at the same time, giving it its fire resisting qualities.

SOUND PROOF. To ordinary plaster, which is considered a non-conductor of sound, we add four layers of heavy felt paper, which in itself is also a non-conductor of sound. (Heavy felt paper being used all over the world as deadening felt.) Thus in the combination of these two non-conductors of sound, we claim to have a sound proof plaster board.

WARMER. In building a home, you naturally in thinking of something to make it warm, use a layer of paper on your boxing, which is correct. With our "Aladdin" plaster board we give you four layers of paper around each room. By actual test a house lined with "Aladdin" plaster board requires 18 per cent. less fuel than the same house in which lath and plaster have been used. We have letters from satisfied customers in nearly every state, who have used our plaster board, all of whom seem to be more than pleased, and we can, therefore, say that it gives universal satisfaction. Being a non-conductor of heat, we claim that our plaster board will keep your house warmer in winter and cooler in summer than any other form of plaster.

Showing method of applying "Aladdin" Plaster Board

EASY TO APPLY. The greatest feature of this plaster board is the ease in which it can be applied. The sheets are 32x36 inches. Can be used on **studding placed 16 or 18 inches apart** and is nailed directly to the studding. For nailing, use 1 1/4 inch nails with large heads. Space the sheets of plaster board 1/4-inch apart and space the nails from 4 to 6 inches apart. Use a common hand saw to cut the sheets where necessary.

AFTER YOU HAVE COVERED the room with the board in this way, use our plasto-filler for filling in the space between the sheets of plaster board. Or better still, put a putty coat or hard plaster finish directly on the plaster board. In either case you can paint, kalsomine or use wall paper on the walls. We show at the bottom of the page, a room in one of our "Aladdin" houses finished with wall paper over "Aladdin" plaster board.

ALADDIN

“ALADDIN” QUALITY DOORS

BEAUTIFUL OREGON PINE DOORS

PENNSYLVANIA

The most beautiful, and at the same time, the most durable door on the market. Made from clear Oregon Pine, having all the lasting qualities of Michigan Pine and the beautiful grain of Yellow Pine.

We handle nothing but strictly No. 1 doors, and in this follow out our principle of using the name “Aladdin” only on articles we can stand back of in every way.

Could we but have one of these doors in your locality, where you could see it, we know that you would buy it in preference to any other door on the market.

The construction of the door is of the very best. The stiles and rails are made of slashed grain Clear Oregon Pine. The panels are veneered with rotary cut Oregon Pine. We claim that our price on this door is absolutely the lowest ever offered on a door which could in any way compare with this. In order that you may see the beautiful grain which this wood has and the finish which it will take, we will, upon request, send you a sample of the panel, stained and finished, and at the same time, tell you how to finish the door to get the best effect.

At the bottom of this page we show our bungalow front doors, which can be used in connection with this to get the most artistic results. Furnished in 1 3/4 inches thick only.

2A-1587—INDIANA

OUR “INDIANA” FRONT DOOR

These front doors are all made from clear Oregon Pine, beautifully veneered, and when finished, make a better appearance than any door on the market. We furnish these doors glazed with either double strength or plain plate glass, at prices quoted below. It would be impossible to make cuts which would show these doors as beautiful as they appear when put up and finished.

OUR “ILLINOIS” FRONT DOOR

Oregon Pine, from which these doors are made, will last longer than any wood of the Pine family, has a more beautiful grain than Yellow Pine and takes any finish as well as oak. They are put out under our binding guarantee of satisfaction assured or money refunded.

Ask for sample panel, showing the wood when finished, and instructions how to obtain this finish.

TENNESSEE

IF YOU WANT
THE BEST
IN BUILDING
MATERIALS,
BUY ALADDIN
QUALITY

This beautiful two-panel door is made entirely of clear Oregon Pine, with edge grain stiles and rails, and rotary cut veneered panels. The appearance of the door could not be improved upon in any way. The proportions are exactly right, to make a rich, massive appearance.

In connection with this, will say, that these doors are being used in some of the most expensive and artistically appointed homes which have been built in the east this year, while the price is no higher than many common "B" grade doors offered so generally today.

They all bear the "Aladdin" quality brand, and are absolutely guaranteed.

Prices quoted are for doors, 1 3/4 inches thick.

"ALADDIN" RED CEDAR CHESTS

**READI-CUT
KNOCKED DOWN
OR SET UP**

OUR "FOX" RED CEDAR CHEST

This chest is like all "Aladdin" red cedar chests, sent out readi-cut in such a way that anyone can set it up. It is one of the best proportioned chests which we have, and the ornamental feet add greatly to the appearance of the chest. The general dimensions are such as to make a well proportioned and very convenient chest, same being 43 in. long, 18½ in. wide by 18 in. high; height, including casters. It is trimmed throughout with genuine copper, and each chest is equipped with a brass lock, set of casters, lid stay, hinges and cedar handles. The trimmings furnished are exactly as shown in our catalog, ready to be applied.

We furnish with each chest, sufficient liquid wood filler and varnish for two coats. Every cedar chest furnished by us is sent out under our binding guarantee of satisfaction assured or money returned.

No. 4A-1402—"Aladdin" readi-cut Red Cedar chest, as described..... **\$10.35**

OUR "ERMINE" RED CEDAR CHEST

This chest is of a most convenient size, being 39 in. long, 18 in. wide and 17 in. high. The height given being over all when casters are attached. It is trimmed throughout in genuine copper and each chest is sent out complete with brass locks, casters, lid stay, hinges, sufficient nails and screws for setting up the chest, also liquid wood filler and varnish sufficient for two coats.

They are shipped in the knock down, and every piece is readi-cut, and any person can set them up.

The handles are cedar.

No. 4A-1400—Red Cedar readi-cut chest, as described

\$8.65

OUR "WOLF" RED CEDAR CHEST

A most attractive Tennessee red Cedar chest is shown in this number. This has probably been the biggest selling pattern of cedar chests ever offered. The chest is 45 inches long, 22 inches wide and 21 inches high. Is an exceptionally large and extremely attractive chest. It is trimmed in genuine copper as shown in the cut. With each chest, we furnish a brass lock and escutcheon, and lid stay, all hinges, casters, in fact all trimmings as shown. In addition to this, we furnish sufficient liquid wood filler and varnish for a two coat finish.

Any chest shown on this page furnished set up with all trimmings on and finished with three coats of varnish \$2.50 extra.

No. 4A-1404—Readi-cut Red Cedar chest, as described **\$13.25**

These chests as sent out by us are all ready to be set up, and so simple is the operation that any ordinary workman can set them up in a very short space of time. In comparing prices, do not fail to take into consideration that the freight on the chest when knocked down, is less than half the freight on the same chest if set up, and shipped in that way.

"ALADDIN" MOSAIC FLOOR TILE

An Ideal Flooring Material for Bathrooms, Kitchens and Store Buildings

EASY TO LAY. Few people realize how easy it is to lay a Mosaic tile floor. It is, however, very simple, and a tile floor, when once laid over a cement foundation, is practically indestructible. For a bathroom, vestibule, store building or kitchen, a tile floor is not only the best, but the cheapest floor you can buy. It will last a life time, is easily cleaned, and for its cleanliness, is a very desirable floor for a drug or confectionary store or a bank, and as a bathroom or kitchen floor, is a delight to any housewife. Send us a diagram of your room, and let us quote you net delivered price on sufficient tile to cover it.

DIRECTIONS FOR LAYING. Make allowance of about three inches below floor level for a tile floor. This allows about $2\frac{1}{2}$ inches for concrete. (Composed of one part cement, two parts

sand and two parts gravel) well mixed with water. Allow this to set. Next comes the float, consisting of equal parts of cement and sand. Take a board of proper thickness, which when laid upon your concrete base, will be level with the top of the floor. Lay this strip across the room about two feet from wall and fill with the float. Then lay a strip of tile across the room (paper side up), and pound with a block and hammer until the mortar is visible in the joints, between this. Then move your strip over and lay another course of tile, and so on. When finished, remove paper by wetting thoroughly and peeling it off slowly. Sprinkle tile with white sand and beat it down. Allow to set for two hours, then mix a grouting of pure cement and water (add lamp black for coloring if desired), fill joints with this and wipe off surplus with a damp soft cloth.

No. 2A-838—Red and white or black and white, Mosaic floor tile, per square foot **19c**

No. 2A-840—Blue and white Mosaic floor tile, per square foot **22c**

No. 2A-842—Red and white or black and white, Mosaic floor tile, per square foot **19c**

No. 2A-844—Blue, and white Mosaic floor tile, per square foot..... **22c**

No. 2A-846—Red and white or black and white Mosaic floor tile, per sq. ft..... **19c**

No. 2A-848 — Blue and white Mosaic floor tile, per square foot..... **22c**

No. 2A-849—Plain White Hexagon Tile, which is used largely for small bathrooms, vestibules, etc., can also be furnished by us at the net price of 18c per square foot. Shipped from our factory in Chicago.

EXPANDED METAL LATH FOR FIRE PROOF BUILDINGS, STUCCO WORK, OR INTERIOR WORK TO REPLACE WOOD LATH.

Metal lath has become so popular in the last few years, that it hardly needs describing. The principal features being that it is fire proof, holds plaster better than wood, will not swell when wet, consequently cause cracks in plaster when dry. For interior work it is fastened directly to the studding with one inch staples. For exterior or Stucco Work, it is applied over furring strips (common lath), nailed to the sheathing or boxing, thus allowing the plaster to cover or clinch on the under side of the lath. Comes in sheets 24 inches wide, 96 inches long.

Prices on plain un-painted lath:

No. 2A-850—27 gauge, weight per square yard, $2\frac{1}{4}$ lbs.	Price, per square yard.....11 $\frac{3}{4}$ c
No. 2A-851—26 gauge, weight per square yard, $2\frac{1}{2}$ lbs.	Price, per square yard.....13c
No. 2A-852—25 gauge, weight per square yard, 3 lbs.	Price, per square yard.....14c
No. 2A-853—24 gauge, weight per square yard, $3\frac{1}{2}$ lbs.	Price, per square yard.....15 $\frac{1}{4}$ c

For painted, add $\frac{1}{4}$ c per square yard. For galvanized, add 10c per square yard.

ALADDIN

"ALADDIN" CONCRETE BLOCK MACHINE

FOR MAKING BUILDING AND FOUNDATION BLOCKS

THREE SIZES—8x8x16 IN., 8x10x16 IN. AND 8x12x16 IN.

EASY TO OPERATE. NO EXPERIENCE NECESSARY.

\$12.75 FOR THIS OUTFIT

THE CONCRETE BLOCK MACHINE illustrated here is without question one of the biggest bargains ever offered to the trade in a machine that will make a standard size block either in a single or a double core on the face down principle. We are able to make you this remarkably low price because of our buying in large quantities and giving our customers the benefit. Anyone contemplating building houses, whether of wood or of concrete, will find this machine very practical and just what is needed. Because the initial cost is so small, it will pay for itself out of the first 200 blocks made. It is a practical machine for carpenters, stone masons and brick layers. It makes an excellent utility machine for block plants. It can be furnished in three sizes—8 in. by 8 in. by 16 in., 8 in. by 10 in. by 16 in., and 8 in. by 12 in. by 16 in. single or double core.

CONSTRUCTION. The "Aladdin" face down block machine is made entirely of the best grade of gray iron castings. The moulds are closely fitted, and are of simple construction. All parts are made interchangeable and the face plate is of very deep cut design. A special eccentric latch is used for locking the mould securely. The stand is rigidly supported and made to carry the mould with the material and to stand for severe tamping. We guarantee this machine to make a perfectly true block.

ATTACHMENTS. A number of different attachments can be furnished at a nominal extra charge, for the "Aladdin" block machine, and we illustrate a few of these below. These attachments are very readily and easily placed in the machine. A flask attachment takes the place of the mould as shown in complete machine. A four inch course attachment takes the place of face plates and end doors. An angle bay window takes the place of face plate and one end door and a circle bay window takes the place of face plate and two end doors. All attachments are arranged so as to make the block face down, which permits you to use special coloring or a rich mixture for face block with a lean mixture for the balance of block. We make a very nominal extra charge for these attachments.

FACE PLATES. We can furnish a number of different designs of face plates at a very nominal extra charge. These face plates include broken ashlers of four different designs, whirlwind scroll, rope, cobblestone, tooled margin rock, tooled margin bush-hammer, tooled face, panel, plain and water table plate. All these plates are of correct design and make an excellent addition with the regular outfit and will give you an ample assortment of different styles of blocks.

REGULAR OUTFIT. The regular outfit shipped with "Aladdin" face down block machine consists of one rock face plate for whole blocks, one rock face plate for one-half and two one-quarter size blocks, one interchangeable rock plate, one pair of core end plates, one pair of dividing plates for fractional size blocks, one steel striker, one pair of joist block plates, one double end tamper, one sample wood pallet, one gable block dividing plate and necessary plugs for making

Extra flask attachment, furnished in single or double core, 8x8x16, 8x10x16, or 8x12x16.

Four inch course attachment, furnished rock panel and plain design.

whole blocks. This outfit will make all blocks necessary in an ordinary building. When ordering, specify the style of machine wanted. We ship double core unless otherwise specified.

Shipped direct from factory in Central Wisconsin.

Angle bay window attachment, rock design.

Circle bay window attachment, rock and panel design.

"ALADDIN" HAND AND POWER BATCH MIXER

A PRACTICAL MIXING MACHINE FOR SMALL JOBS. FASTER THAN HAND MIXING AND GIVES A MORE UNIFORM AND RELIABLE MIXER.

The "Aladdin" Batch Mixer is designed to fill the demand for a low price machine that can be used on small jobs by carpenters, stone masons, brick layers, and also by those contemplating putting up their own buildings. The machine is also designed for efficiency in its operation and also as to thoroughness of its mixing qualities. Nothing has ever been offered that will equal this machine for its speed in mixing, its ease of operation and its extremely low price. We are only able to make this price because of our excellent connection and purchasing this machine in large quantities. No carpenter, brick layer or stone mason can afford to be without one of these machines. He cannot purchase the lumber to build the box and buy the necessary hoes, shovels, etc., that are required for mixing of concrete, any cheaper than he can buy this machine. It is a well known fact that machine mixed materials are more uniform in color and in the quality of the mixture. Machine mixing is faster than mixing in the ordinary box. The machine is always ready for operation, requires no attention or care other than cleaning when through, and will always be found on the job. It is light and can be very readily ported around. It can be taken into buildings and can be used on small jobs and repair work.

CONSTRUCTION. In making the extremely low price on this mixing machine, the manufacturers have not stinted in workmanship or material. This machine is made of the very best grade of gray iron castings and steel. The drum has two cast iron heads, which carry the bearings and are held to the steel shell of the drum by means of four heavy rods, running the length of the drum. The door of the drum is of heavy sheet steel, properly re-enforced, and swings on three heavy hinges. The latch which holds the door is very easily operated. By a turn, either one direction or the other, it can be released and the door drawn back. A catch is provided on one of the rods, which is intended to hold the door when dumping the material. There are no paddles to get out of order or clog up and make the machine useless. The shell is of heavy steel and is rolled to a triangular shape, as noted in the illustration. This shape produces a correct mixture and turns the material over three times at every revolution of the drum. The machine is back geared four to one, making the turning very easy. The stand is made of steel angles, thoroughly re-enforced and braced, making a substantial outfit all the way through. A wheelbarrow can be run underneath the machine to receive the load. Ample space is provided for standard types of wheelbarrows, and deflectors are arranged on the drum ends so that the material is discharged directly into the wheelbarrow without spilling any concrete.

CAPACITY. The capacity of the "Aladdin" Hand Batch Mixer is three feet of loose material. This machine has a remarkable capacity for its size when you compare it with advertised large type machines, which claim no greater capacity. However, this is entirely due to the mixing principle of the triangular shaped drum. It is not well to overload the machine. The rated capacity produces the best results and the fastest mixing.

OPERATION. If you are using a mixture one, two and four, place in the coarse material first, then the finer grade material and last the cement. When placing in the cement, distribute it over the length of the drum. Place the amount of water necessary into the machine. Close the door of the machine, which operation is fast on account of the link arrangement and one lever control. The mixture is now ready to be turned, and by turning the drum from ten to fifteen revolutions, you will have a batch that is thoroughly mixed. The amount of water depends largely on the work at hand. When dumping, push the lever to one side and throw the door back to catch on rod. Turn the machine and dump directly into the wheelbarrow.

POWER ATTACHMENT. We can provide a power attachment for the "Aladdin" machine at a very nominal extra expense, having a very simple power attachment, which can be attached to the stand of the machine and is properly back geared so as to give the correct number of turns of the mixing drum. This attachment has two bearings, which are bolted to the stand of the machine. The pulleys turn on the cold rolled steel shaft. A sprocket wheel is bolted on to the pinion where the handle is attached, using cap screws, and this sprocket is driven from a small sprocket, which is cast with the pulley. A loose pulley is also provided so that the drum can be stopped without necessarily shutting off the power. This outfit is easily attached, always shipped separate from the machine. Complete with shaft, pulleys, sprocket and chain.

HARDWARE FOR YOUR BARN

**THIS \$5
Carrier
for
\$3.50**

HAY CARRIERS. A high grade malleable Iron Carrier. Made with a large mouth, the fork pulley has a swivel clevis. When taking the load in from the center of barn, all that is necessary to work either way, is to take the pulley from one end of the barn and change to the other. It saves the annoyances and time of unstringing any pulleys. The locking device is extremely simple, having only two pieces. Weight, 30 pounds.
2A-800—Hay carrier for wood track, complete with stop, and fork pulley, each..... **\$3.50**
2A-802—Hay carrier for steel track, complete with stop and fork pulley, each..... **\$3.50**

HAY FORKS
2A-804—Regular double harpoon hay fork. Tines, 25 in. long, 16 in. apart; weight, 17 pounds, each **85c**
2A-806—Long time double harpoon hay fork. Tines, 31 in. long, 16 in. apart; weight, 22 pounds. Each..... **95c**

RAFTER BRACKETS

Rafter Brackets for either wood or steel hay carrier track.
2A-808— **2c**
Each.....

WOOD TRACK HANGING HOOKS
These hooks to be used with wood track, are made of 1/2-inch round iron and were 14 in. long before being bent, 2 in. shorter after bending.
2A-810— **5c**
Each.....

DOUBLE ANGLE STEEL TRACK

The strongest and most durable hay car track on the market. The arrangement is such that full weight of car is over the angle at all times. Furnished complete with couplings; in 5 or 10-ft. lengths.
2A-812—Double hay carrier track, foot..... **9c**

STEEL TRACK HANGING HOOKS
These hooks are for our double angle steel track. Are made of 1/2-in. iron. Complete with clamps.
2A-814—Hanging hooks, each.... **6c**

SWIVEL HOOK
For any size rope up to 1-inch. Saves cutting or tying knots. Is a time saver for any man.
2A-816 **15c**
Each.....

KNOT PASSING PULLEY
Large yoke made of iron, with hard maple sheave, 6 inches in diameter.
2A-818 **18c**
Each.....

STEEL YOKE PULLEY
Small yoke steel pulley with 6-inch wood sheave and 3/4-inch loose bushing.
2A-820 **16c**
Each.....

FLOOR HOOK
Used in floor or at the ends of barn to hold pulleys, made of 3/4 in. round iron with a gimlet point.
2A-822 **6c**
Each.....

ENCLOSED BARN DOOR HANGER

The most practical barn door track on the market. Wheels are ball bearing and run inside the track which is made of one piece of heavy steel open at the bottom. No chance for wheels to bind or jump the track. No chance for birds to build nests to interfere with working rollers. No need of a water table or shed above the track. Set consists of one pair of rollers, two end and one center hangers for track.

2A-824—Per set complete, less track **\$1.35**
2A-826—Track for above less brackets, per ft..... **11c**
2A-828—Extra brackets (should be spaced about 3 ft. apart), each..... **11c**

BARN DOOR ROLLER

An all steel barn door hanger. Made with steel roller bearings. The steel axle having shouldered ends, allows a free and easy movement of the wheel and rollers. The groove in the wheel is not cored but machine turned, so that the wheel runs perfectly true. For a low priced hanger, nothing is made to equal this one.
No. 2A-830—With 3 1/2 inch wheels, per pair.. **37c**
No. 2A-832—With 4 inch wheels, per pair..... **42c**

No. 2A-834—Barn door track for above rollers, size 3/16-inch, heavy enough for ordinary doors. In lengths of 4, 6, 8 and 10 feet; per ft..... **34c**

ROPE—PURE MANILLA

2A-836—Pure Manilla Rope. We guarantee our rope to be made of strictly pure long fibre manilla. We furnish this, as we know it will last longer and give more universal satisfaction than any other. For our hay carriers you may use either 3/4 inch, 7/8 inch or 1 inch for rain rope and 3/4 inch for trip rope. These prices are low, and we reserve the right to make changes when market conditions make it necessary.

"ALADDIN" WHITE FIBRE SHEATHING

A tough light gray long fibre building paper, used extensively for lining buildings between the sheathing and weather board siding, also for underneath carpets. This paper is slightly corrugated and is an exceptionally fine building paper. Put up in rolls of 450 square feet and weighing practically 30 lbs.

No. 2A-1718.
Per roll ... **45c**

ALADDIN

"ALADDIN" DISAPPEARING STAIRWAY

AN ATTIC OR
BUNGALOW
STAIRWAY THAT
ABSOLUTELY
DISAPPEARS.

The distance from front edge of stair horse to landing, when stairs is down on floor.

8 ft. ceiling is 6 ft. 6 in.
8½ ft. ceiling is 6 ft. 11 in.
9 ft. ceiling is 7 ft. 3 in.
10 ft. ceiling is 8 ft. 0 in.

HOW TO UTILIZE WASTE SPACE: When arranging floor space it is often found that a stairway will take up too much space, this being more especially so in bungalows, or for attic stairs in two-story homes. The "Aladdin" stairway was designed to enable the builder to provide a maximum number of square feet of floor space with a maximum of convenience and efficiency. The stairway consists of a strong well built flight of stairs, which is attached to the end trimming in the ceiling. It is quickly and easily attached and its advantages are apparent to anyone.

OUT OF THE WAY—When the stairway is not needed, it is compactly folded up in the ceiling. There is nothing visible but a neat panel, finished to match the rest of the woodwork of the room. It is ready for use at a moment's notice, but still gives you full use of all the room. When needed, a slight pull on a chain provided for that purpose, will bring the stairway down complete with hand rail ready for immediate use. It is down to stay until no longer desired or needed, when it can be quickly put out of sight, with but slight impulse on the part of the operator.

\$35.⁵⁰

For Stairway
Complete.
Anyone can
install it.

EASY TO OPERATE. When stairs are not in use, they are rolled half way up on the panel (they work on rollers.) A very slight push is all that is required. A spring barrel concealed under the landing does the work. When the stairs is thus pushed up on the panel, our system of counter balance does the rest; that is, swings it up into the ceiling. A child can operate it.

THE MOST WONDERFUL THING ABOUT this stair is its simplicity. As before stated, absolutely all that is in sight when the stair is not in use, is a neat panel in the ceiling, which can be finished in harmony with the balance of the woodwork.

SOME OF ITS USES: The "Aladdin" stairway can be used in any structure, for lofts in homes and tenement buildings, in stores and office buildings; in bungalows, summer cottages, to roof gardens, etc.; to replace hatchways in yachts, launches and steamships; in fact, in any kind of a structure on land or sea.

The large cut at top of page shows the stairs let down for use. The second cut shows the stairs shoved up on the panel. The counterbalance now swing it into place as shown in cut at bottom of the page.

Stairway when not in Use.

Panel in Ceiling—looking up.

Place opening for stairs so that the end of stair horse, when raised in the attic, will clear ceiling or rafters. Measurements from landing to end of stair horse, when raised to close, is 5 ft. 5 in. for an 8 ft. ceiling, and 6 ft. 8 in. for a 10 ft. ceiling.

FULLY GUARANTEED

The stairway is shipped with the panel in the white. The stairs is stained and waxed and is fully and unconditionally guaranteed to give satisfaction, when properly installed, and if

found otherwise than described by us, they may be returned and we will refund full purchase price. Furnished in yellow pine with a panel of either yellow pine or oak.

2A-931, COMPLETE OUTFIT \$12.55

ALADDIN READI-COLORED LEAD

COSTS LESS THAN READY MIXED PAINT

SPREADS FARTHER THAN ANY PAINT

IT is generally known by the paint-using public that lead and oil make the very best paint obtainable. However, the trouble has always been when wanting a colored paint, it has been impossible to mix the dry colors with the lead by hand, and get a paint which would be even in color. We have overcome this in our "Aladdin" Read-Color lead. The color, being ground with the pigment by machinery, assures an even color throughout, and we can truthfully say regarding this, that it is paint-perfection for exterior and interior use. Put up, net weight, in 100-lb. kegs; 25, 12½ and 5-lb. cans.

"Aladdin" Read-Color Lead is ground to extreme fineness and is absolutely uniform. It works easily under the brush and will cover a maximum amount of surface. It is not affected by gases or other destroying fumes. It is the best paint in paste form, on the market. It is ground in pure linseed oil to the consistency of white lead and is ready for use after being thinned with pure raw linseed oil in accordance with our directions.

"Aladdin" Read-Color Lead has always been a favorite and always produces satisfactory results.

"Aladdin" Read-Color Lead is not a new or untried paint, nor one of which the consuming public is in doubt. A generation ago, it had won its way to the top of the list and many consumers will use nothing else for outside or inside work.

"Aladdin" Read-Color Lead is made in pure White, Black and twenty-four other shades. Sample cards sent free on request.

COST COMPARED WITH READY MIXED PAINT.

One hundred pounds of "Aladdin" Read-Color lead, \$7.00, six gallons pure raw linseed oil, \$3.00. One hundred pounds of "Aladdin" Read-Color Lead thinned with six gallons of oil for finishing coat, will make 9½ gallons of paint which will cover, on any ordinary surface, 350 square feet, or a total of 3,325 square feet, at a cost of \$1.12 per gallon. Ready mixed paint at the same price will cover 250 square feet per gallon, therefore will cost you 20 per cent more.

QUALITY COMPARED WITH READY MIXED PAINT

"Aladdin" Read-Color Lead is ground in with oil and pigments in a way which makes the paint more dense than is possible with lead and oil mixed by hand. The result is that "Aladdin" Read-Color lead takes a greater per centage of oil, is more economical, covers more surface and out-lasts ready mixed paint by at least 50 per cent.

"Aladdin" Read-Color Lead is always absolutely uniform in shade and no time is lost in matching colors.

DIRECTIONS FOR USING.

Taking a 100-lb. package of "Aladdin" Read-Color Lead as a base, and to reduce with other ingredients as listed below. Reduce the smaller packages in proportion.

For Outside New Work—Bare Wood—Two Coats.

Priming Coat—Reduce in the following proportion: 100 pounds "Aladdin" Read-Color Lead, 6 gallons pure raw linseed oil, ¼ gallon spirits of turpentine, ¼ gallon turpentine Japan dryer. Putty between the priming and finishing coats.

Finishing Coat—Reduce in the following proportions: 100 pounds Read-Color Lead, 5 gallons pure raw linseed oil, ¼ gallon turpentine Japan dryer, or 100 pounds "Aladdin" Read-Color Lead, 5½ gallons pure boiled linseed oil.

For Outside Old Work—Two Coats.

First Coat—Reduce in the following proportions: 100 pounds "Aladdin" Read-Color Lead, 5 gallons pure, raw linseed oil, ½ gallon spirits of turpentine, ¼ gallon turpentine dryer. Putty between first and finishing coats.

Second or Finishing Coat—Reduce in the following proportions: 100 pounds "Aladdin" Read-Color Lead, 5 gallons pure raw linseed oil, ¼ gallon turpentine Japan, or 100 pounds "Aladdin" Read-Color Lead, 5½ gallons pure boiled linseed oil.

OUR GUARANTEE

The "Aladdin" Guarantee. We guarantee "Aladdin" paints and finishes to cover more surface and wear longer than any other paint or finish on the market, at the same price, if applied according to our directions. If found otherwise, we will replace free of all charge to you.

“ALADDIN” READI-MIXED BARN PAINT

Guaranteed to be Absolutely Pure

PRESERVE YOUR BARNs and large structures of all kinds. Paint is cheaper than lumber. The best barn paint sold for the price. Put up in the following sizes.

“Aladdin” Barn Paint is for barns and large structures on which a first class barn paint should be used. It is made with special reference to durability, appearance and preserving qualities. The same care and process are used in its manufacture as in making our house paint. Dry pigments

and oil cannot be mixed by hand and make a lasting and protecting paint. Power is absolutely necessary to combine the pigments and the oil. This we accomplish by machinery, thus thoroughly driving the oil into the pigments. Where dry pigments and oil are mixed by hand, only the outside particles of the pigment are caught with oil. When this paint is applied to the surface, the absorption on one side and the atmospheric action on the other soon draw the oil away from the pigments and destroy it. This leaves the dry pigment without a binder on the surface and it is easily washed off. So why mix your own barn paint? Write for Color card showing sample shades and giving complete directions.

“ALADDIN” WAGON AND IMPLEMENT PAINT

“Aladdin” Wagon and Implement Paint. This paint is a good investment as a protection for wagons and implements. Almost every vehicle has a good paint coat in the beginning, but decay soon sets in wherever the original coat is cracked or worn away, and it is only necessary to have a small can of “Aladdin” Wagon and Implement Paint handy and to use it for recoating all worn spots. This will prevent any water action on the implement itself. And when the original paint coat becomes discolored or badly worn, the life and usefulness of the implement may be prolonged by applying a fresh coat of “Aladdin” Wagon and Implement Paint.

“Aladdin” Wagon and Implement Paint is made in Blue, Yellow, Black, Green, Red and Brown. Send for sample card, showing these beautiful shades.

“ALADDIN” CREOSOTE SHINGLE STAIN

“Aladdin” Shingle Stains for roof and dimension shingles. Made of Creosote and other wood preserving oils. It is designed for use on all shingles or wooden surfaces (rough or smooth), and brings out the grain of the wood in an artistic manner. For producing a soft velvety effect, it has no equal. It is made ready for use in four practical colors. One gallon will dip 500 shingles, or applied with a brush will cover 100 square feet of surface, two coats. Rough sawed shingles require 40 per cent more stain than smooth finished.

Put up in barrels, half barrels, 5-gallon cans and 1-gallon cans. Write for color card.

"ALADDIN" FLOOR PAINT

ELASTIC

DURABLE

"Aladdin" Floor Paint is a quick drying and durable paint for inside floors, the kind of hard elastic finish which a floor paint must have to stand wear and tear. The reason for this is that "Aladdin" floor paint is a thin paint, and the ingredients thoroughly and quickly harden. A thick heavy quick drying paint will not harden through. A

paint of this kind dries on the surface only, remaining soft underneath. It is liable to rub up, peel, etc., or stick to the legs of chairs when moved. A thick paint cannot be used with satisfaction on floors because it dries too slowly and gives dirt and dust a chance to become mixed with the paint coat.

"Aladdin" floor paint is covered by our binding guarantee and is made in the following shades: Yellow, Red, Maroon, Brown, Green and Gray. All these colors are shown on our sample shade card which will be sent free upon request.

"Aladdin" floor paint is sold at the following prices:

No. 2A-200—5 gallon cans, each.....\$6.00	No. 2A-204— $\frac{1}{2}$ gallon cans, each.....\$0.65
No. 2A-202—1 gallon cans, each.....1.25	No. 2A-206— $\frac{1}{4}$ gallon cans, each......35

"ALADDIN" VARNISH STAINS

For interior woodwork, furniture, etc.

"Aladdin" varnish stains are made of a high grade varnish, and the colors are so combined that when applied to any surface, they will produce natural wood effects. They are as durable as it is possible to make a finish of this kind. When used according to directions, the application is simple, and results satisfactory

"Aladdin" varnish stains are covered by our binding guarantee and are made in the following shades: Light Oak, Dark Oak, Cherry, Mahogany, Walnut and Rosewood. Color card free for the asking.

"ALADDIN" OIL WOOD STAINS

Fills and stains at one operation. All close grained woods, such as Pine, Maple, Poplar, Cherry, etc. Its use on open grain woods is equally satisfactory.

"Aladdin" oil wood stains dry with an egg shell gloss. When using "Aladdin" oil wood stains, whether staining on new work or old paint, grained or varnished surfaces, practically exact reproductions can be made of natural woods. To get the best results, apply in accordance with directions on our label.

"Aladdin" oil wood stains are put up in the following shades: Oak, Butternut, Antique Oak, Walnut, Cherry, Mahogany, Rosewood and Forest Green. Sample shade card free on request.

No. 2A-210

"Aladdin" Flat Wall Paint

producing on any interior surface, the smooth, dull velvety finish so much sought for at the present time. "Aladdin" Flat Finish is made in liquid form of a finishing coat consistency for decorating or redecorating walls, ceilings, woodwork, metallic surfaces, etc. "Aladdin" Flat Finish can also be used over burlap or walls which have been kalsomined.

"Aladdin" Flat Finish is durable, sanitary and washable. When it becomes soiled, it can be washed with soap and water, as it is proof against moisture.

"Aladdin" Flat Finish is easily applied, and the most satisfactory work can always be obtained by following a few simple directions.

"Aladdin" Flat Finish will cover approximately 900 square feet per gallon, one coat.

"Aladdin" Flat Finish is made in White, Cream, Old Rose, Light Brown, Light Gray, Medium Blue, Fresco, Green and Maroon. Sample card sent free on request.

"Aladdin" Flat Finish is put up in 5 gallon cans, one gallon, half gallon and quarter gallon cans.

No. 2A-215.

"Aladdin" Varnishes at 50 per cent. Saving

We offer our "Aladdin" varnishes with full confidence that no matter how trying the conditions, they will give absolute satisfaction. "Aladdin" varnishes are made by one of the oldest manufacturers in the country. They are not made to any special formula for us, but for each purpose we have picked out the very best varnish possible to obtain for that particular purpose, and are offering them under our own brand "Aladdin," which is sufficient insurance that they will give absolute satisfaction in every way. In addition to this, they are covered by our binding guarantee that if you are not satisfied with the varnish in every way, return it to us and we will refund full purchase price.

SPECIAL HARD OIL FINISH

Surpasses all other in working freedom, toughness and durability. Has a good luster and great wearing qualities. Will dry, dust free, in 24 hours.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-250	\$0.23	\$0.40	\$0.68	\$1.25	\$5.60

FURNITURE VARNISH

For varnishing and revarnishing all kinds of furniture. Dries quickly and does not stick to clothing. Will brighten up old and marred furniture and make it look like new.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-252	\$0.20	\$0.39	\$0.72	\$1.20	\$5.50

FLOOR VARNISH

Very elastic and durable. Dries to walk on in less than a day. Is not affected by hot or cold water. Specially adapted to hardwood and painted floors. It also renews the life of linoleum and oil cloth. Will not mar or show heel marks. If used on soft wood floors, apply one coat of our wood filler before the floor varnish.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-254	\$0.35	\$0.65	\$1.10	\$2.00	\$9.50

SPAR VARNISH

Suitable for general outside work, such as porches, doors, windows, etc., and is the very best varnish to use in bathrooms and kitchens where there is more or less water. Dries in from two to six hours and hardens thoroughly in forty-eight hours.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-256	\$0.32	\$0.59	\$1.10	\$1.95	\$9.50

WHITE AND ORANGE SHELLAC

Suitable for any purpose for which shellacs are used. For mission finish, to cover knots, to prevent paint coming off, etc.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-258—Orange		\$0.29	\$0.52	\$0.85	\$1.50
2A-260—White		.31	.55	.90	1.60

COACH VARNISH

For all kinds of interior finish. Dries quickly and is not affected by water. To be used over oil stains or for natural finish or over graining. Has a good body and high gloss finish.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-264	\$0.25	\$0.40	\$0.70	\$1.25	\$5.50

EXTRA COACH VARNISH

A varnish which we can recommend for the very best interior work. Dries, dust free, in about 5 hours and can be rubbed or left with a gloss finish.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-266	\$0.30	\$0.50	\$0.90	\$1.75	\$7.75

WHITE DAMAR VARNISH

A clear, transparent varnish for use over white, ivory or any delicate tint enamel or over wall paper. Gives a high gloss finish, and can be washed without destroying the gloss.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-268	\$0.30	\$0.50	\$0.90	\$1.75	\$7.75

LIQUID WOOD FILLER

An excellent surfacer or filler to be used on woods which have not been previously finished and which you wish to give a natural wood finish. Varnish applied over this will "Stand Out" with a full gloss finish for floors or woodwork.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each

JAPAN DRYER

A first-class "Japan Dryer" for use in all kinds of weather, and while we do not recommend the use of dryer unless weather conditions demand it, we can guarantee it to be as good as anything on the market.

	Pts. Each	Qts. Each	½ Gals. Each	Gals. Each	5 Gals. Each
2A-271	\$0.16	\$0.28	\$0.45	\$0.80	\$3.50

STRICTLY PURE LINSEED OIL

The country is so flooded with bogus paint oils of all kinds that a great care should be taken to secure pure linseed oil. We carry a full stock of strictly pure oil at all times. When we say strictly pure, we mean just what we say. The Michigan laws are such that we cannot ship other than pure oil. We especially recommend the use of our linseed oil with our "Aladdin" Ready-Colored Lead, as to derive the very best results from the lead to make it wear longest and for a bright lustrous finish, you should use strictly pure oil.

The prices quoted here are guaranteed until September 1st, 1915. Should there in the meantime be a decline in the price, our customers will be given full advantage of it.

Prices quoted include the package. That is Wood Jacket Cans for all the small quantities, and barrels for 25 or 50-gallon lots.
